Vce HP HPE7-A01 Test Simulator, HPE7-A01 Study Guide Pdf

Our HPE7-A01 study guide and training materials of ActualPDF are summarized by experienced IT experts, who combine the

HPE7-A01 original questions and real answers. Due to our professional team, the passing rate of HPE7-A01 test of our ActualPDF is the highest in the HPE7-A01 exam training. So, choosing ActualPDF, choosing success.

HP Aruba Certified Campus Access Professional Exam Sample Questions (Q126-Q131):

NEW QUESTION # 126

What is the best practice for handling voice traffic with dynamic segmentation on AOS-CX switches?

- A. Central authentication and port-based tunneling of the voice traffic.
- B. Switch authentication and user-based tunneling of the voice traffic.
- C. Controller authentication and port-based tunneling of all traffic
- D. Switch authentication and local forwarding of the voice traffic

Answer: D

Explanation:

This is the best practice for handling voice traffic with dynamic segmentation on AOS-CX switches. Dynamic segmentation is a feature that allows AOS-CX switches to tunnel user traffic to a controller or another switch based on user roles and policies. For voice traffic, it is recommended to use switch authentication and local forwarding, which means the voice devices are authenticated by the switch and their traffic is forwarded locally without tunneling. This reduces latency and jitter for voice traffic and improves voice quality. The other options are incorrect because they either use central authentication or tunneling, which are not optimal for voice traffic. Reference: <https://www.arubanetworks.com/techdocs/AOS-CX/10.04/HTML/5200-6728/bk01-ch05.html>

NEW QUESTION # 127

Match the appropriate QoS concept with its definition. (Options may be used more than once or not at all.)

	Answer Area	
Best Effort Service		A method for classifying network traffic at layer-2 by marking 802.1Q VLAN Ethernet frames with one of eight service classes
Differentiated Services		A method for classifying network traffic at layer-3 by marking packets with one of 64 different service classes
Class of Service		A method where traffic is treated equally in a first-come, first-served manner
WMM		A method for classifying network traffic using access categories based on the IEEE 802.11e QoS standard

Answer:

Explanation:

	Answer Area	
Best Effort Service	Best Effort Service	A method for classifying network traffic at layer-2 by marking 802.1Q VLAN Ethernet frames with one of eight service classes
Differentiated Services	Differentiated Services	A method for classifying network traffic at layer-3 by marking packets with one of 64 different service classes
Class of Service	Class of Service	A method where traffic is treated equally in a first-come, first-served manner
WMM	WMM	A method for classifying network traffic using access categories based on the IEEE 802.11e QoS standard

Explanation:

QoS concept: Class of Service Definition: 3) A method for classifying network traffic using access categories based on the IEEE 802.11e QoS standards QoS concept: Differentiated services Definition: 2) A method for classifying network traffic at layer-3 or marking packets with one of 64 different service classes QoS concept: WMM Definition: 4) A method for classifying network traffic using access categories based on the IEEE 802.11e QoS standards

NEW QUESTION # 128

Match the topics of an AOS10 Tunnelled mode setup between an AP and a Gateway. (Options may be used more than once or not at all.)

	Answer Area	
Authenticator		Access Point
Negotiate IPsec Phase1		Access Point and Gateway
Negotiate IPsec Phase 2		Device Designated Gateway
RADIUS proxy		Overlay Tunnel Orchestrator

Answer:

Explanation:

	Answer Area	
Authenticator	Negotiate IPsec Phase1	Access Point
Negotiate IPsec Phase1	Negotiate IPsec Phase 2	Access Point and Gateway
Negotiate IPsec Phase 2	Authenticator	Device Designated Gateway
RADIUS proxy	RADIUS proxy	Overlay Tunnel Orchestrator

NEW QUESTION # 129

Which feature allows the device to remain operational when a remote link failure occurs between a Gateway cluster and a RADIUS server that is either in the cloud or a datacenter?

- A. Opportunistic key caching
- B. MAC caching
- C. MAC Authentication
- D. Authentication survivability

Answer: D

Explanation:

Authentication survivability is a feature that allows the device to remain operational when a remote link failure occurs between a Gateway cluster and a RADIUS server that is either in the cloud or a datacenter. Authentication survivability enables the Gateway cluster to cache successful authentication requests from the RADIUS server and use them to authenticate clients when the RADIUS server is unreachable. Authentication survivability also allows clients to use MAC caching or MAC authentication bypass (MAB) methods to access the network when the RADIUS server is down. Reference:

https://www.arubanetworks.com/assets/tg/TG_AuthSurvivability.pdf

NEW QUESTION # 130

A customer is concerned about unprotected traffic between an AOS-CX switch and a gateway, running on AOSvO. What is a feasible option to protect this traffic?

- A. Implement a GRE tunnel to protect PAPI between the AOS-CX switches and the gateway
- B. Implement an MD5 HMAC function to protect PAPI between the AOS-CX switches and the gateway
- C. Implement an IPSec tunnel to protect PAPI between the AOS-CX switches and the gateway
- D. no action is needed, an RSA certificate already encrypts the traffic

Answer: C

Explanation:

According to the Aruba Documentation Portal¹, PAPI (Port Aggregation Protocol) is a protocol that allows multiple physical ports to be aggregated into a single logical port for increased bandwidth and performance. PAPI can be used between AOS-CX switches and gateways, or between AOS-CX switches and other devices.

Option A: Implement an IPSec tunnel to protect PAPI between the AOS-CX switches and the gateway This is because option A shows how to implement an IPSec tunnel between two devices using the interface command and the ipsec command. An IPSec tunnel can provide encryption and authentication for PAPI traffic between two devices, such as an AOS-CX switch and a gateway.

NEW QUESTION # 131

.....

This is an era of high efficiency, and how to prove your competitiveness, perhaps only through the HPE7-A01 certificates you get is the most straightforward. But the time is limited for many people since you may be caught with other affairs. With our HPE7-A01 study materials, all your problems will be solved easily without doubt. We can provide not only the trustable and valid HPE7-A01 Exam Torrent but also the most flexible study methods. And we can confirm that you are bound to pass your HPE7-A01 exam just as numerous of our other customers do.

Vce HPE7-A01 Test Simulator: https://www.actualpdf.com/HPE7-A01_exam-dumps.html

If you are unfamiliar with our HPE7-A01 study materials, please download the free demos for your reference, and to some unlearned exam candidates, you can master necessities by our HP practice materials quickly, The HPE7-A01 training materials provide you with free demo, and you can have a try in our website, HP Exam Sample HPE7-A01 Online Answer: We are sorry that we can not answer all the calls due to the high workload.

Executing Text-Based Select Commands Using a Data Reader Object, Using Antennas to Focus Power and Reduce Interference, If you are unfamiliar with our HPE7-A01 Study Materials, please download the free demos for your reference, HPE7-A01 and to some unlearned exam candidates, you can master necessities by our HP practice materials quickly.

100% Pass 2026 HP Latest HPE7-A01: Exam Sample Aruba Certified Campus Access Professional Exam Online

The HPE7-A01 training materials provide you with free demo, and you can have a try in our website, Answer: We are sorry that we can not answer all the calls due to the high workload.

Provides you the best and most reliable information, Undergoing years of corrections and amendments, our HPE7-A01 exam questions have already become perfect.
