

100% Pass 2026 NGFW-Engineer: Palo Alto Networks Next-Generation Firewall Engineer Newest Latest Exam Experience

What's more, part of that TestPassed NGFW-Engineer dumps now are free: https://drive.google.com/open?id=1PI8H3P_Xmez8AXPTxXdJ4qtRuj3jZRXw

We can provide absolutely high quality guarantee for our NGFW-Engineer practice materials, for all of our NGFW-Engineer learning materials are finalized after being approved by industry experts. Without doubt, you will get what you expect to achieve, no matter your satisfied scores or according NGFW-Engineercertification file. As long as you choose our NGFW-Engineer exam questions, you will get the most awarded.

Palo Alto Networks NGFW-Engineer Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• PAN-OS Networking Configuration: This section of the exam measures the skills of Network Engineers in configuring networking components within PAN-OS. It covers interface setup across Layer 2, Layer 3, virtual wire, tunnel interfaces, and aggregate Ethernet configurations. Additionally, it includes zone creation, high availability configurations (active• active and active• passive), routing protocols, and GlobalProtect setup for portals, gateways, authentication, and tunneling. The section also addresses IPSec, quantum-resistant cryptography, and GRE tunnels.
Topic 2	<ul style="list-style-type: none">• Integration and Automation: This section measures the skills of Automation Engineers in deploying and managing Palo Alto Networks NGFWs across various environments. It includes the installation of PA-Series, VM-Series, CN-Series, and Cloud NGFWs. The use of APIs for automation, integration with third-party services like Kubernetes and Terraform, centralized management with Panorama templates and device groups, as well as building custom dashboards and reports in Application Command Center (ACC) are key topics.
Topic 3	<ul style="list-style-type: none">• PAN-OS Device Setting Configuration: This section evaluates the expertise of System Administrators in configuring device settings on PAN-OS. It includes implementing authentication roles and profiles, and configuring virtual systems with interfaces, zones, routers, and inter-VSYS security. Logging mechanisms such as Strata Logging Service and log forwarding are covered alongside software updates and certificate management for PKI integration and decryption. The section also focuses on configuring Cloud Identity Engine User-ID features and web proxy settings.

2026 Latest NGFW-Engineer Exam Experience | Useful Palo Alto Networks Next-Generation Firewall Engineer 100% Free Exam Fee

To avail of all these benefits you need to pass the NGFW-Engineer exam which is a difficult exam that demands firm commitment and complete NGFW-Engineer exam questions preparation. For the well and quick NGFW-Engineer exam dumps preparation, you can get help from TestPassed NGFW-Engineer Questions which will provide you with everything that you need to learn, prepare and pass the Palo Alto Networks Next-Generation Firewall Engineer certification exam.

Palo Alto Networks Next-Generation Firewall Engineer Sample Questions (Q63-Q68):

NEW QUESTION # 63

Which configuration in the LACP tab will enable pre-negotiation for an Aggregate Ethernet (AE) interface on a Palo Alto Networks high availability (HA) active/passive pair?

- A. Set LACP mode to "Active."
- B. Set passive link state to "Auto."
- C. Set "Enable in HA Passive State."
- D. Set Transmission Rate to "fast."

Answer: C

Explanation:

In a High Availability (HA) active/passive pair configuration, when setting up an Aggregate Ethernet (AE) interface, enabling the "Enable in HA Passive State" option allows the interface to participate in LACP (Link Aggregation Control Protocol) even when the system is in the passive state. This ensures that the pre-negotiation of the LACP link occurs, allowing the link aggregation to be ready as soon as the firewall becomes active.

NEW QUESTION # 64

Which CLI command is used to configure the management interface as a DHCP client?

- A. set network dhcp type management-interface
- B. set deviceconfig system type dhcp-client
- C. set deviceconfig management type dhcp-client
- D. set network dhcp interface management

Answer: C

Explanation:

To configure the management interface as a DHCP client on a Palo Alto Networks NGFW, the correct CLI command is set deviceconfig management type dhcp-client.

This command configures the management interface to obtain an IP address dynamically using DHCP.

NEW QUESTION # 65

For explicit proxy deployment, which port is typically used by the client browsers to send requests to the proxy?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: B

NEW QUESTION # 66

After an engineer configures an IPSec tunnel with a Cisco ASA, the Palo Alto Networks firewall generates system messages reporting the tunnel is failing to establish.

Which of the following actions will resolve this issue?

- A. Validate the tunnel interface VLAN against the peer's configuration.
- B. Check that IPSec is enabled in the management profile on the external interface.
- C. Ensure that an active static or dynamic route exists for the VPN peer with next hop as the tunnel interface.
- **D. Configure the Proxy IDs to match the Cisco ASA configuration.**

Answer: D

Explanation:

The Proxy IDs (or Traffic Selectors) define the local and remote subnets that are allowed to communicate over the IPSec tunnel. If the Proxy IDs on the Palo Alto Networks firewall do not match the configuration on the Cisco ASA, the tunnel will fail to establish because the firewalls won't agree on which traffic to encrypt. Ensuring that the Proxy IDs match between the Palo Alto Networks firewall and the Cisco ASA will resolve the issue.

NEW QUESTION # 67

Which statement applies to the relationship between Panorama-pushed Security policy and local firewall Security policy?

- A. The order of policy evaluation can be configured differently in different device groups.
- B. When a policy match is found in a local firewall policy, if any Panorama shared post-rule is configured, it will still be evaluated.
- C. Panorama post-rules can be configured to be evaluated before local firewall policy for the purpose of troubleshooting.
- **D. Local firewall rules are evaluated after Panorama pre-rules and before Panorama post-rules.**

Answer: D

Explanation:

Local firewall rules are evaluated after Panorama pre-rules (those applied before the firewall's local policies) and before Panorama post-rules (those applied after the firewall's local policies).

This ensures that the local firewall rules do not override the central Panorama policy and are only applied in the appropriate order within the policy evaluation sequence.

NEW QUESTION # 68

.....

Do you want to find a good job which brings you high income? Do you want to be an excellent talent? The NGFW-Engineer certification can help you realize your dream which you long for because the NGFW-Engineer test prep can prove that you own obvious advantages when you seek jobs and you can handle the job very well. You can learn our NGFW-Engineer test prep in the laptops or your cellphone and study easily and pleasantly as we have different types, or you can print our PDF version to prepare your exam which can be printed into papers and is convenient to make notes. Studying our NGFW-Engineer Exam Preparation doesn't take you much time and if you stick to learning you will finally pass the exam successfully.
