

熱門的最新1z0-1093-25題庫資源，免費下載1z0-1093-25學習資料幫助妳通過1z0-1093-25考試

Oracle Database Cloud Administrator 2021 Certified Professional Certification
Exam Number → 1Z0-1093-21

Describe NoSQL data models

38. Which set of data types is supported by the NoSQL Database Cloud Service tables?

enums, map, record

Explain Exadata Cloud Service and the components needed (options networking/shapes/expansion)

12. Which system configuration is offered by the Oracle Database Exadata Cloud Service?

Each system configuration starts with a fixed amount of OCPU, memory, storage, and network resources.

Oracle Cloud Database Services

32. You want to scale within Exadata System. Which of the following two statements are true?

- Modifying the number of enabled OCPU cores requires database downtime.
- The setting of database parameter CPU_COUNT is affected by modifying the number of OCPU cores.

Oracle Cloud Database Services

30. You can manage and monitor performance of an autonomous database running on autonomous Exadata Cloud@Customer using the Performance Hub.

Which two actions can be undertaken by Performance Hub?

(Choose all correct answers)

- View ASH Analytics
- Kill a running SQL session

Create, manage and use Heatwave

52. You want to permanently delete the DB System and its attached Heatwave cluster. Which action should you perform?

Delete the DB system and it will also delete the attached HeatWave Cluster.

Explain monitoring options with Exadata Cloud Service

24. Which tool can be used to monitor a storage server in Exadata Cloud Service?

exacdi

Configure Maximum Availability Architecture (OIAA) and Data Guard for Exadata Cloud Service

13. In Exadata Cloud Service, you use Oracle Data Guard for disaster recovery. What is the minimum egress requirement needed to enable Data Guard between Exadata Cloud Services?

BONUS!!! 免費下載PDFExamDumps 1z0-1093-25考試題庫的完整版: <https://drive.google.com/open?id=1mfmPmPyFPWAPhZjjSmY7YRxFW46EEU5>

在PDFExamDumps的幫助下,你不需要花費大量的金錢參加相關的補習班或者花費很多時間和精力來復習相關知識就可以輕鬆通過考試。Oracle 1z0-1093-25考試軟體是PDFExamDumps研究過去的真實的考題開發出來的。PDFExamDumps提供的Oracle 1z0-1093-25考試練習題和答案和真實的考試練習題和答案有很大的相似性。

Oracle 1z0-1093-25 考試大綱:

主題	簡介
主題 1	Base Database Service - VM (BaseDB): This section of the exam measures the skills of a Cloud Database Administrator and covers the foundational elements of Oracle's Base Database Service. It includes understanding what the BaseDB service is, how to provision and manage it, and lifecycle operations such as backups, recovery, patching, and upgrades. It also tests familiarity with monitoring and management interfaces used to control and observe the BaseDB environment.
主題 2	NoSQL Database Service Technical Overview: This section of the exam measures the skills of a NoSQL Developer and explores Oracle's NoSQL Database Service. It includes understanding the basics of NoSQL architecture, handling table-level security, rate limiting, and data modeling. It also covers concepts like provisioned throughput and the usage of language SDKs for interacting with NoSQL services on Oracle Cloud.

主題 3	MySQL HeatWave Technical Overview: This section of the exam measures the skills of a MySQL Cloud Specialist and introduces MySQL HeatWave, Oracle's high-performance analytics engine for MySQL. It includes provisioning, migrating existing MySQL databases to HeatWave, and working with its analytical and machine-learning capabilities. It also covers day-to-day operational activities within the MySQL HeatWave environment.
主題 4	Oracle Cloud Infrastructure Database Management Service: This section of the exam measures the skills of a Cloud Operations Analyst and provides insight into Oracle's Database Management Service on OCI. It focuses on enabling the service for databases, monitoring their performance, and performing diagnostic and tuning activities. It also covers tasks related to the administration of databases running on Oracle Cloud Infrastructure.
主題 5	Exadata Database Service (ExaDB): This section of the exam measures the skills of a Database Infrastructure Engineer and focuses on the advanced Exadata Database Service. It includes the provisioning of Exadata systems, management of Exadata Cloud Infrastructure, and VM Cluster administration. It also evaluates knowledge of lifecycle management tasks and how to interact with various Exadata management utilities and interfaces.

1z0-1093-25 認證，1z0-1093-25 題庫最新資訊

Oracle 的 1z0-1093-25 考試認證是屬於那些熱門的 IT 認證，也是雄心勃勃的 IT 專業人士的梦想，這部分考生需要做好充分的準備，讓他們在 1z0-1093-25 考試中獲得最高分，使自己的配置檔相容市場需求。

最新的 Oracle Cloud 1z0-1093-25 免費考試真題 (Q20-Q25):

問題 #20

What role does the Exadata Storage Server Software play within the Exadata Database Service architecture?

- A. It acts as a load balancer distributing connections across the database instances.
- B. It provides intelligent storage capabilities, including data filtering, compression, and encryption.
- C. It provides the operating system and management software for the database servers.
- D. It manages the virtual machines hosting the database instances.

答案：B

解題說明：

C: Intelligent Storage Capabilities:

* The Exadata Storage Server Software enhances data processing at the storage layer.

* Key features include:

* Smart Scan: Offloads SQL processing to storage.

* Compression: Reduces data size and improves I/O efficiency.

* Encryption: Protects data at rest.

* This software significantly boosts database performance by reducing data transfer to the compute nodes.

Why the other options are incorrect:

* A. VM management: Handled by OCI infrastructure.

* B. OS and management software: Not related to Exadata Storage Server Software.

* D. Load balancing: Handled by Oracle RAC or OCI load balancers.

問題 #21

Which characteristic is MOST indicative of an Oracle Cloud Infrastructure (OCI) Base Database Service (BaseDB) virtual machine (VM) deployment compared to using Autonomous Database?

- A. Shared Exadata infrastructure with other tenants for cost optimization.
- B. Direct control over the operating system and database configuration.

- C. Automated patching and upgrades handled by Oracle.
- D. Automatic scaling of compute and storage resources based on workload demands.

答案： B

解題說明：

Direct Control in BaseDB VM:

In a BaseDB VM deployment, users have root-level access to the operating system and can directly manage the database configuration. This contrasts with Autonomous Database, where Oracle handles most administrative tasks, including patching and resource scaling.

* BaseDB VM offers flexibility for custom configurations and control over OS-level operations.

* This is particularly useful for environments requiring custom scripts, configurations, or database tuning.

Why the other options are incorrect:

* A: Autonomous Database features automatic patching, not BaseDB VM.

* B: Exadata infrastructure is typically associated with Autonomous Database rather than VM-based BaseDB.

* D: Automatic scaling is a feature of Autonomous Database, not BaseDB.

問題 #22

In a column-family NoSQL database, what is the purpose of a "super column"?

- A. To store large binary objects (BLOBs).
- B. To group related columns together, providing a level of hierarchy within the column family.
- C. To define the primary key for the entire database.
- D. To represent a single value associated with a row key.

答案： B

解題說明：

Super Columns in Column-Family Databases:

A super column is a higher-level construct used in column-family NoSQL databases (like Apache Cassandra).

It groups related columns together under a single name, forming a two-level hierarchy within a column family.

* This structure is useful when storing data that naturally fits an nested or hierarchical format.

* For example, a user profile might contain super columns like "Address" (with sub-columns like "Street", "City", "ZIP") and "Contacts" (with sub-columns like "Phone", "Email").

Why the other options are incorrect:

* A: A regular column represents a single value associated with a row key.

* C: Primary keys are defined at the row level, not using super columns.

* D: While BLOBs can be stored, the primary role of a super column is to group related columns, not store binary data.

問題 #23

Which of the following actions would typically require the highest level of IAM permissions on a NoSQL table within Oracle NoSQL Database Cloud Service?

- A. Performing a simple read operation on a single row.
- B. Inserting a new row into the table.
- C. Updating an existing row in the table.
- D. Dropping the entire table.

答案： D

解題說明：

D: Dropping the entire table:

* Deleting a table is a destructive operation that permanently removes the data.

* Requires the highest level of permissions due to the potential for data loss and disruption.

* Usually restricted to administrators or highly privileged users.

Why the other options are incorrect:

* A. Simple read operation: Basic permission, often granted to most users.

* B. Inserting a row: Requires write permissions, but not as critical as table deletion.

* C. Updating a row: Similar to insertion, modifies existing data but does not destroy the table.

問題 #24

Which of the following statements accurately describes the recommended procedure for patching Grid Infrastructure in a BaseDB VM system where the database is NOT managed by Oracle Cloud Infrastructure (OCI)?

- A. Apply the Grid Infrastructure patch first, then apply the database patch, after validating the GI is working correctly.
- B. You cannot manually patch Grid Infrastructure in a BaseDB VM system; Oracle Cloud Infrastructure manages all patching operations.
- C. Apply the database patch first, then apply the Grid Infrastructure patch to ensure compatibility.
- D. Apply the Grid Infrastructure patch directly to the DB system. OCI handles the patching order for all components automatically.

答案： A

解題說明：

Recommended Patching Order:

In Oracle environments, it is crucial to patch Grid Infrastructure (GI) first because GI components are responsible for managing cluster resources and storage. Applying GI patches before database patches ensures that the underlying infrastructure is compatible and stable.

* After the GI patching, validate the environment to ensure all components are functioning correctly before proceeding with database software updates.

* This order minimizes the risk of downtime or compatibility issues.

Why the other options are incorrect:

* A: OCI does not automatically handle manual patching in non-managed DB systems.

* B: Applying the database patch first may result in compatibility problems.

* D: Users can manually patch Grid Infrastructure in BaseDB VMs.

問題 #25

.....

隨著 1z0-1093-25 考試的變化，PDFExamDumps 已經跟新了考試問題和答案，包括一些新增的問題，通過使用更新版本的 Oracle 1z0-1093-25 考古題，您可以輕鬆快速的通過考試，還節約寶貴的時間。獲得 1z0-1093-25 認證之後，您的職業生涯也將開始新的輝煌時期。購買我們的 Oracle 1z0-1093-25 題庫資料可以保證考生一次性通過考試，這是值得大家信賴的題庫網站，可以幫大家減少考試成本，節約時間，是上班族需要獲取 1z0-1093-25 認證的最佳選擇。
