Our company never sets many restrictions to the FCP_FMG_AD-7.6 exam question. Once you pay for our study materials, our system will automatically send you an email which includes the installation packages. You can conserve the FCP_FMG_AD-7.6 real exam dumps after you have downloaded on your disk or documents. Whenever it is possible, you can begin your study as long as there has a computer. In addition, all installed FCP_FMG_AD-7.6 study tool can be used normally. In a sense, our FCP_FMG_AD-7.6 Real Exam dumps equal a mobile learning device. We are not just thinking about making money. Your convenience and demands also deserve our deep consideration. At the same time, your property rights never expire once you have paid for money. So the FCP_FMG_AD-7.6 study tool can be reused after you have got the FCP_FMG_AD-7.6 certificate. You can donate it to your classmates or friends. They will thank you so much.

Fortinet FCP_FMG_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Administration: This section of the exam measures the skills of System Administrators and covers the essential features of FortiManager. It includes the initial configuration process and the setup of administrative domains (ADOMs), ensuring smooth system management.
Topic 2	<ul style="list-style-type: none">• Troubleshooting
Topic 3	<ul style="list-style-type: none">• Device Manager: This section of the exam measures the skills of Network Security Engineers and focuses on registering devices within ADOMs and handling device configurations. Candidates also learn how to install changes through scripts and diagnose issues using the revision history.

FCP_FMG_AD-7.6 Valid Braindumps Ppt - How to Prepare for Fortinet FCP_FMG_AD-7.6 Efficiently and Easily

Itcerttest FCP - FortiManager 7.6 Administrator (FCP_FMG_AD-7.6) exam questions are the best because these are so realistic! It feels just like taking a real FCP_FMG_AD-7.6 exam, but without the stress! Our FCP_FMG_AD-7.6 Practice Test software is the answer if you want to score higher on your real Fortinet FCP_FMG_AD-7.6 certification exam and achieve your academic goals.

Fortinet FCP - FortiManager 7.6 Administrator Sample Questions (Q37-Q42):

NEW QUESTION # 37

Refer to the exhibit. Which two results occur if you run the script using the Device Database option? (Choose two.)

FortiManager script

The screenshot shows the 'Create New Script' window in FortiManager. The 'Type' is 'CLI Script' and 'Run script on' is 'Device Database'. The 'Validation device platform' is 'FortiGate-VM64'. The script content is as follows:

```
1 config router prefix-list
2 edit public
3 config rule
4 edit 1
5 set prefix 0.0.0.0/0
6 set action permit
7 next
8 edit 2
9 set prefix 8.8.8.8/32
10 set action deny
11 end
```

The interface also shows 'Format CLI script' and 'Revert All Changes' buttons.

- A. The administrator must install these changes on a managed device using the Install Wizard.
- B. The successful execution of a script on the Device Database creates a new revision history.
- C. The device Config Status is tagged as Modified.
- D. The script history shows the successful installation of the script on the remote FortiGate.

Answer: A,C

Explanation:

Running a script on the Device Database marks the configuration as modified but does not immediately apply changes to the device. The administrator must use the Install Wizard to push and install these changes from the Device Database onto the managed device.

NEW QUESTION # 38

Refer to the exhibit. What percent of the available RAM is being used by the process in charge of downloading the web and email filter databases from the public FortiGuard servers?

FortiManager CLI output

```
FortiManager # execute top
top - 13:08:23 up 1 day,  1:01,  0 users,  load average: 2.40, 3.19, 3.34

```

- A. 1.5
- **B. 2.9**
- C. 4.1
- D. 3.1

Answer: B

Explanation:

The fgdlinkd process on FortiManager is responsible for downloading web-filter and email-filter databases from public FortiGuard servers, providing up-to-date security threat protection.

NEW QUESTION # 39

An administrator has assigned a global policy package to a new ADOM named ADOM1. What will happen if the administrator tries to create a new policy package in ADOM1?

- A. FortiManager will automatically assign the global policy package to the new policy package.
- B. The administrator will have to assign the global policy package from the global ADOM.
- C. FortiManager will automatically install policies on the policy package in ADOM1.
- **D. The administrator will be able to select the option to assign the global policy package to the new policy package.**

Answer: D

Explanation:

When a global policy package is assigned to an ADOM, administrators creating new policy packages within that ADOM have the option to select and assign the global policy package to the new policy package if desired.

NEW QUESTION # 40

Refer to the exhibits.

FortiGate GUI—FortiGuard

Entitlement	Status

FortiGate CLI—Central management

```
HQ-NGFW-1 (central-management) # sh
config system central-management
  set type fortimanager
  set allow-push-firmware disable
  set allow-remote-firmware-upgrade disable
  set serial-number "FMG-VMFM24012945"
  set fmg "::ffff:10.0.13.120"
config server-list
  edit 1
    set server-type update
    set server-address 192.168.1.120
  next
end
set include-default-servers disable
end
```

FortiGate HQ-NGFW-1 downloads and validates FortiGuard databases from FortiManager which acts as a local FortiGuard Distribution Server (FDS) in a closed network. An administrator pushes a new firewall policy with an intrusion prevention system (IPS) profile from FortiManager to FortiGate HQ-NGFW-1. However, FortiGate does not recognize the new IPS signature from FortiManager.

What is the most likely reason why FortiGate HQ-NGFW-1 does not recognize the new IPS signature?

- A. The administrator must enable the fortiguard-anycast option to correctly download all signatures from the local FDS.
- B. FortiGate must enable rating for the FortiManager IP address, 192.168.1.120, in server list 1.
- C. The administrator must enable IPv6 connections for FortiGuard services on FortiManager.
- **D. FortiManager and FortiGate have different IPS database versions.**

Answer: D

Explanation:

The most likely reason FortiGate HQ-NGFW-1 does not recognize the new IPS signature is that FortiManager and FortiGate have different IPS database versions. The FortiManager may have pushed a signature update that FortiGate has not yet synchronized or validated locally, causing the signature to be unrecognized.

NEW QUESTION # 41

Refer to the exhibit.

FortiManager is operating behind a network address translation (NAT) device, and the administrator configured the FortiManager NATed IP address under the FortiManager system administration settings.

What is the expected result during discovery?

- A. FortiManager sets the 100.65.0.101 IP address on FortiGate.
- B. FortiManager sets both the 100.65.0.120 IP address and 100.65.0.101 IP address on FortiGate.
- C. FortiManager sets both the 100.65.0.120 IP address and 10.0.13.120 IP address on FortiGate.
- **D. FortiManager sets the 100.65.0.120 IP address on FortiGate.**

Answer: D

Explanation:

When FortiManager is behind a NAT device, setting the NATed IP address (100.65.0.120) in the system admin settings causes FortiManager to use that NATed IP address for communication and configuration with FortiGate during discovery and management operations.

NEW QUESTION # 42

.....

There are three different versions of our FCP_FMG_AD-7.6 study guide which are PDF, Software and APP online versions. For their varied advantages, our FCP_FMG_AD-7.6 learning questions have covered almost all the interests and habits of varied customers groups. No matter you are a student, a working staff, or even a house wife, you will find the exact version of your FCP_FMG_AD-7.6 Exam Materials to offer you a pleasant study experience.
