# New ECCouncil 312-85 Test Duration & 312-85 Accurate Prep Material

P.S. Free 2026 ECCouncil 312-85 dumps are available on Google Drive shared by DumpsMaterials: https://drive.google.com/open?id=1-3KGGbhEeqTDb_YjtzjfKYxAO4gf6Uic

You can use 312-85 guide materials through a variety of electronic devices. At home, you can use the computer and outside you can also use the phone. Now that more people are using mobile phones to learn our 312-85 study materials, you can also choose the one you like. One advantage is that if you use our 312-85 Practice Questions for the first time in a network environment, then the next time you use our study materials, there will be no network requirements. You can open the 312-85 real exam anytime and anywhere.

ECCouncil 312-85 Certification Exam is designed to test the knowledge of IT professionals who are specialized in the field of threat intelligence analysis. 312-85 exam is ideal for those who are seeking to enhance their skill set in cybersecurity and want to take their career to the next level. Certified Threat Intelligence Analyst certification has gained popularity among professionals as it is recognized globally, and it is a testament to the skills and knowledge of the holder.

ECCouncil 312-85, also known as the Certified Threat Intelligence Analyst (CTIA), is a certification exam that is designed to test an individual's knowledge and skills in threat intelligence analysis. Certified Threat Intelligence Analyst certification is ideal for those who are interested in pursuing a career in cybersecurity and want to specialize in threat intelligence analysis.

312-85 Accurate Prep Material & New 312-85 Mock Test

We recommend you use ECCouncil 312-85 practice material to prepare for your 312-85 certification exam. DumpsMaterials provides the most accurate and real ECCouncil 312-85 Exam Questions. These ECCouncil 312-85 practice test questions will assist you in better preparing for the final ECCouncil 312-85 exam.

ECCouncil 312-85 Certification is highly respected in the industry and is recognized globally. Certified Threat Intelligence Analyst certification is a testament to the candidate's proficiency in threat intelligence analysis and demonstrates their commitment to the industry's best practices. Certified Threat Intelligence Analyst certification also provides candidates with access to a global community of professionals who share their knowledge and experience in the field of threat intelligence analysis.

ECCouncil Certified Threat Intelligence Analyst Sample Questions (Q21-Q26):

NEW QUESTION # 21
Henry. a threat intelligence analyst at ABC Inc., is working on a threat intelligence program. He was assigned to work on establishing criteria for prioritization of intelligence needs and requirements.

Which of the following considerations must be employed by Henry to prioritize intelligence requirements?

- A. Develop a collection plan
- B. Understand frequency and impact of a threat
- C. Understand data reliability
- D. Produce actionable data

Answer: B

Explanation:
When prioritizing intelligence requirements, it is crucial to understand the frequency and impact of various threats. This approach helps in allocating resources effectively, focusing on threats that are both likely to occur and that would have significant consequences if they did. By assessing threats based on these criteria, Henry can ensure that the threat intelligence program addresses the most pressing and potentially damaging threats first, thereby enhancing the organization's security posture. This prioritization is essential for effective threat management and for ensuring that the most critical threats are addressed promptly.References:

NEW QUESTION # 22

Joe works as a threat intelligence analyst with Xsecurity Inc. He is assessing the TI program by comparing the project results with the original objectives by reviewing project charter. He is also reviewing the list of expected deliverables to ensure that each of those is delivered to an acceptable level of quality.
Identify the activity that Joe is performing to assess a TI program's success or failure.

- A. Determining the costs and benefits associated with the program
- B. Conducting a gap analysis
- C. Determining the fulfillment of stakeholders
- D. Identifying areas of further improvement

Answer: B

NEW QUESTION # 23

ABC is a well-established cyber-security company in the United States. The organization implemented the automation of tasks such as data enrichment and indicator aggregation. They also joined various communities to increase their knowledge about the emerging threats. However, the security teams can only detect and prevent identified threats in a reactive approach.
Based on threat intelligence maturity model, identify the level of ABC to know the stage at which the organization stands with its security and vulnerabilities.

- A. Level 3: CTI program in place
- B. Level 1: preparing for CTI
- C. Level 2: increasing CTI capabilities
- D. Level 0: vague where to start

Answer: A

Explanation:
ABC cyber-security company, which has implemented automation for tasks such as data enrichment and indicator aggregation and has joined various communities to increase knowledge about emerging threats, is demonstrating characteristics of a Level 3 maturity in the threat intelligence maturity model. At this level, organizations have a formal Cyber Threat Intelligence (CTI) program in place, with processes and tools implemented to collect, analyze, and integrate threat intelligence into their security operations. Although they may still be reactive in detecting and preventing threats, the existence of structured CTI capabilities indicates a more developed stage of threat intelligence maturity.

NEW QUESTION # 24

A threat analyst wants to incorporate a requirement in the threat knowledge repository that provides an ability to modify or delete

past or irrelevant threat data.
Which of the following requirement must he include in the threat knowledge repository to fulfil his needs?

- A. Protection ranking
- B. Searchable functionality
- C. Evaluating performance
- D. Data management

Answer: D

Explanation:
Incorporating a data management requirement in the threat knowledge repository is essential to provide the ability to modify or delete past or irrelevant threat data. Effective data management practices ensure that the repository remains accurate, relevant, and up-to-date by allowing for the adjustment and curation of stored information. This includes removing outdated intelligence, correcting inaccuracies, and updating information as new insights become available. A well-managed repository supports the ongoing relevance and utility of the threat intelligence, aiding in informed decision-making and threat mitigation strategies.References:

NEW QUESTION # 25
Bob, a threat analyst, works in an organization named TechTop. He was asked to collect intelligence to fulfil the needs and requirements of the Red Tam present within the organization.
Which of the following are the needs of a RedTeam?

- A. Intelligence on latest vulnerabilities, threat actors, and their tactics, techniques, and procedures (TTPs)
- B. Intelligence that reveals risks related to various strategic business decisions
- C. Intelligence extracted latest attacks analysis on similar organizations, which includes details about latest threats and TTPs
- D. Intelligence related to increased attacks targeting a particular software or operating system vulnerability

Answer: A
