# Pass Guaranteed 400-007 - Accurate Valid Cisco Certified Design Expert (CCDE v3.0) Written Exam Test Objectives

Some people are worrying about that they cannot operate the windows software and the online test engine of the 400-007 training engine smoothly. We ensure that you totally have no troubles in learning our 400-007 study materials. All small buttons are designed to be easy to understand. Also, the layout is beautiful and simple. Complex designs do not exist in our 400-007 Exam Guide. You can find that our content is easy to follow and practice.

Cisco 400-007 exam consists of multiple-choice questions and simulation-based questions. The simulation-based questions are designed to test candidates' ability to design and configure complex networks. 400-007 exam is three hours long, and candidates must score at least 80% to pass.

Cisco Certified Design Expert (CCDE v3.0) Written Exam, also known as the Cisco 400-007 exam, is a certification exam that tests the knowledge and skills of network design experts. 400-007 Exam is designed to validate the candidate's expertise in the design of complex network solutions and architectures. Cisco Certified Design Expert (CCDE v3.0) Written Exam certification is highly respected in the industry and is a prerequisite for many high-level networking positions.

100% Pass 400-007 - Cisco Certified Design Expert (CCDE v3.0) Written

Exam –Reliable Valid Test Objectives

400-007 practice materials are typically seen as the tools of reviving, practicing and remembering necessary exam questions for the exam, spending much time on them you may improve the chance of winning. However, our 400-007 training materials can offer better condition than traditional practice materials and can be used effectively. We treat it as our major responsibility to offer help so our 400-007 Practice Guide can provide so much help, the most typical one is their efficiency.

Cisco Certified Design Expert (CCDE v3.0) Written Exam Sample Questions (Q238-Q243):

NEW QUESTION # 238
What is a disadvantage of the traditional three-tier architecture model when east-west traffic between different pods must go through the distribution and core layers?

- A. Security
- B. High latency
- C. Low bandwidth
- D. Scalability

Answer: B

Explanation:
* D: Traditional three-tier architectures (access, distribution, and core layers) require that east-west traffic (between servers or pods in different access layers) traverse up to the distribution or core and then back down-introducing unnecessary hops and latency. This is a key design limitation addressed by spine- leaf and fabric architectures.
Other options:
* A: Bandwidth may be sufficient but not optimally utilized due to suboptimal pathing.
* B: Security is not inherently compromised by architecture, although microsegmentation is harder.
* C: Three-tier architectures can scale, but less efficiently and not without trade-offs like latency and complexity.

NEW QUESTION # 239
A small organization of 20 employees is looking to deliver a network design service for modernizing customer networks to support advanced solutions.
* Project scope and weekly progress should be visualized by the management.
* Always consider feedback and make changes accordingly during the project.
* Should consider flexibility to change scope at the point of time.
Which project methodology meets the requirements and have the least impact on the outcome?

- A. Six-Sigma
- B. Kanban
- C. LEAN
- D. Scrum

Answer: D

Explanation:
https://firebrand.training/uk/blog/scrum-vs-six-sigma-which-one-is-right-for-you

NEW QUESTION # 240
A network hacker is trying to interrupt the transport packet on IPSEC. A packet with duplicate sequence numbers is introduced. The customer sends high-priority traffic during this window.
Which design parameter should be considered to mitigate this issue?

- A. Apply anti-replay window 4096.
- B. Restrict keywork in IPSEC Tunnel.
- C. Increase QoS shape policy.
- D. Classify and Mark duplicate sequence packets.

Answer: A

NEW QUESTION # 241

Refer to the exhibit.

The enterprise customer wants to stream one-way video from their head office to eight branch offices using multicast. Their current service provider provides a Layer3 VPN solution and manages the CE routers, but they do not currently support multicast. Which solution quickly allows this multicast traffic to go through while allowing for future scalability?

- A. Enable a GRE tunnel between nodes C1 and C4
- B. Implement hub and spoke MPLS VPN over DMVPN (also known as 2547o DMVPN) between CE1 and CE2
- C. Enable a GRE tunnel between nodes CE1 and CE2
- D. Enable a GRE tunnel between nodes C2 and C4
- E. The service provider must provide a Draft Rosen solution to enable a GRE tunnel between nodes PE1 and PE2

Answer: D

NEW QUESTION # 242

You are tasked with the design of a high available network. Which two features provide fail closed environments? (Choose two.)

- A. EIGRP
- B. MST
- C. RPVST+
- D. L2MP

Answer: B,C

Explanation:
* B (RPVST+ - Rapid Per VLAN Spanning Tree Plus): Provides fast convergence while blocking redundant paths to prevent loops - fail closed behavior under failure scenarios.
* C (MST - Multiple Spanning Tree): Provides loop prevention and isolates failures to specific instances (VLANs), maintaining fail closed protection.
Why other options are incorrect:
* A: EIGRP is a routing protocol; does not operate at Layer 2 to provide fail-closed loop protection.
* D: L2MP (Layer 2 Multipathing) allows multiple active links but requires additional loop prevention mechanisms.
-

NEW QUESTION # 243

......

Our company's staff conducted a rigorous analysis of the user's characteristics, so our staff created these three versions of our 400-007 study guide for you to choose: the PDF, Software and APP online. The PDF verson can be printable. And the Software version of our 400-007 Practice Engine can simulate the real exam and apply in Windows system. App online version can apply to all kinds of the eletronic devices. Our 400-007 exam questions are always thinking about customers and hopes that you can be satisfied in all aspects.
