## Valid Salesforce-Data-Cloud Actual Braindumps – The Best Practice Online for Salesforce-Data-Cloud: Salesforce Data Cloud Accredited Professional Exam

If you want to get a comprehensive idea about our real Salesforce-Data-Cloud study materials. It is convenient for you to download the free demo, all you need to do is just to find the “Download for free” item, and you will find there are three kinds of versions of Salesforce-Data-Cloud learning guide for you to choose from namely, PDF Version Demo, PC Test Engine and Online Test Engine, you can choose to download any one version of our Salesforce-Data-Cloud exam questions as you like.

## Salesforce Data Cloud Accredited Professional Exam Sample Questions (Q155-Q160):

### NEW QUESTION # 155

Cloud Kicks plans to do a full deletion of one of its existing data streams and its underlying data lake object (DLO). What should the consultant consider before deleting the data stream?

- A. The underlying DLO can be used in a data transform
- B. The data stream must be associated with a data kit.
- C. The data stream can be deleted without implicitly deleting the underlying DLO.
- D. The underlying DLO cannot be mapped to a data model object.

**Answer: A**

Explanation:

Data Streams and DLOs: In Salesforce Data Cloud, data streams are used to ingest data, which is then stored in Data Lake Objects (DLOs).

Deletion Considerations: Before deleting a data stream, it's crucial to consider the dependencies and usage of the underlying DLO.

Data Transform Usage:

Impact of Deletion: If the underlying DLO is used in a data transform, deleting the data stream will affect any transforms relying on that DLO.

Dependency Check: Ensure that the DLO is not part of any active data transformations or processes that could be disrupted by its deletion.

**NEW QUESTION # 156**

Which data sources are available from Marketing Cloud as a starter bundle?

- A. Email, Mobile Connect, and Einstein Engagement Scoring
- B. Email, MobileConnect, MobilePush and GroupConnect
- **C. Email, MobileConnect and MobilePush**
- D. Email, Cloud Pages, Einstein Web & Email Recommendations

**Answer: C**

Explanation:

These data sources are available from Marketing Cloud as a starter bundle. They provide basic contact data, such as email address, mobile number, and device ID, as well as engagement data, such as email opens, clicks, bounces, unsubscribes, SMS sends, deliveries, opt-outs, and push sends, opens, and opt-outs. **NEW QUESTION # 157**

Which operator can be used to create a segment for a birthday campaign that is evaluated daily?

- A. Is Between
- B. Is This Year
- **C. Is Anniversary Of**
- D. Is Birthday

**Answer: C**

Explanation:

This operator can be used to create a segment for a birthday campaign that is evaluated daily. It compares a date attribute to the current date and returns true if they have the same month and day, regardless of the year.

**NEW QUESTION # 158**

Every day, Northern Trail Outfitters (NTO) uploads a summary of the last 24 hours of store transactions to a new file in an Amazon S3 bucket, and files older than 7 days are automatically deleted. Each file contains a timestamp in a standardized naming convention. What should a consultant consider when ingesting this data stream?

- A. Advise NTO to change their processes: this configuration is not supported
- B. Ensure the refresh mode is set to "Full Refresh" and the filename contains a wildcard to accommodate the timestamp
- **C. Ensure the refresh mode is set to "Upsert" and Refresh only new files" is selected**
- D. Ensure the refresh mode is set to "Full Refresh" and "Refresh only new files" is selected

**Answer: C**

#### Explanation:

This configuration will ensure that Data Cloud only ingests new files from the Amazon S3 bucket and updates or inserts new records into the data stream without deleting existing records. Reference: [https://help.salesforce.com/s/articleView?id=sf.c360\\_a\\_data\\_cloud\\_amazon\\_s3.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.c360_a_data_cloud_amazon_s3.htm&type=5)

#### NEW QUESTION # 159

A retail customer wants to bring customer data from different sources and wants to take advantage of identity resolution so that it can be used in segmentation.

On which entity should this be segmented for activation membership?

- A. Subscriber
- B. **Unified Individual**
- C. Unified Contact
- D. Individual

#### Answer: B

#### Explanation:

The correct answer is B, Unified Individual. A Unified Individual is a record that represents a customer across different data sources, created by applying identity resolution rulesets. Identity resolution rulesets are sets of match and reconciliation rules that define how to link and merge data from different sources based on common attributes. Data Cloud uses identity resolution rulesets to resolve data across multiple data sources and helps you create one record for each customer, regardless of where the data came from. A retail customer who wants to bring customer data from different sources and use identity resolution for segmentation should segment on the Unified Individual entity, which contains the resolved and consolidated customer data. The other options are incorrect because they do not represent the resolved customer data across different sources. A Subscriber is a record that represents a customer who has opted in to receive marketing communications. A Unified Contact is a record that represents a customer who has a relationship with a specific business unit. An Individual is a record that represents a customer's profile data from a single data source. References:
