ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q37-Q42):

NEW QUESTION # 37

In which table can you find cost information for a specific fiscal period?

- A. cost_plan
- B. cost_plan_breakdown
- C. expense_line
- D. pm_project

Answer: B

Explanation:

Explanation

According to the ServiceNow documentation¹, the cost_plan_breakdown table stores the cost information for a specific fiscal period. This table contains the fields such as cost plan, fiscal period, amount, and currency.

The other options are incorrect because:

B: pm_project: The pm_project table stores the information about projects, such as name, description, state, and status².

C: cost_plan: The cost_plan table stores the information about cost plans, such as name, type, and project³.

D: expense_line: The expense_line table stores the information about expense lines, such as expense type, amount, and date⁴.

NEW QUESTION # 38

Depending on the execution type selected for a particular project, one of these dashboards will also be available:

- A. Project Summary - Waterfall Dashboard
- B. User Manager Dashboard
- C. PMO Dashboard
- D. Timecard Dashboard

Answer: A

Explanation:

Explanation

According to the Project Summary - Waterfall Dashboard document, depending on the execution type selected for a particular project, the Project Summary - Waterfall Dashboard will also be available. This dashboard provides a comprehensive view of the project status, progress, and performance using various widgets. The other options are not correct, as they are not dashboards that are dependent on the execution type of the project. The Timecard Dashboard is a dashboard that displays the time worked by users on various tasks. The User Manager Dashboard is a dashboard that displays the user management activities and statistics. The PMO Dashboard is a dashboard that displays the portfolio and project performance and health.

NEW QUESTION # 39

You can forecast future costs of projects based on:

Choose 2 answers

- A. Changes in project such as project requirements.
- B. Actual cost incurred.

- C. Paired instances.
- D. Incident cost.

Answer: A,B

NEW QUESTION # 40

The Business Unit field on a Project or Demand form displays values from a specific table. What type of field is this?

- A. Conditions.
- **B. Reference.**
- C. List.
- D. Journal.

Answer: B

Explanation:

According to the ServiceNow documentation¹, the Business Unit field on a Project or Demand form is a reference field that displays values from the cmn_department table. A reference field stores a link to a record on another table, rather than storing the data directly in the field².

NEW QUESTION # 41

What are the default project template configuration records available in the Template Config module?

Choose 3 answers

- A. Project subtask
- **B. Project template**
- C. Task
- **D. Project task**
- **E. Project**

Answer: B,D,E

Explanation:

Explanation

the default project template configuration records available in the Template Config module are Project task, Project, and Project template. These records define the fields and values that are copied from the template to the project when a project is created from a template. The other options are incorrect because:

B: Project subtask: Project subtask is not a valid record in the Template Config module, as it is a child of the Project task record².

D: Task: Task is not a valid record in the Template Config module, as it is a parent of the Project task record³.
