Pegasystems Certified Pega Decisioning Consultant 25 Sample Questions (Q97-Q102):

NEW QUESTION # 97

U+ Bank implemented a customer journey for its customers. The journey consists of five stages. The bank observes that as customers progress through the journey, one customer entered the third stage of the journey, and then received an offer that is not included in any journey.

Which statement explains the cause of this behavior?

- A. The customer was not eligible for the last stage of the journey and the system presented an offer outside the journey.
- **B. The customer always receives the most relevant action, even if an action is not a part of any journey.**
- C. The bank implemented upweighting for the third stage.
- D. The customer can be involved in only one active journey at a given moment.

Answer: B

Explanation:

Pega Customer Decision Hub always selects and prioritizes the most relevant and valuable action for each customer at any given moment, regardless of whether the action is part of a journey or not. A journey is a way to group and organize actions that are related to a common business objective or customer need, but it does not override the Next-Best-Action strategy that determines the best action for each customer. Therefore, if a customer receives an offer that is not included in any journey, it means that the offer is more suitable and beneficial for the customer than any other offer in the journey. NEW QUESTION # 98

U+ Bank's marketing department wants to use the always-on outbound approach to send promotional emails about credit card offers to qualified customers. As a part of this promotion, the bank wants to identify the starting population by defining a few high-level criteria in a segment.

For each condition below, select which two conditions should be defined in Segment and which three conditions should be defined in Engagement policy as best practice.

Answer:

Explanation:

Explanation:

A screenshot of a survey AI-generated content may be incorrect.

NEW QUESTION # 99

An outbound run identifies 150 Standard card offers, 75 on email, and 75 on the SMS channel. If the following volume constraint is applied, how many actions are delivered by the outbound run?

- A. 75 SMSes and 25 emails
- **B. 0**
- C. 75 emails 25 SMSes
- D. 1

Answer: B

NEW QUESTION # 100

U+ Bank wants to use Pega Customer Decision Hub™ to display a credit card offer, the Standard Card, to every customer who logs in to the bank website.

What three of the following artifacts are mandatory to implement this requirement? (Choose Three)

- **A. An action and the associated web treatment.**
- **B. Real-time containers.**
- C. Customer contact policies.

- D. A business structure.
- E. Customer engagement policies.

Answer: A,B

NEW QUESTION # 101

U+- Bank has recently implemented Pega Customer Decision Hub. As a first step, the bank went live with the contact center to improve customer engagement. Now, U+ Bank wants to extend its customer engagement through the web channel. As a decisioning architect, you have created the new set of actions, the corresponding treatments, enabled the web channel, and defined a new real-time container trigger in the Next- Best-Action Designer. What else do you configure for the new treatments to be present in the next-best-action recommendations?

- A. No need to do anything. The strategy is auto-generated.
- B. Create a channel strategy specifically for web.
- C. Modify the Next-Best-Action Framework strategy to cater to the new web channel.
- D. Change the generated decision strategy.

Answer: A

NEW QUESTION # 102
