C-THR92-2505 Exam Sample Questions & C-THR92-2505 Valid Dumps Ebook

It can be said that all the content of the C-THR92-2505 study materials are from the experts in the field of masterpieces, and these are understandable and easy to remember, so users do not have to spend a lot of time to remember and learn. It takes only a little practice on a daily basis to get the desired results. Especially in the face of some difficult problems, the user does not need to worry too much, just learn the C-THR92-2505 Study Materials provide questions and answers, you can simply pass the exam. This is a wise choice, and in the near future, after using our C-THR92-2505 training materials, you will realize your dream of a promotion and a raise, because your pay is worth the rewards.

SAP Certified Associate - SAP SuccessFactors People Analytics: Reporting Sample Questions (Q77-Q82):

NEW QUESTION # 77

Where can you obtain the latest versions of the standard canvas report templates provided by SAP SuccessFactors?

- A. SAP SuccessFactors HCM Cloud Operations Portal
- B. SAP Support Portal
- **C. SAP Help Portal**
- D. SAP PartnerEdge

Answer: C

Explanation:

- * Accessing Standard Canvas Report Templates:
* SAP SuccessFactors provides the latest versions of standard canvas report templates on the SAP Help Portal, which is a central resource for all official SAP documentation and templates.

NEW QUESTION # 78

You are using Report Center to share a canvas report. You share the report with a Dynamic Group (see attached image). Who is the report shared with?

- A. Employees of Atlanta
- **B. Employees of the Sales departments and all employees of Atlanta**
- C. Employees of the Sales department of Atlanta
- D. Employees of the Sales department

Answer: B

Explanation:

- * Dynamic Groups in SAP SuccessFactors:
* Dynamic groups combine multiple People Pools using logical OR conditions.
* In the given configuration, the report is shared with employees in Atlanta OR employees in the Sales department.
* Explanation of the Result:
* Employees in both conditions are included because the People Pools are treated as separate categories and are not exclusive to each other.

NEW QUESTION # 79

Within a Story, you create a query using the Basic User Information table. After you add the Proxy Information table, you notice that some of the basic information records are NO longer displayed in the preview. How do you adjust the query to return the missing records in the preview?

- A. Change the join type to Inner Join.
- B. Remove the related table and add it using the Show Related Tables command from the Action Menu.
- **C. Change the join type to Left Outer Join.**
- D. Remove the related table and select and drag it from the Available Data section.

Answer: C

Explanation:

* Join Types in Queries:

* Inner Join: Only returns rows where there is a match in both tables.

* Left Outer Join: Returns all rows from the left table and matching rows from the right table, filling in NULLs where there is no match.

* Scenario:

* Adding the Proxy Information table creates a situation where some records from the Basic User Information table no longer match with Proxy Information.

* Changing the join type to Left Outer Join ensures that all records from the Basic User Information table are included, regardless of matching Proxy Information.

* Steps to Adjust Join Type:

* Edit the query.

* Locate the join between Basic User Information and Proxy Information tables.

* Change the join type from Inner Join to Left Outer Join.

NEW QUESTION # 80

If you want to create a single filter that utilizes criteria from multiple tables in the same query, which filter do you need to use in Query Designer?

- A. Table Advanced filter
- B. Query Scope filter
- C. **Query Advanced filter**
- D. Table Simple filter

Answer: C

Explanation:

* Filter Types in Query Designer

* A Query Advanced Filter is used to define filter conditions across multiple tables in a single query. This is necessary when the criteria involve fields from different data sources.

* Why Other Options are Incorrect

* A (Query Scope filter): Used to limit data based on scope, but it does not combine criteria across multiple tables.

* B (Table Simple filter): Applies filters only to a single table.

* D (Table Advanced filter): Applies advanced criteria but only within a single table.

References

* SAP SuccessFactors Query Designer Documentation

NEW QUESTION # 81

You are using a pivot table in your canvas report but the report does NOT display the most recent data. What could be the reason?

- A. You are using a wrong People Scope.
- B. **You are using a query with a static date filter.**
- C. You are using the percent of total option.
- D. You are NOT using a template.

Answer: B

Explanation:

* Issue with Static Date Filters:

* If the query uses a static date filter (e.g., a specific range like "January 1, 2023, to March 31, 2023"), the report will not reflect the most recent data as the filter restricts results to the defined date range.

* Resolution:

* Update the query to use dynamic date filters (e.g., "Last 30 Days" or "Current Year") to ensure the pivot table includes the latest data.

NEW QUESTION # 82

Only if you pass the exam can you get a better promotion. And if you want to pass it more efficiently, we must be the best partner for you. Because we are professional C-THR92-2505 questions torrent provider, we are worth trusting; because we make great efforts, we do better. Here are some reasons to choose us.
