The EC-Council, a leading provider of cybersecurity training and certification, created the CND certification program to address the growing need for trained and competent network security professionals. The program focuses on training individuals to defend networks, identify and respond to cybersecurity threats, and understand network security policies and procedures. The CND exam requires the candidates to demonstrate their ability to secure network infrastructures, identify vulnerabilities and perform risk assessments, and develop and implement security policies and procedures.

Answer: A

### NEW QUESTION # 141

The IR team and the network administrator have successfully handled a malware incident on the network. The team is now preparing countermeasure guideline to avoid a future occurrence of the malware incident.

Which of the following countermeasure(s) should be added to deal with future malware incidents? (Select all that apply)

- A. Install antivirus software
- B. Implementing a strong password policy
- C. Implementing strong authentication schemes
- D. Complying with the company's security policies

Answer: A,B,C,D

Explanation:

The countermeasures to deal with future malware incidents involve a multi-layered approach that includes:

\* Complying with the company's security policies: Ensuring that all security policies are followed can prevent malware incidents by

maintaining a secure network environment.

\* Implementing strong authentication schemes: Strong authentication can prevent unauthorized access, reducing the risk of malware being introduced by attackers.

\* Implementing a strong password policy: Robust password policies can deter attackers by making it more difficult to gain access through brute force or other password-related attacks.

\* Install antivirus software: Antivirus software is essential for detecting, preventing, and removing malware from the network.

These measures align with the Certified Network Defender (CND) program's emphasis on a defense-in-depth strategy, which includes protecting endpoints, data, and networks, as well as continuous threat monitoring and response<sup>123</sup>.

## NEW QUESTION # 142

Daniel is monitoring network traffic with the help of a network monitoring tool to detect any abnormalities. What type of network security approach is Daniel adopting?

- A. Preventative
- B. Retrospective
- C. Defense-in-depth
- D. Reactive

**Answer: D**

Explanation:

Daniel is adopting a Reactive network security approach. This approach involves monitoring network traffic to detect any abnormalities or intrusions as they occur. The goal of reactive security is to identify and respond to threats in real-time. It is a part of the broader defense strategy that includes Protect, Detect, Respond, and Predict, where 'Detect' aligns with the reactive approach. By using network monitoring tools, Daniel is able to observe the network for any signs of compromise or unusual activity and then take appropriate action to mitigate the threat.
