## Salesforce Certified Platform Identity and Access Management Architect Sample Questions (Q213-Q218):

### NEW QUESTION # 213

Universal Containers wants to secure its Salesforce APIs by using an existing Security Assertion Markup Language (SAML)

configuration supports the company's single sign-on process to Salesforce, Which Salesforce OAuth authorization flow should be used?

- **A. A SAML Assertion Row**
- B. OAuth 2.0 SAML Bearer Assertion Flow
- C. OAuth 2.0 JWT Bearer Flow
- D. OAuth 2.0 User-Agent Flow

**Answer: A**

#### NEW QUESTION # 214

Universal Containers (UC) has a classified information system that its call center team uses only when they are working on a case with a record type "Classified". They are only allowed to access the system when they own an open "Classified" case, and their access to the system is removed at all other times. They would like to implement SAML SSO with Salesforce as the IdP, and automatically allow or deny the staff's access to the classified information system based on whether they currently own an open "Classified" case record when they try to access the system using SSO. What is the recommended solution for automatically allowing or denying the access to the classified information system based on the open "classified" case record criteria?

- **A. Use a Common Connected App Handler using Apex to dynamically allow access to the system based on whether the staff owns any open "Classified" Cases.**
- B. Use Custom SAML JIT Provisioning to dynamically query the user's open "Classified" cases when attempting to access the classified information system.
- C. Use Apex trigger on case to dynamically assign permission Sets that Grant access when an user is assigned with an open "Classified" case, and remove it when the case is closed.
- D. Use Salesforce reports to identify users that currently owns open "Classified" cases and should be granted access to the Classified information system.

**Answer: A**

#### NEW QUESTION # 215

A public sector agency is setting up an identity solution for its citizens using a Community built on Experience Cloud and requires the new user registration functionality to capture first name, last name, and phone number. The phone number will be used for identity verification.

Which feature should an identity architect recommend to meet the requirements?

- A. Integrate with social websites (Facebook, LinkedIn, Twitter)
- **B. Use Login Discovery**
- C. Use an external Identity Provider
- D. Create a custom Lightning Web Component

**Answer: B**

#### NEW QUESTION # 216

A multinational industrial products manufacturer is planning to implement Salesforce CRM to manage their business. They have the following requirements:

1. They plan to implement Partner communities to provide access to their partner network .
2. They have operations in multiple countries and are planning to implement multiple Salesforce orgs.
3. Some of their partners do business in multiple countries and will need information from multiple Salesforce communities.
4. They would like to provide a single login for their partners.

How should an Identity Architect solution this requirement with limited custom development?

- A. Consolidate Partner related information in a single org and provide access through Salesforce community.
- B. Allow partners to choose the Salesforce org they need information from and use login flows to authenticate access.
- C. Register partners in one org and access information from other orgs using APIs.
- **D. Create a partner login for the country of their operation and use SAML federation to provide access to other orgs.**

**Answer: D**

### NEW QUESTION # 217

What item should an Architect consider when designing a Delegated Authentication implementation?

- A. The Web service should be secured with TLS using Salesforce trusted certificates.
- B. The Web service should implement a custom password decryption method.
- C. The Web service should be able to accept one to four input method parameters.
- D. The web service should use the Salesforce Federation ID to identify the user.

**Answer: A**

### NEW QUESTION # 218

.....
