

試験の準備方法-正確的なC-BCBTP-2502出題内容試験-便利なC-BCBTP-2502資格模擬

第一に、当社は常に優秀なC-BCBTP-2502学習ガイドと卓越した技術で受験者にフィードバックし、最も専門的な試験教材を継続的に開発しています。第二に、当社のC-BCBTP-2502学習資料は、最新のサービス指向システムの作成に固執し、お客様の便宜のためにより優先的な活動を提供するよう努めています。最後になりましたが、以下のように、無料のデモがあります。次のように、どのC-BCBTP-2502試験資料デモをダウンロードして選択することができます。したがって、あなたは私たちのC-BCBTP-2502学習資料を愛するでしょう！

SAP C-BCBTP-2502 認定試験の出題範囲：

トピック	出題範囲
トピック 1	• Illustrating CIO Transformation Delivered by SAP Business Suite: This section of the exam evaluates the skills of IT Transformation Managers and covers the role of SAP Business Suite in delivering value for CIO-led digital transformation. It highlights the significance of SAP’s portfolio in enterprise IT, introduces the capabilities of SAP BTP, and shows how it connects with end-to-end processes and industry-specific use cases. Candidates should also be able to identify the key products within SAP BTP and explain how cross-portfolio components integrate to deliver measurable value.
トピック 2	• Discovering SAP Business Technology Platform: This section of the exam measures the skills of SAP Solution Architects and focuses on positioning the SAP Business Technology Platform within the overall SAP Business Suite strategy. It includes understanding the platform’s role in enabling transformation, aligning with enterprise strategy, and supporting digital innovation. Candidates are expected to recognize the relevance of SAP BTP in modern business processes and how it integrates with other SAP offerings.

C-BCBTP-2502試験の準備方法 | 素敵なC-BCBTP-2502出題内容試験 | ハイパスレートのSAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite資格模擬

調査によれば、従業員の一部の新しいメンバーは昇進する機会を求めているが、C-BCBTP-2502試験の準備に集中するために断片的な時間とエネルギーを利用する必要があるため、厄介な状況に陥っています。C-BCBTP-2502試験の教材は多くの知識を取り入れており、参照用に利用可能な関連試験バンクを提供します。これは学習習慣に一致し、試験知識の豊富な収穫をもたらします。C-BCBTP-2502試験の質問だけでなく、C-BCBTP-2502認定資格を取得することもできます。

SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite 認定 C-BCBTP-2502 試験問題 (Q15-Q20):

質問 # 15

How does SAP BTP support predictive analytics in business decision-making?

Note: There are 3 correct answers to this question.

- A. By restricting analytics to financial data.
- **B. By using SAP Data Intelligence for real-time insights.**
- **C. By automating data visualization.**
- D. By requiring only manual data input.
- **E. By leveraging AI and machine learning models.**

正解: B、C、E

解説:

SAP BTP provides a comprehensive ecosystem for predictive analytics, moving business decision-making from a reactive to a proactive state. This is achieved through three primary mechanisms. First, by leveraging AI and machine learning models (Option A), BTP services like SAP AI Core allow developers to train models on historical business data to predict future trends, such as customer churn or equipment failure.

Second, the platform automates data visualization (Option B) through SAP Analytics Cloud. This ensures that complex predictive insights are presented in an intuitive, dashboard-driven format that business leaders can easily interpret and act upon, rather than sifting through raw spreadsheets.

Third, the platform utilizes SAP Data Intelligence for real-time insights (Option D). This component orchestrates data from across diverse sources-both SAP and non-SAP-ensuring that the predictive models are fed with the most current and relevant information. By integrating these three pillars-intelligence (AI /ML), visualization (Analytics), and orchestration (Data Intelligence)-SAP BTP transforms the SAP Business Suite into a forward-looking enterprise system. This allows organizations to anticipate market shifts, optimize their supply chains, and personalize customer interactions with a level of precision that was previously impossible, ultimately driving better business outcomes and long-term sustainability.

質問 # 16

Which SAP BTP component helps businesses extract insights from structured and unstructured data?

- A. SAP Integration Suite
- B. SAP Business Network
- **C. SAP Data Intelligence**
- D. SAP SuccessFactors

正解: C

解説:

In today's data landscape, business value is hidden not just in "structured" databases (like tables and spreadsheets) but also in "unstructured" data (like images, sensor logs, and social media feeds). SAP Data Intelligence is the specific component of SAP BTP designed to manage this diversity. It is a comprehensive data management solution that provides data orchestration, data cataloging, and powerful machine learning integration. It allows data scientists and engineers to create "data pipelines" that ingest, transform, and analyze data regardless of its source or format.

The role of SAP Data Intelligence within the SAP Business Suite is to turn "dark data" into actionable insights. For example, it can take unstructured maintenance logs from factory machinery and combine them with structured financial data to predict the total cost of ownership of an asset. By providing a unified view of the entire data landscape-whether that data resides in an SAP HANA database, a non-SAP data warehouse, or a cloud "data lake"-it ensures that decision-makers have a complete picture. This capability is vital for advanced AI and machine learning projects, as it provides the robust data foundation required to train accurate models, thereby positioning SAP BTP as a leader in enterprise data orchestration.

質問 # 17

Which market trend is driving the adoption of SAP BTP?

- A. Reduced emphasis on business automation.
- **B. Increased need for data-driven decision-making.**
- C. Decreasing focus on API-based integrations.
- D. Declining use of cloud-based solutions.

正解: B

解説:

One of the most powerful market trends driving the global adoption of SAP BTP is the increased need for data-driven decision-making. In today's hyper-competitive landscape, "gut feeling" is no longer a viable strategy for business leaders. Organizations are sitting on mountains of data, but the challenge lies in extracting actionable insights from it. SAP BTP addresses this trend by providing a unified environment where data management, analytics, and AI converge. This allows businesses to transform raw data into a strategic asset, enabling more accurate forecasting, optimized operations, and enhanced customer experiences.

This trend is further accelerated by the "Digital Transformation" movement, where companies are moving away from monolithic, isolated systems toward agile, interconnected platforms. Businesses now demand real-time visibility across their entire value chain from procurement to sales. SAP BTP's ability to integrate disparate systems and provide a "single source of truth" through SAP HANA Cloud and SAP Analytics Cloud directly addresses this market demand. As companies strive to become "Intelligent Enterprises," they rely on BTP to provide the technical infrastructure that supports continuous innovation, rapid automation, and the ability to pivot their business models based on data-driven evidence rather than historical assumptions.

質問 # 18

Which SAP BTP service allows businesses to create low-code/no-code applications?

- A. SAP Concur
- B. SAP BusinessObjects
- C. SAP Build Apps
- D. SAP Business Network

正解: C

解説:

To accelerate digital transformation, SAP has introduced the SAP Build portfolio on BTP, which is specifically designed to democratize application development. SAP Build Apps (formerly AppGyver) is the primary service within this portfolio that enables the creation of enterprise-grade applications using a no-code visual environment. This service allows users to build sophisticated user interfaces for mobile and web applications by simply dragging and dropping components. It also includes a visual logic editor, which eliminates the need to write traditional code for defining how the application behaves.

The strategic importance of SAP Build Apps within the SAP Business Technology Platform is its ability to reduce the backlog of IT departments. By allowing business experts—who understand the process but may not know how to code—to build their own solutions, SAP ensures that innovation can happen at the "front lines" of the business. These apps can easily be connected to SAP S/4HANA or other backend systems through secure APIs, ensuring that data integrity is maintained. This contrasts with tools like SAP BusinessObjects, which is focused on business intelligence and reporting, or SAP Concur, which is a specific SaaS application for travel and expense management. SAP Build Apps is a foundational service for positioning BTP as an agile platform for rapid extension and innovation.

質問 # 19

Which SAP BTP capability enables businesses to deploy AI-driven chatbots?

- A. SAP Conversational AI
- B. SAP Fiori
- C. SAP Event Mesh
- D. SAP Business Process Intelligence

正解: A

解説:

To improve user experience and automate customer or employee interactions, SAP BTP offers SAP Conversational AI. This service provides an end-to-end platform for building, training, and monitoring intelligent chatbots (digital assistants). These chatbots utilize Natural Language Processing (NLP) to understand human language, identify user intent, and extract relevant entities from a conversation. Unlike simple rule-based scripts, these AI-driven bots can learn over time and provide a more intuitive, human-like interaction.

In the context of the SAP Business Suite, SAP Conversational AI is positioned as a powerful tool for scaling business operations without increasing headcount. For example, a chatbot can be integrated into SAP S/4HANA to help users check invoice statuses or into SAP SuccessFactors to answer common HR policy questions. This capability shifts the burden of routine inquiries away from human agents to automated systems that are available 24/7. While SAP Fiori
