

Latest updated UiPath-SAIv1 Braindumps & Verified UiPath Certification Training - Fantastic UiPath UiPath Specialized AI Associate Exam (2023.10)

P.S. Free 2025 UiPath UiPath-SAIv1 dumps are available on Google Drive shared by DumpsQuestion:
<https://drive.google.com/open?id=1O-f9gL2fReZO8KPbBhCzofFKQIV7srX9>

All our team of experts and service staff are waiting for your mail on the UiPath-SAIv1 exam questions all the time. As long as you encounter obstacles in the learning process on our UiPath-SAIv1 training guide, send us an email and we will solve it for you at the first time. Please believe that UiPath-SAIv1 Learning Materials will be your strongest backing from the time you buy our UiPath-SAIv1 practice braindumps to the day you pass the exam.

UiPath UiPath-SAIv1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Integration Service: This section of the exam measures skills of automation analysts and covers the use of UiPath Integration Service, its connectors, and triggers, showing how these elements enable smooth interaction between UiPath and third-party systems.
Topic 2	<ul style="list-style-type: none">Version Control Integration: This section of the exam measures skills of automation analysts and covers the use of Git integration in UiPath Studio for source control, including committing changes, cloning repositories, and pushing updates in collaborative environments.
Topic 3	<ul style="list-style-type: none">UiPath Studio - Document Understanding Activities: This section of the exam measures skills of RPA developers and covers configuring document classification and extraction workflows using Studio activities, taxonomy management, digitization, and validation tools. It also includes the use of trained ML models and prebuilt extractors.
Topic 4	<ul style="list-style-type: none">UiPath Document Understanding Framework: This section of the exam measures skills of automation analysts and covers how to apply the Document Understanding Framework, use templates, and develop proof-of-concept components. It focuses on building workflows for document processing.
Topic 5	<ul style="list-style-type: none">Working with Files and Folders: This section of the exam measures skills of automation analysts and covers creating and managing files and folders within local directories, including iteration and file manipulation using Studio activities.
Topic 6	<ul style="list-style-type: none">Updates Introduced to 2023.10: This section of the exam measures skills of automation analysts and covers the most recent product updates in UiPath, including one-click classification and extraction, Generative AI features, and enhancements to validation, annotation, and workflow design.

Topic 7	<ul style="list-style-type: none"> • UiPath Communications Mining: This section of the exam measures skills of RPA developers and covers the application of Communications Mining in automation and analytics. It distinguishes this capability from Task Mining and Process Mining, explains the interface, and describes use cases.
Topic 8	<ul style="list-style-type: none"> • Data Manipulation: This section of the exam measures skills of RPA developers and covers data handling with VB.Net string functions, RegEx patterns, arrays, lists, and dictionaries. It also covers DataTable operations such as building, filtering, and converting data for automation.
Topic 9	<ul style="list-style-type: none"> • Orchestrator: This section of the exam measures skills of RPA developers and covers Orchestrator's structure and functionality, including entities at the tenant and folder level. It includes using assets, queues, storage buckets, and provisioning robots along with setting up roles and logging.
Topic 10	<ul style="list-style-type: none"> • UiPath Communications Mining - Taxonomy Design: This section of the exam measures skills of RPA developers and covers how to design a taxonomy for Communications Mining, enabling models to interpret and structure data effectively during classification and automation processes.
Topic 11	<ul style="list-style-type: none"> • Implementation Methodology: This section of the exam measures skills of automation analysts and covers project lifecycle knowledge, understanding key stages of implementation, and interpreting Process Design Documents (PDDs) and Solution Design Documents (SDDs).
Topic 12	<ul style="list-style-type: none"> • UiPath Communications Mining - Model Training: This section of the exam measures skills of automation analysts and covers model training concepts in Communications Mining, explaining what defines a strong model and outlining the stages and components involved in developing one.
Topic 13	<ul style="list-style-type: none"> • Studio Interface: This section of the exam measures skills of RPA developers and covers essential navigation and setup within UiPath Studio. It includes installing Studio, connecting to Orchestrator, navigating the interface, managing packages, configuring activity settings, and publishing processes to Orchestrator.
Topic 14	<ul style="list-style-type: none"> • Exception Handling: This section of the exam measures skills of RPA developers and covers structured error handling using Try Catch, Throw, Rethrow, and Retry Scope. It prepares the candidate to handle and resolve automation errors gracefully.
Topic 15	<ul style="list-style-type: none"> • Control Flow: This section of the exam measures skills of RPA developers and covers debugging methods and logic handling in projects. It introduces the use of breakpoints, tracepoints, and debugging panels for managing and improving workflow execution.
Topic 16	<ul style="list-style-type: none"> • UiPath Document Understanding: This section of the exam measures skills of RPA developers and covers the concepts and capabilities of UiPath Document Understanding, including processing various document types, understanding rule-based and ML-based extraction, and distinguishing DU from traditional OCR.
Topic 17	<ul style="list-style-type: none"> • Business Knowledge: This section of the exam measures skills of automation analysts and covers the fundamental understanding of business process automation, its value in real-world operations, and essential concepts used to identify, map, and analyze business processes.
Topic 18	<ul style="list-style-type: none"> • Platform Knowledge: This section of the exam measures skills of RPA developers and covers the high-level purpose and use of UiPath platform components, including Studio, Robots, Orchestrator, and Integration Service. It also explains the difference between attended and unattended processes, providing foundational knowledge of process deployment environments.
Topic 19	<ul style="list-style-type: none"> • Environments, Applications, and • or Tools: This section of the exam measures skills of RPA developers and covers the candidate's comfort level with common development tools, platforms, and environments such as Excel, Outlook, browsers, version control, Studio, Document Understanding Template, AI Center, and Communication Mining.
Topic 20	<ul style="list-style-type: none"> • UiPath AI Center: This section of the exam measures skills of automation analysts and covers the basics of UiPath AI Center, its role in applying machine learning to automation, and the industries where AI models can be applied effectively.

UiPath-SAIAv1 Test Engine Version | UiPath-SAIAv1 New Real Exam

Generally speaking, passing the exam is what the candidates wish. Our UiPath-SAIAv1 exam braindumps can help you pass the exam just one time. And in this way, your effort and time spend on the practicing will be rewarded. UiPath-SAIAv1 training materials offer you free update for one year, so that you can know the latest information for the exam timely. In addition, UiPath-SAIAv1 Exam Dumps cover most of the knowledge point for the exam, and you can pass the exam as well as improve your ability in the process of learning. Online and offline chat service is available for UiPath-SAIAv1 learning materials, if you have any questions for UiPath-SAIAv1 exam dumps, you can have a chat with us.

UiPath Specialized AI Associate Exam (2023.10) Sample Questions (Q70-Q75):

NEW QUESTION # 70

What rule should be used in Taxonomy Manager for a text field that can have one of multiple known values?

- A. Contains
- B. Ends with
- C. Starts with
- **D. Possible values**

Answer: D

Explanation:

In UiPath's Taxonomy Manager, the "Possible values" rule should be used when a text field can have one of several predefined values. This ensures that the extracted data is validated against a list of acceptable values, helping to maintain consistency and accuracy during the extraction process. It is particularly useful for fields such as status indicators or categorical fields where only a limited set of options is valid.

(Source: UiPath Taxonomy Manager documentation)

NEW QUESTION # 71

How do you choose the appropriate document processing methodology?

- A. Based on the number of fields to be extracted.
- **B. Based on the document structure and data points to be extracted.**
- C. Based on the text language and the number of pages.
- D. Based on the document type and length.

Answer: B

Explanation:

Reference: UiPath Document Understanding

NEW QUESTION # 72

Which of the following consumes Page Units?

- A. Using ML Classifier on a 21-page document.
- B. Using Intelligent Form Extractor on a 5-page document with 0 successful extractions.
- **C. Applying OCR on a 10-page document.**
- D. Creation of a Document Validation Action in Action Center.

Answer: C

Explanation:

According to the UiPath documentation, Page Units are the measure used to license Document Understanding products. Page Units are charged based on the number of pages processed by the Document Understanding models, such as extractors, OCR engines,

and classifiers. Therefore, applying OCR on a 10-page document consumes Page Units, while the other options do not. The creation of a Document Validation Action in Action Center does not consume any Page Units, as it is a human-in-the-loop activity. Using ML Classifier on a 21- page document does not consume Page Units, as it is a free model. Using Intelligent Form Extractor on a 5- page document with 0 successful extractions does not consume Page Units, as the extractor only charges for successful extractions.

NEW QUESTION # 73

Which is the most suitable extractor for extracting data from invoices from different customers?

- A. The Form Extractor
- B. The Regex Based Extractor
- C. The Intelligent Form Extractor
- **D. The Machine Learning Extractor**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The Machine Learning Extractor is best suited for handling semi-structured documents like invoices, which often vary by layout, format, and provider. Unlike template-based extractors, ML extractors learn from data and generalize across multiple formats.

* It is trained to recognize fields regardless of positioning or formatting, making it ideal for vendor invoices, receipts, and more.

* UiPath Documentation Reference: Choosing the Right Extractor - UiPath DU

NEW QUESTION # 74

Which of the following options is accepted as a Column field name in Document Manager?

- **A. First_name123**
- B. flrst-name
- C. first name
- D. first_n@me

Answer: A

Explanation:

According to the UiPath documentation, the field name for a column field in Document Manager does not accept uppercase letters. It can only contain lowercase letters, numbers, underscore _ and dash -12. Therefore, the only option that meets these criteria is D. First_name123. The other options are invalid because they either contain uppercase letters, spaces, or @ symbols, which are not allowed.
