Administrator & C_SEC_2405 Best Questions

Improvement in C_SEC_2405 science and technology creates unassailable power in the future construction and progress of society. C_SEC_2405 practice test can be your optimum selection and useful tool to deal with the urgent challenge. With over a decade's striving, our C_SEC_2405 training materials have become the most widely-lauded and much-anticipated products in industry. We have full technical support from our professional elites in planning and designing C_SEC_2405 Practice Test. Do not hesitate anymore. You will never regret buying C_SEC_2405 study engine!

SAP Certified Associate - Security Administrator Sample Questions (Q11-Q16):

NEW QUESTION # 11

Where can you find information on the SAP-delivered default authorization object and value assignments?

Note: There are 2 correct answers to this question.

- A. SU24
- B. USOBT
- C. SU22
- D. USOBT_C

Answer: B,C

Explanation:

Information on SAP-delivered default authorization objects and their value assignments can be found in transaction SU22 and table USOBT. Transaction SU22 is used to maintain and view SAP default authorization data, including authorization objects and their proposed values for transactions, as provided by SAP. The table USOBT (Authorization Object Defaults) stores these default assignments, detailing the authorization objects linked to transactions and their standard values. In contrast, USOBT_C is a customer-specific table for customized authorization data, and SU24 is used for maintaining customer-specific authorization proposals, not SAP-delivered defaults. These tools and tables ensure administrators can access and understand SAP's standard authorization configurations for secure system setup.

NEW QUESTION # 12

What must you do before you can use transaction PFCG? Note: There are 2 correct answers to this question.

- A. Set the system profile parameter auth/no_check_in_some_cases to N.
- B. Set the system profile parameter auth/no_check_in_some_cases to Y.
- C. Fill tables USOBT_C and USOBX_C with the SAP-delivered authorization default values.
- D. Fill tables USOBT and USOBX with the SAP-delivered authorization default values.

Answer: B,D

Explanation:

* Context: Before using transaction PFCG for role maintenance, initial setup steps must be completed to ensure proper system behavior.

* Solution Descriptions:

* A: USOBT and USOBX tables must be filled with SAP-delivered default values to enable role generation.

* B: The auth/no_check_in_some_cases parameter controls bypass scenarios and must be set to "Y" during the setup phase.

SAP Security References:

* SAP Role Generation Process Documentation

* SAP Profile Parameter Settings Guide

NEW QUESTION # 13

If you want to evaluate catalog menu entries and authorization default values of IWSG and IWSV applications, which SUIM reports would you use? Note: There are 2 correct answers to this question.

- A. Roles By Transaction Assignment in Menu
- B. Roles By Authorization Object
- C. Search Applications in Roles

- D. Search Startable Applications in Roles

Answer: C,D

NEW QUESTION # 14

Which of the following functions within SAP GRC Access Control support access certification and review?

Note: There are 2 correct answers to the question.

- A. GO
- B. Role Review
- C. Review CI User Reaffirm
- D. Role Ream

Answer: B,C

NEW QUESTION # 15

Which cloud-based SAP solution helps organizations control their data across various cloud platforms and on-premise data sources?

- A. SAP Data Custodian
- B. SAP Privacy Governance
- C. SAP Identity Access Governance
- D. SAP Information Steward

Answer: A

Explanation:

SAP Data Custodian is the cloud-based SAP solution designed to help organizations control their data across various cloud platforms and on-premise data sources. It provides a centralized framework for data governance, enabling organizations to monitor, manage, and secure data throughout its lifecycle, regardless of where it resides. SAP Data Custodian ensures compliance with data protection regulations by offering tools for data discovery, classification, and access control, making it ideal for hybrid environments. In contrast, SAP Identity Access Governance focuses on managing user access and permissions, SAP Information Steward is used for data quality and profiling, and SAP Privacy Governance addresses privacy compliance.

SAP Data Custodian's unique capability to unify data control across diverse platforms makes it the correct choice for comprehensive data management and security.

NEW QUESTION # 16

.....
