

Use Huawei H19-401_V2.0 Questions - Complete Study Material For Huawei Exam

We would like to benefit our customers from different countries who decide to choose our H19-401_V2.0 study guide in the long run, so we cooperation with the leading experts in the field to renew and update our H19-401_V2.0 learning materials. Our leading experts aim to provide you the newest information in this field in order to help you to keep pace with the times and fill your knowledge gap. As long as you bought our H19-401_V2.0 Practice Engine, you are bound to pass the H19-401_V2.0 exam for sure.

Huawei H19-401_V2.0 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Huawei Xinghe Intelligent Campus Solution: Details the Xinghe solution's core capabilities including automation, ultra-broadband, network simplification, access authentication, intelligent policy, O&M, and security.
Topic 2	<ul style="list-style-type: none"> Huawei Xinghe Intelligent Cloud Managed Campus Network Design Guide for Small and Midsize Enterprises: Provides design guidance for SME cloud-managed campus networks covering architecture, IP services, wireless, access control, and O&M.
Topic 3	<ul style="list-style-type: none"> Huawei iMaster NCE-Campus: Campus Network Management System: Introduces the iMaster NCE-Campus platform covering automated network planning, construction, O&M, and its various deployment modes.
Topic 4	<ul style="list-style-type: none"> Technical Fundamentals and Applications of Multi-Branch WAN Interconnection: Addresses enterprise WAN technologies including private lines, VPN, and SD-WAN for connecting distributed branch offices.
Topic 5	<ul style="list-style-type: none"> Huawei Xinghe Intelligent Campus Solution for Large-and Medium-Sized Networks (Virtualization Scenario) Design Guide: Guides VXLAN-based fabric architecture and overlay network design for virtualized large and medium campus environments.
Topic 6	<ul style="list-style-type: none"> Huawei Campus SD-WAN Products and Solutions: Reviews WAN interconnection trends and introduces Huawei's SD-WAN solution along with the NetEngine AR product portfolio.
Topic 7	<ul style="list-style-type: none"> Huawei iMaster NCE-CampusInsight: Campus Network Analyzer: Presents Huawei's intelligent O&M analytics platform offering network health, user experience, application experience views, and a campus digital map.
Topic 8	<ul style="list-style-type: none"> Key Technical Principles and Applications in Industrial Scenarios: Covers the development, key technologies, and sector-specific applications of high-performance industrial campus networks.

Study Materials H19-401_V2.0 Review & H19-401_V2.0 Test Fee

It is seen as a challenging task to pass the H19-401_V2.0 exam. Tests like these demand profound knowledge. The Huawei H19-401_V2.0 certification is absolute proof of your talent and ticket to high-paying jobs in a renowned firm. HCSP-Presales-Campus Network Planning and Design V2.0 H19-401_V2.0 test every year to shortlist applicants who are eligible for the H19-401_V2.0 exam certificate.

Huawei HCSP-Presales-Campus Network Planning and Design V2.0 Sample Questions (Q34-Q39):

NEW QUESTION # 34

Huawei iMaster NCE-Campus supports hierarchical templates, enabling child templates to inherit the configurations of parent ones.

- A. True
- B. False

Answer: A

Explanation:

To manage massive-scale deployments (such as retail chains with thousands of stores), iMaster NCE- Campus utilizes Hierarchical Configuration. Administrators can define a Parent Template with global settings (e.g., DNS, NTP, Security standards) and create Child Templates for specific regions or sites. The child templates automatically inherit all settings from the parent, allowing the administrator to only configure the "differentiated" parts (e.g., local subnets or SSIDs), which drastically reduces configuration errors and deployment time.

NEW QUESTION # 35

Global radio calibration adopts a "the more, the better" approach. It needs to be performed immediately if poor wireless experience is detected.

- A. False
- B. True

Answer: A

Explanation:

Global radio calibration is a process where the WAC or iMaster NCE calculates the optimal channel and power levels for all APs. It is not a "the more, the better" task. Frequent or immediate calibration during peak hours can cause "flapping" where APs constantly change channels, leading to service interruptions and client disconnections. Huawei recommends performing global calibration during off-peak hours (e.g., at night) or using AI-based calibration (CampusInsight) which makes gradual, intelligent adjustments rather than disruptive immediate changes.

NEW QUESTION # 36

Which of the following deployment modes are supported by APs?

- A. DHCP Option 148-based deployment
- B. Email-based deployment
- C. Registration query center-based deployment
- D. Barcode scanning-based deployment with CloudCampus APP

Answer: A,C,D

Explanation:

In the Xinghe Intelligent Campus solution, APs (Access Points) support several automated "Plug-and-Play" deployment methods. Option A (Registration Query Center) allows an AP to query a Huawei-hosted global database to find its assigned controller. Option C (Barcode Scanning) uses the mobile app to scan the SN (Serial Number), binding the device to a site. Option D (DHCP Option 148) allows a local DHCP server to deliver the management IP of iMaster NCE-Campus directly to the AP. Email-based deployment (B) is reserved specifically for AR routers/CPEs in SD-WAN scenarios and is not a supported method for AP onboarding.

NEW QUESTION # 37

A typical campus network consists of the terminal layer, access layer, aggregation layer, core layer, egress zone, and O & M zone.

- A. False
- B. True

Answer: A

Explanation:

In the latest Huawei Xinghe Intelligent Campus (V2.0) architecture, the network is officially categorized into a four-layer architecture : Terminal Layer , Network Layer (which includes Access, Aggregation, and Core), Management Layer (iMaster NCE), and Application Layer . While the components mentioned (Egress, O & M) are physical zones, the "Typical Architecture" definition in HCSP documentation distinguishes between the layers of the infrastructure and the functional zones . Furthermore, in many modern SDN-based designs (like the Xinghe solution), the aggregation layer is often optional or collapsed, and the "O & M zone" is formally referred to as the Management and Analytics Layer .

NEW QUESTION # 38

Which of the following is not included in the wireless network health evaluation model?

- A. Throughput experience
- B. Roaming experience
- C. Access experience
- D. Network status

Answer: D

Explanation:

Huawei's wireless health model in CampusInsight is specifically "Experience-Centric." It evaluates the network based on five dimensions of user experience: Access (A) , Throughput (C) , Roaming (D) , Capacity , and Interference . While the physical status of a device (on/off) is monitored, "Network Status" is not one of the metrics used to calculate the specific Experience Health Score in this evaluation model.

NEW QUESTION # 39

.....

Our H19-401_V2.0 questions pdf is up to date, and we provide user-friendly H19-401_V2.0 practice test software for the H19-401_V2.0 exam. Moreover, we are also providing money back guarantee on all of H19-401_V2.0 test products. If the H19-401_V2.0 braindumps products fail to deliver as promised, then you can get your money back. The H19-401_V2.0 Sample Questions include all the files you need to prepare for the H19-401_V2.0 exam. With the help of the H19-401_V2.0 practice exam questions and test software, you will be able to feel the real H19-401_V2.0 exam scenario, and it will allow you to assess your skills.
