## Latest 712-50 Braindumps Free - 712-50 Practice Engine

DumpsMaterials has formulated 712-50 PDF questions for the convenience of EC-COUNCIL 712-50 test takers. This format follows the content of the EC-COUNCIL 712-50 examination. You can read EC-COUNCIL 712-50 Exam Questions without the limitations of time and place. There is also a feature to print out EC-COUNCIL 712-50 exam questions.

## EC-COUNCIL EC-Council Certified CISO (CCISO) Sample Questions (Q353-Q358):

### NEW QUESTION # 353

Scenario: Your company has many encrypted telecommunications links for their world-wide operations. Physically distributing symmetric keys to all locations has proven to be administratively burdensome, but symmetric keys are preferred to other alternatives. How can you reduce the administrative burden of distributing symmetric keys for your employer?

- A. Symmetrically encrypt the key and then use asymmetric encryption to unencrypt it
- B. Use certificate authority to distribute private keys
- C. Use asymmetric encryption for the automated distribution of the symmetric key
- D. Use a self-generated key on both ends to eliminate the need for distribution

Answer: C

### NEW QUESTION # 354

Control Objectives for Information and Related Technology (COBIT) is which of the following?

- **A. A framework for Information Technology management and governance**
- B. An audit guideline for certifying secure systems and controls
- C. A set of international regulations for Information Technology governance
- D. An Information Security audit standard

**Answer: A**

Explanation:

COBIT (Control Objectives for Information and Related Technology) is recognized as a comprehensive framework developed by ISACA (Information Systems Audit and Control Association). It is specifically designed to provide guidance on the governance and management of enterprise IT.

\* Definition and Purpose: COBIT is a framework that aligns IT operations with business objectives to achieve governance and management goals. It provides a structured approach to ensure that IT investments add value to the organization while managing associated risks.

\* Framework Components: COBIT consists of principles, enablers, and tools that guide IT processes, ensuring alignment with enterprise governance requirements.

\* Alignment with Business Objectives: COBIT integrates IT operations with the broader goals of the organization. It emphasizes the importance of IT governance, risk management, and value creation to meet organizational objectives.

\* Standards and Best Practices: Unlike audit standards or international regulations, COBIT provides a best-practice-based approach for IT governance and management rather than compliance-specific guidance.

\* EC-Council CISO Curriculum: EC-Council's CISO program discusses COBIT as a critical framework for managing IT governance. It emphasizes COBIT's role in strategic alignment, performance measurement, resource management, risk management, and value delivery within an enterprise.

\* Clarification of Incorrect Options:

\* Option A: COBIT is not solely an information security audit standard; it encompasses broader IT governance and management.

\* Option B: It is not limited to an audit guideline for certifying secure systems.

\* Option D: While it is recognized globally, it is not a set of international regulations but rather a framework for governance and management.

References from EC-Council CISO Materials: The CISO program underscores COBIT's application in IT governance, risk, and compliance as a best-practice framework essential for aligning IT with organizational goals. Specific training sections elaborate on leveraging COBIT for achieving compliance and strategic IT integration.

### NEW QUESTION # 355

Physical security measures typically include which of the following components?

- A. Technical, Strong Password, Operational
- B. Strong password, Biometric, Common Access Card
- **C. Physical, Technical, Operational**
- D. Operational, Biometric, Physical

**Answer: C**

### NEW QUESTION # 356

Scenario: Your organization employs single sign-on (user name and password only) as a convenience to your employees to access organizational systems and data. Permission to individual systems and databases is vetted and approved through supervisors and data owners to ensure that only approved personnel can use particular applications or retrieve information. All employees have access to their own human resource information, including the ability to change their bank routing and account information and other personal details through the Employee Self-Service application. All employees have access to the organizational VPN. Recently, members of your organization have been targeted through a number of sophisticated phishing attempts and have compromised their system credentials. What action can you take to prevent the misuse of compromised credentials to change bank account information from outside your organization while still allowing employees to manage their bank information?

- **A. Block access to the Employee-Self Service application via VPN**
- B. Turn off VPN access for users originating from outside the country
- C. Enable monitoring on the VPN for suspicious activity
- D. Force a change of all passwords

**Answer: A**

#### NEW QUESTION # 357

As the CISO you need to write the IT security strategic plan. Which of the following is the MOST important to review before you start writing the plan?

- A. The existing IT environment.
- B. Other corporate technology trends.
- C. The present IT budget.
- **D. The company business plan.**

**Answer: D**

#### NEW QUESTION # 358

.....
