Microsoft Configuring Windows Server Hybrid Advanced Services Sample Questions (Q96-Q101):

NEW QUESTION # 96

With which servers can Server1 and Server3 communicate? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

□ Explanation

□ Graphical user interface, text, application, chat or text message Description automatically generated

□

NEW QUESTION # 97

Your on-premises network contains an Active Directory Domain Services (AD OS) domain.

You plan to implement a failover cluster to enable a highly available file server. You are evaluating the following clustered file servers:

* File server for general use

* Scale-out file server

Which type of storage should you use for each file server? To answer, drag the appropriate storage types to the correct file servers.

Each storage type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

□

Answer:

Explanation:

□ Explanation:

□

NEW QUESTION # 98

Your network contains an Active Directory Domain Services (AD DS) domain. The domain contains a print server named Server1.

All printers are deployed to users by using a Group Policy Object (GPO) named GPO1.

You deploy a new server named Server2.

You need to decommission Server1. The solution must meet the following requirements:

* Migrate the shared printers to Server2 by using the Printer Migration Wizard.

* Ensure that the users use the printers on Server2.

* Minimize downtime for the users.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

□

Answer:

Explanation:

□ Explanation

□ Graphical user interface, text, application, email Description automatically generated
