When we choose the employment work, you will meet a bottleneck, how to let a company to choose you to be a part of him? We would say ability, so how does that show up? There seems to be only one quantifiable standard to help us get a more competitive job, which is to get the test DP-700 certification and obtain a qualification. If you want to have a good employment platform, then take office at the same time there is a great place to find that we have to pay attention to the importance of qualification examination.

Microsoft DP-700 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Monitor and optimize an analytics solution: This section of the exam measures the skills of Data Analysts in monitoring various components of analytics solutions in Microsoft Fabric. It focuses on tracking data ingestion, transformation processes, and semantic model refreshes while configuring alerts for error resolution. One skill to be measured is identifying performance bottlenecks in analytics workflows.
Topic 2	<ul style="list-style-type: none">Ingest and transform data: This section of the exam measures the skills of Data Engineers that cover designing and implementing data loading patterns. It emphasizes preparing data for loading into dimensional models, handling batch and streaming data ingestion, and transforming data using various methods. A skill to be measured is applying appropriate transformation techniques to ensure data quality.
Topic 3	<ul style="list-style-type: none">Implement and manage an analytics solution: This section of the exam measures the skills of Microsoft Data Analysts regarding configuring various workspace settings in Microsoft Fabric. It focuses on setting up Microsoft Fabric workspaces, including Spark and domain workspace configurations, as well as implementing lifecycle management and version control. One skill to be measured is creating deployment pipelines for analytics solutions.

DP-700 Dump Check - Reliable DP-700 Test Vce

In all respects, you will find our DP-700 practice braindumps compatible to your actual preparatory needs. As you can find on our website, we have three different versions of our DP-700 exam questions: the PDF, Software and APP online. With all these versions, you can practice the DP-700 Learning Materials at any time and condition as you like. The language of our DP-700 simulating exam is simple and the content is engaging and easy. What are you waiting for? Just rush to buy it!

Microsoft Implementing Data Engineering Solutions Using Microsoft Fabric Sample Questions (Q111-Q116):

NEW QUESTION # 111

You have a Fabric workspace named Workspace1 that contains a warehouse named Warehouse2. A team of data analysts has Viewer role access to Workspace1. You create a table by running the following statement.

☐ You need to ensure that the team can view only the first two characters and the last four characters of the Creditcard attribute.

How should you complete the statement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

☐

Explanation:

☐

NEW QUESTION # 112

DRAG DROP

You have a Fabric eventhouse that contains a KQL database. The database contains a table named TaxiData. The following is a sample of the data in TaxiData.

☐

You need to build two KQL queries. The solution must meet the following requirements:

One of the queries must partition RunningTotalAmount by VendorID.

The other query must create a column named FirstPickupDateTime that shows the first value of each hour from tpep_pickup_datetime partitioned by payment_type.

How should you complete each query? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

☐

NEW QUESTION # 113

You have a Fabric warehouse named DW1 that contains a Type 2 slowly changing dimension (SCD) dimension table named DimCustomer. DimCustomer contains 100 columns and 20 million rows. The columns are of various data types, including int, varchar, date, and varbinary.

You need to identify incoming changes to the table and update the records when there is a change. The solution must minimize resource consumption.

What should you use to identify changes to attributes?

- A. a hash function to compare the attributes in the DimCustomer table.
- **B. a hash function to compare the attributes in the source table.**
- C. a direct attributes comparison for the attributes in the source table.
- D. a direct attributes comparison across the attributes in the DimCustomer table.

Answer: B

NEW QUESTION # 114

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a KQL database that contains two tables named Stream and Reference. Stream contains streaming data in the following format.

☐

Reference contains reference data in the following format.

☐

Both tables contain millions of rows.

You have the following KQL queryset.

You need to reduce how long it takes to run the KQL queryset.

Solution: You add the `make_list()` function to the output columns.

Does this meet the goal?

- A. Yes
- **B. No**

Answer: B

Explanation:

Adding an aggregation like `make_list()` would require additional processing and memory, which could make the query slower.

NEW QUESTION # 115

You are implementing a medallion architecture in a Fabric lakehouse.

You plan to create a dimension table that will contain the following columns:

- * ID
- * CustomerCode
- * CustomerName
- * CustomerAddress
- * CustomerLocation
- * ValidFrom
- * ValidTo

You need to ensure that the table supports the analysis of historical sales data by customer location at the time of each sale. Which type of slowly changing dimension (SCD) should you use?

- A. Type 3
- B. Type 0
- **C. Type 2**
- D. Type 1

Answer: C

NEW QUESTION # 116

.....

Our DP-700 real exam has been on the top of the industry over 10 years with passing rate up to 98 to 100 percent. Ranking the top of the similar industry, we are known worldwide by helping tens of thousands of exam candidates around the world. To illustrate our DP-700 Study Materials better, you can have an experimental look of them by downloading our DP-700 demos freely. And you will find it is quite fast and convenient.
