PRINCE2 Agile Foundation Sample Questions (Q38-Q43):

NEW QUESTION # 38

Which of the following is used to support the "progress" practice?

- A. Agilometer
- B. Trading/swapping
- C. Team skills matrix
- **D. Burn charts**

Answer: D

Explanation:

In Agile Foundation guidance, the progress practice focuses on understanding, monitoring, and communicating how work is advancing toward agreed objectives and outcomes. Burn charts are a key tool used to support this practice, making option B the correct answer. Burn charts provide a simple, visual representation of progress over time, enabling teams and stakeholders to see how much work has been completed and how much remains.

Burn charts, including burn-down and burn-up charts, are widely used in Agile environments to support transparency and informed decision-making. A burn-down chart shows the remaining work decreasing over time, while a burn-up chart displays completed work against the total scope. Both formats help teams assess whether they are on track to meet their goals within a given timebox or delivery stage. Agile Foundation materials emphasize that progress should be measured based on delivered value and completed work, not on effort spent or activities performed.

Option A, the Agilometer, is used to assess the suitability and risks of Agile adoption rather than tracking delivery progress. Option C, trading or swapping, relates to scope flexibility and prioritization, allowing teams to exchange lower-value work for higher-value items while staying within constraints. While useful, it does not directly measure or visualize progress. Option D, the team skills matrix, supports capability development and resource planning, not progress tracking.

Agile Foundation documents highlight that effective progress tracking builds trust and supports governance without excessive reporting. Burn charts enable frequent inspection of progress, early identification of issues, and timely adaptation when trends indicate potential problems. They also support the principle of manage by exception by providing clear evidence when tolerances may be exceeded. By offering a shared, easily understood view of progress, burn charts strengthen transparency, collaboration, and confidence in Agile delivery, making them an essential tool for the progress practice.

NEW QUESTION # 39

Which is a purpose of the 'controlling stage' process?

- **A. To report stage progress to the project board**
- B. To establish whether the project is complete
- C. To execute and deliver the project product
- D. To draft the plan for the next stage's work

Answer: A

Explanation:

Reference: https://publications.axelos.com/PRINCE2Agile2016/content.aspx?page=pra_117&showNav=true&expandNav=true#:~:text=The%20purpose%20of%20the%20Controlling, the%20stage%20remains%20within%20tolerance.&text=Risks%20and%20issues%20are%20kept%20under%20control

The purpose of the controlling stage is to report stage progress to the project board, ensuring that the project remains within tolerance. Risks and issues are kept under control.

NEW QUESTION # 40

How is the 'learn from experience' principle applied in an agile context?

- A. By ensuring control through lots of short stages during innovative projects
- **B. By continual customer involvement to obtain feedback during the project**
- C. By using the Agilometer to assess risks associated with the agile way of working
- D. By prioritizing quality criteria to focus the project on the delivery of value

Answer: B

NEW QUESTION # 41

What is the definition of a timebox?

- A. A tool to write a requirement in the form of who, what and why

- B. A description of the rate of progress a team is making
- C. A regular event that looks at how processes can be improved
- D. A period where work is carried out to achieve a goal

Answer: D

NEW QUESTION # 42

Which statement describes the focus of "being Agile" and not "doing Agile"?

- A. Document-driven processes
- B. Adaptability and collaboration
- C. Task completion within strict timelines
- D. Agile techniques for efficiency

Answer: B

Explanation:

The concept of "being Agile" rather than merely "doing Agile" is a central theme in Agile Foundation guidance. "Being Agile" refers to adopting the Agile mindset, values, and principles as a way of thinking and behaving, rather than simply applying a set of tools, ceremonies, or techniques. This mindset emphasizes adaptability, collaboration, continuous learning, and responsiveness to change, which is best represented by option B.

Agile foundations clearly distinguish mindset from mechanics. While timelines, documentation, and techniques have their place, they are secondary to people, interactions, and the ability to respond effectively to changing circumstances. Adaptability means welcoming change, even late in development, when it improves value for customers and stakeholders. Collaboration emphasizes close, ongoing cooperation between cross-functional team members, business representatives, and customers, ensuring shared understanding and faster decision-making.

Option A focuses on strict timelines and task completion, which aligns more closely with traditional predictive or plan-driven approaches. Agile recognizes that rigid timelines can reduce flexibility and discourage learning. Option C emphasizes document-driven processes, which contradict the Agile value of prioritizing working solutions over comprehensive documentation. Documentation is useful, but it should support value delivery, not dominate it. Option D highlights Agile techniques for efficiency, which reflects "doing Agile" rather than "being Agile." Techniques such as stand-ups, boards, or retrospectives only create value when guided by an Agile mindset.

In Agile foundations, "being Agile" enables teams to continuously inspect and adapt their ways of working, improve relationships, and deliver meaningful outcomes. By focusing on adaptability and collaboration, organizations create environments where teams can respond effectively to uncertainty, learn from feedback, and consistently deliver value, which is the true intent of Agile.
