Oracle GoldenGate 19c Implementation Professional Sample Questions (Q79-Q84):

NEW QUESTION # 79

Which mechanism is used by Extract to ensure that data integrity and fault tolerance are maintained in the data source and trail?

- A. Commit sequence order
- B. Checkpoints
- C. Manager process
- D. Logical change records

Answer: B

NEW QUESTION # 80

You want to use coordinated Replicat mode instead of classic mode. Which three reasons should you consider for this?

- A. Replicat is multi-threaded in coordinated mode.
- B. Coordinated Replicat allows for user-defined partitioning of the workload so as to apply high-volume transactions concurrently.
- C. Only one parameter file is required for a coordinated Replicat, regardless of the number of threads.
- D. Multiple transactions on the target are executed with full synchronization.
- E. Parent and child tables must not be processed by the same apply thread.

Answer: A,B,C

NEW QUESTION # 81

Which of the following is not an initial load method in Oracle GoldenGate?

- A. SQL*Net Load
- B. File to database utility
- C. Direct load
- D. File to Replicat

Answer: A

Explanation:

File to Replicat, File to database utility, Direct load & Direct bulk load (via SQL*Loader API)

NEW QUESTION # 82

Prerequisite steps should be followed to ensure a successful Initial Load was performed. One of the steps is to "prepare target tables." What does it mean to prepare target tables?

- A. The target database must exist, and an obey file must be used to create all tables for replication before Initial Load process at target site.
- B. The target table must exist in the target database before Initial Load process at target site.
- C. The target table must exist in the target database before Initial Load process at source site.
- D. The target database must exist, and all tables for replication must exist with data already loaded into tables.

Answer: B

Explanation:

Before performing an Initial Load in Oracle GoldenGate: The structure (tables) must already be created on the target database. GoldenGate does not create target tables during Initial Load - it only copies the data. So, you must manually prepare the tables beforehand.

NEW QUESTION # 83

What is the purpose of a data pump Extract in Oracle GoldenGate?

- A. Encrypts trail files
- B. Directly applies changes to target
- C. Monitors performance metrics
- D. Reads from local trail and forwards to remote system

Answer: D

Explanation:

It allows recovery if the network or target system fails by maintaining a local trail.

NEW QUESTION # 84

.....

The passing rate of our 1Z0-947 guide materials is high as 98% to 100% and you don't need to worry that you have spent money but can't pass the test. We can't list all the advantages with several words and please read the introduction of the features and
