We have free demos of our CS0-002 learning braindumps for your reference, as in the following, you can download which CS0-002 exam materials demo you like and make a choice. Therefore, if you really have some interests in our CS0-002 Study Guide, then trust our professionalism, we will give you the most professional suggestions on the details of the CS0-002 practice quiz, no matter you buy it or not, just feel free to contact us!

Why Has the CompTIA CySA+ Become So Popularly Accepted?

Unlike other cybersecurity certificates, CySA+ checks an individual's knowledge comprehensively by combining both performance-based and multiple-choice questions in its exam. The US Department of Defense has also expressed its confidence in the value and validity of CompTIA CySA+ and approved it as a DoD 8570 baseline certification in 5 different professional categories, four of which are Cybersecurity Service Provider (CSSP) jobs. These are some out of many reasons why CySA+ is highly respected.

CompTIA CS0-002 Unparalleled Valid Test Answers Pass Guaranteed Quiz

This confusion leads to choosing outdated material and ultimately failure in the test. The best way to avoid failure is using updated and real questions. BootcampPDF has come up with real CompTIA CS0-002 Questions for students so they can pass CompTIA Cybersecurity Analyst (CySA+) Certification Exam (CS0-002) exam in a single try and get to their destination. BootcampPDF has

made this study material after consulting with the professionals and getting their positive feedback.

CompTIA Cybersecurity Analyst (CySA+) Certification Exam Sample Questions (Q110-Q115):

NEW QUESTION # 110

A company's Chief Information Officer wants to use a CASB solution to ensure policies are being met during cloud access. Due to the nature of the company's business and risk appetite, the management team elected to not store financial information in the cloud. A security analyst needs to recommend a solution to mitigate the threat of financial data leakage into the cloud. Which of the following should the analyst recommend?

- A. Utilize the CASB to enforce DLP data-at-rest protection for financial information that is stored on premises.
- B. Do not utilize the CASB solution for this purpose, but add DLP on premises for data in motion.
- C. Do not utilize the CASB solution for this purpose, but add DLP on premises for data at rest.
- **D. Utilize the CASB to enforce DLP data-in-motion protection for financial information moving to the cloud.**

Answer: D

Explanation:

"CASB solutions generally offer their own DLP policy engine, allowing you to configure DLP policies in a CASB and apply them to cloud services." <https://www.mcafee.com/blogs/enterprise/cloud-security/how-a-casb-integrates-with-an-on-premises-dlp-solution/>

NEW QUESTION # 111

A company has a popular shopping cart website hosted geographically diverse locations. The company has started hosting static content on a content delivery network (CDN) to improve performance. The CDN provider has reported the company is occasionally sending attack traffic to other CDN-hosted targets.

Which of the following has MOST likely occurred?

- A. The CDN provider has misclassified the network traffic as hostile.
- B. The CDN provider has mistakenly performed a GeoIP mapping to the company.
- C. A vulnerability scan has tuned to exclude web assets hosted by the CDN.
- **D. The company has been breached, and customer PII is being exfiltrated to the CDN.**

Answer: D

NEW QUESTION # 112

A security analyst is researching an incident and uncovers several details that may link to other incidents. The security analyst wants to determine if other incidents are related to the current incident. Which of the following threat research methodologies would be MOST appropriate for the analyst to use?

- A. CVSS score
- B. Risk assessment
- C. Reputation data
- **D. Behavioral analysis**

Answer: D

NEW QUESTION # 113

Which of the following types of policies is used to regulate data storage on the network?

- **A. Retention**
- B. Acceptable use
- C. Account management
- D. Password

Answer: A

Explanation:

NEW QUESTION # 114

A risk assessment concludes that the perimeter network has the highest potential for compromise by an attacker, and it is labeled as a critical risk environment. Which of the following is a valid compensating control to reduce the volume of valuable information in the perimeter network that an attacker could gain using active reconnaissance techniques?

- A. A control that demonstrates that access to a system is only allowed by using SSH
- B. A control that demonstrates that the network security policy is reviewed and updated yearly
- C. A control that demonstrates that firewall rules are peer reviewed for accuracy and approved before deployment
- D. A control that demonstrates that all systems authenticate using the approved authentication method

Answer: C

Explanation:

A valid compensating control to reduce the volume of valuable information in the perimeter network that an attacker could gain using active reconnaissance techniques is a control that demonstrates that firewall rules are peer reviewed for accuracy and approved before deployment. This control can help ensure that the firewall rules are configured correctly and securely, and that they do not allow unnecessary or unauthorized access to the perimeter network. The other options are not compensating controls or do not address the risk of active reconnaissance. Reference: CompTIA Cybersecurity Analyst (CySA+) Certification Exam Objectives (CS0-002), page 14; <https://www.isaca.org/resources/isaca-journal/issues/2016/volume-3/compensating-controls>

NEW QUESTION # 115

.....
