New C_CPI_2506 Exam Prep, C_CPI_2506 Valid Exam Practice

Now, if you use C_CPI_2506 preparation materials, you only need to learn twenty to thirty hours to go to the exam. And, you will have a 99% chance to pass the exam. Of course, you don't have to buy any other study materials. C_CPI_2506 exam questions can satisfy all your learning needs. During this time, you must really be learning. If you just put C_CPI_2506 Real Exam in front of them and didn't look at them, then we have no way. C_CPI_2506 exam questions want to work with you to help you achieve your dreams.

SAP Certified Associate - Integration Developer Sample Questions (Q48-Q53):

NEW QUESTION # 48

You have set up a basic authentication policy, but the API proxy returns an HTTP status of 401. What could be a reason?

- A. In the AssignMessage policy, the Assign To tag has the type="request"
- B. In the AssignMessage policy, the Assign To tag has the type="preFlow"
- C. In the AssignMessage policy, the Assign To tag has the type="response"
- D. In the AssignMessage policy, the Assign To tag has the type="postFlow"

Answer: A

Explanation:

In API Management (SAP Integration Suite), when implementing Basic Authentication policies:

If the AssignMessage policy does not correctly assign credentials to the request message, authentication will fail.

This results in HTTP 401 Unauthorized.

Other tags like preFlow, postFlow, response are policy flow phases, but the credentials must be applied to the request for proper authentication.

Thus, the root cause is when the Assign To = request is missing/misconfigured.

NEW QUESTION # 49

You are using a Data store Operation of the type Write. Which parameter must you select to avoid duplicate entries?

- A. Retention Threshold for Alerting
- B. Include Message Headers
- C. Encrypted stored Message
- D. Overwrite Existing Message

Answer: D

Explanation:

In a Data Store Write operation:

If multiple messages are written with the same Entry ID, enabling Overwrite Existing Message ensures that the previous entry is replaced, avoiding duplicate records.

Other options:

Encrypted Stored Message # Secures data, not related to duplicates.

Include Message Headers # Controls storage of headers, not duplication.

Retention Threshold for Alerting # Configures alerts, not duplication.

Thus, the parameter required to avoid duplicates is Overwrite Existing Message.

NEW QUESTION # 50

You want to implement a synchronous call to a remote HTTP API as an integration flow component. Which adapter can you use?

- A. OData
- B. SFTP
- C. Mail
- D. AMQP

Answer: A

Explanation:

For a synchronous call to a remote HTTP API in an integration flow:

The OData adapter (or HTTP adapter) is used to perform synchronous request-reply communication with REST-based services.

AMQP # Messaging protocol, not synchronous.

SFTP # File-based transfer, asynchronous.

Mail # For SMTP/IMAP, not synchronous API calls.

Thus, the correct adapter for a synchronous remote API call is OData (or HTTP adapter, depending on configuration).

NEW QUESTION # 51

Besides in SAP API Management, where can you find policy templates?

- A. In SAP API Business Accelerator Hub- Explore Products
- B. In SAP API Business Accelerator Hub - Explore Discover Integrations
- C. In SAP API Business Accelerator Hub ? Explore Business Processes
- **D. In SAP API Business Accelerator Hub- Explore Categories ?? APIs**

Answer: D

Explanation:

Besides in SAP API Management, you can find policy templates in SAP API Business Accelerator Hub- Explore Categories ?? APIs. Policy templates are reusable sets of policies that can be applied to APIs to define their behavior and security. In SAP API Business Accelerator Hub, you can explore various categories of APIs that are pre-packaged with policy templates. For example, you can find APIs for sales order processing, customer master data management, product catalog management, and so on. Each API category has a set of policy templates that are suitable for its use case. Reference: SAP API Business Accelerator Hub | SAP Help Portal, Explore Categories | SAP Help Portal

NEW QUESTION # 52

What kind of editor can you use to manipulate integration flows?

- A. Command-line editor
- **B. Graphical editor**
- C. Code editor

Answer: B

Explanation:

To manipulate integration flows, you can use a graphical editor that is provided by SAP Integration Suite. The graphical editor allows you to visualize and edit your integration flows using a drag-and-drop interface. It also provides a palette of icons that represent different integration components and actions, such as senders, receivers, routers, mappers, transformers, and so on. You can use the graphical editor to design and configure complex integration scenarios in a user-friendly way.
