## 新版PCCP題庫上線 - PCCP考試重點

雖然有其他的線上Palo Alto Networks的PCCP考試培訓資源在市場上，但我們TestpdfPalo Alto Networks的PCCP考試培訓資料是最好的。因為我們會定期更新，始終提供準確的Palo Alto Networks的PCCP考試認證資料，我們Testpdf Palo Alto Networks的PCCP考試培訓資料提供一年的免費更新，你會得到最新的更新了Testpdf Palo Alto Networks的PCCP考試培訓資料。

## 最新的 Certified Cybersecurity Associate PCCP 免費考試真題 (Q214-Q219):

### 問題 #214

Which type of Software as a Service (SaaS) application provides business benefits, is fast to deploy, requires minimal cost and is infinitely scalable?

- A. Secure
- B. Sanctioned
- C. Tolerated

- D. Benign

答案： B

解題說明：

Sanctioned SaaS applications are those that are approved and supported by the organization's IT department.

They provide business benefits such as increased productivity, collaboration, and efficiency. They are fast to deploy because they do not require installation or maintenance on the user's device. They require minimal cost because they are usually paid on a subscription or usage basis, and they do not incur hardware or software expenses. They are infinitely scalable because they can adjust to the changing needs and demands of the organization without affecting performance or availability<sup>12</sup>. #### 問題 #215

In addition to local analysis, what can send unknown files to WildFire for discovery and deeper analysis to rapidly detect potentially unknown malware?

- A. Cortex XDR
- B. AutoFocus
- C. MineMild
- D. Cortex XSOAR

答案： A

解題說明：

In addition to local analysis, Cortex XDR can send unknown files to WildFire for discovery and deeper analysis to rapidly detect.

#### 問題 #216

Which Palo Alto Networks solution has replaced legacy IPS solutions?

- A. Advanced WildFire
- B. Advanced URL Filtering
- C. Advanced DNS Security
- D. Advanced Threat Prevention

答案： D

解題說明：

Advanced Threat Prevention is the Palo Alto Networks solution that has replaced legacy Intrusion Prevention Systems (IPS). It offers inline, ML-powered threat detection and evasion-resistant inspection to block sophisticated threats in real time, going beyond traditional signature-based IPS.

#### 問題 #217

A doctor receives an email about her upcoming holiday in France. When she clicks the URL website link in the email, the connection is blocked by her office firewall because it's a known malware website. Which type of attack includes a link to a malware website in an email?

- A. pharming
- B. spam
- C. whaling
- D. phishing

答案： D

解題說明：

Phishing is a type of attack that involves sending fraudulent emails that appear to be from legitimate sources, such as banks, companies, or individuals, in order to trick recipients into clicking on malicious links, opening malicious attachments, or providing sensitive information<sup>12</sup>. The link to a malware website in the email is an example of a malicious link, which may lead to the

installation of malware, ransomware, spyware, or other malicious software on the user's device, or the redirection to a fake website that mimics a legitimate one, where the user may be asked to enter their credentials, personal information, or financial details<sup>34</sup>. Phishing emails often use social engineering techniques, such as creating a sense of urgency, curiosity, or fear, to persuade the user to click on the link or attachment, or to reply to the email<sup>5</sup>. Phishing emails may also spoof the sender's address, domain, or logo, to make them look more authentic and trustworthy<sup>6</sup>.

Whaling, pharming, and spam are not the correct answers for this question. Whaling is a specific type of phishing that targets high-profile individuals, such as executives, celebrities, or politicians, with the aim of stealing their confidential information or influencing their decisions<sup>7</sup>. Pharming is a type of attack that involves redirecting the user's web browser to a fake website, even if they enter the correct URL, by modifying the DNS server or the user's hosts file. Spam is the unsolicited or unwanted electronic messages, such as emails, texts, or instant messages, that are sent in bulk to a large number of recipients, usually for advertising, marketing, or scamming purposes. #### 問題 #218

What are two characteristics of an advanced persistent threat (APT)? (Choose two.)

- **A. Multiple attack vectors**
- **B. Repeated pursuit of objective**
- C. Tendency to isolate hosts
- D. Reduced interaction time

答案: **A,B**

解題說明:

Multiple attack vectors - APTs often use various methods (phishing, malware, lateral movement) to infiltrate and maintain access to a target.

Repeated pursuit of objective - APTs are known for their persistent nature, involving continuous efforts over time to achieve their goals, such as data theft or surveillance.

#### 問題 #219

.....

現在很多IT專業人士都一致認為Palo Alto Networks PCCP 認證考試的證書就是登上IT行業頂峰的第一塊墊腳石。因此Palo Alto Networks PCCP認證考試是一個很多IT專業人士關注的考試。
