ISTQB (ISTQB CTAL-TA) ISTQB Certified Tester Advanced Level - Test Analyst (Syllabus 2012) Sample Questions (Q93-Q98):

NEW QUESTION # 93
Which of the following testing objectives would NOT be in focus for the Test Analyst during installability testing?

- A. Testing that different configurations of the software can be successfully installed
- B. Testing the functional correctness of installation and de-installation procedures.
- C. Identifying usability issues in installation and de-installation procedures
- D. Testing whether a given application can function correctly in all intended target environments.

Answer: D

Explanation:
The testing objective that would not be in focus for the Test Analyst during installability testing is testing whether a given application can function correctly in all intended target environments. This objective belongs to portability testing, which is a test type that evaluates the degree to which a system or component can be transferred effectively and efficiently from one hardware, software, or other operational or usage environment to another. Installability testing is a test type that evaluates how easily a system or component can be installed and/or uninstalled. Verified References: [ISTQB Certified Tester Advanced Level Test Analyst CTAL-TA], Section 5.4.1, page 69.

NEW QUESTION # 94
The following document has been produced as part of the replacement of an internal Customer Relationship Management (CRM) application. The replacement application should not differ from the current CRM application, and the documentation reflects this aspiration, with seven specific requirements listed.
Document:New CRM Overview-20nn-1 A
* CRM Replacement
* Author:Andrew Smith
* Date:26-01-20nn
* Version:0.04
The following are individual requirements:
* There are no new screens in the replacement CRM application
* The screen layouts match the existing CRM application
* Screen navigation conforms to the internal company standards
* Data will be displayed within 4 seconds
* Screen US002B layout is amended to introduce the ability to populate a new data item for Financial Conduct Authority registration number (optional field - to be reported from the start of the next tax year). This is a numeric item, unique to any company.
* Security access will be controlled by SSO (Single Sign-On) from the users' network logon
* Users without authorized access will not see any CRM screen
The requirements will be reviewed using a standard checklist:
a. Requirements should be testable
b. Each requirement should be consistent with other requirements
c. Each requirement should be unambiguous
d. Each requirement should have a unique identifier
e. Documents should be versioned, dated, and the author specified
Which checklist items would identify issues in this requirements document?
SELECT ONE OPTION:

- A. b, e
- B. a, c
- C. b, d
- D. d, e

Answer: D

Explanation:
Comprehensive and Detailed In-Depth Explanation:
* b)Consistency is checked and seems fine as no conflicting requirements are stated.
* d)Correct. The requirements listed are not uniquely identified, which can cause confusion during testing.
* e)Correct. The document has a version number, date, and author specified, so this is met.
* a)The requirements are generally testable.
* c)The requirements are generally clear and unambiguous.
Therefore, the correct answer isB (d, e).

NEW QUESTION # 95
Supercar.
Supercar is an online vehicle sales website specializing in a single manufacturer's Sports Utility Vehicles (SUVs) and saloons A vehicle has two key elements, power unit and body style The manufacturer offers three choices of power unit: petrol, electric and hybrid There are 3 main body styles Saloon, Hatchback and SUV.
SUVs are available only as petrol and electric options. Hybrid is available for Hatchback only The website will allow an order to be processed if the chosen vehicle configuration is in stock, otherwise a message will be displayed asking the user to Cry again later.
Based on the specification, the following classification tree has been developed:

Based on the Supercar classification tree, the following set of test cases has been created:

Test case	Power Unit	Body Style
1	Petrol	SUV
2	Electric	Saloon
3	Petrol	Hatchback
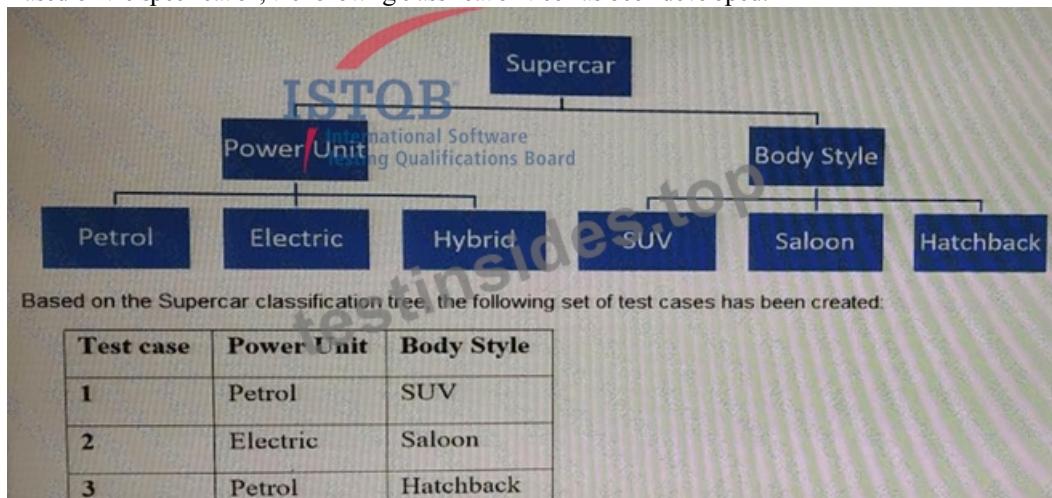

Which test case is needed to complete the test set and achieve minimum class coverage?

- A. Power Unit: Electric Body Style: Hatchback
- B. Power Unit: Petrol Body Style: Saloon
- C. Power Unit: Hybrid Body Style: Saloon
- D. Power Unit Hybrid Body Style: Hatchback

Answer: D

Explanation:
The test case D is needed to complete the test set and achieve minimum class coverage, based on the classification tree. A classification tree is a technique that shows thecombinations of inputs and outputs for a given scenario using a graphical representation of classes and subclasses. Minimum class coverage is achieved when at least one representative of each class is tested. The classes for this scenario are:
* Power Unit: Petrol, Electric, Hybrid
* Body Style: Saloon, Hatchback, SUV
The test case D covers the class Power Unit Hybrid and the class Body Style Hatchback, which are not covered by any other test case. Verified References: [ISTQB Certified Tester Advanced Level Test Analyst CTAL-TA], Section 3.5.1, page 41.

NEW QUESTION # 96

You are a Test Analyst in the banking domain. You have received the following requirement: "The system shall allow cash advances of at least 200 Euros for all supported credit cards. The following credit cards are supported: American Express, Diners, Visa, Mastercard and Eurocard.

Which one of the findings described below is true regarding this requirement?

- A. The requirement is unclear in terms of advance limits.
- B. The requirement indicates potential usability problems
- C. The requirement is ambiguous in terms of supported cards.
- D. The requirement indicates potential performance problems.

Answer: A

Explanation:
The finding that is true regarding this requirement is that it is unclear in terms of advance limits. The requirement states that the system shall allow cash advances of at least 200 Euros, but it does not specify what is the maximum amount or if there are any other restrictions or conditions for the cash advances. This makes the requirement ambiguous and incomplete, as it does not provide enough information for testing or implementation. Verified References: [ISTQB Certified Tester Advanced Level Test Analyst CTAL-TA], Section 2.3.1, page 23.

NEW QUESTION # 97

You work for a company that is a pioneer in smart energy technology. The company is planning to launch a new application for smartphones and tablets that will allow customers to view their energy readings remotely. The application must support customers with disabilities.

The application is being delivered using a hybrid mix of agile and V-model methodologies over three iterations:
* Iteration 1:Development of the application for the iOS operating system
* Iteration 2:Enhancement to support the Android operating system
* Iteration 3:Enhancement to provide daily budget usage

You have been asked to review the risk register and design test conditions for the highest priority product risks that fall into your area of responsibility, relating to Iterations 1 and 2 only.

Risk ID	Description	Impact	Likelihood
R01	The application may prove difficult to use for those who are visually impaired	Medium	Low
R02	The daily energy budget usage may not be accurately calculated from seasonal historic data	High	High
R03	The application may be incorrectly installed on some iOS and Android devices and operating systems	High	Medium
R04	Insufficient time to test the application on all supported iOS and Android devices and OS	Medium	Medium

SELECT ONE OPTION

- A. R02
- B. R01
- C. R04
- D. R03

Answer: D

Explanation:
Comprehensive and Detailed in Depth Explanation:
Since the question focuses onIterations 1 and 2 only, we must prioritize risks related to these iterations.
* R01(Accessibility): Low likelihood, medium impact - not a priority for initial iterations.
* R02(Budget calculation): Related to Iteration 3, so it isnot relevantto the current test design.
* R03(Installation issues on iOS and Android): High impact, medium likelihood -relevantfor both Iterations 1 and 2. Installation is crucial for ensuring the application works on both platforms.
* R04(Insufficient testing time): Medium impact and likelihood - important, but R03 is more critical.
Hence, the highest priority risk to address first isR03 (The application may be incorrectly installed on some iOS and Android devices).
