Salesforce Certified Platform App Builder Sample Questions (Q201-Q206):

NEW QUESTION # 201

Universal Containers uses a private sharing model for opportunities. This model CANNOT be changed due to a regional structure. A new sales operations team has been created. This team needs to perform analysis on Opportunity data, all should have read and write access to all Opportunities.

What are two recommended solutions for the app builder to give the users appropriate access? Choose 2 answers

- A. Create a criteria-based sharing rule to all opportunities with the sales operations public group.
- B. Add a permission set with 'View All' and 'Modify All' opportunity permissions enabled.
- C. Add a manual share for all opportunities with each user on the sales operations team.
- D. Create a criteria-based sharing rule to share all opportunities with the sales operations private group

Answer: A,B

Explanation:

Explanation

The two recommended solutions for the app builder to give the users appropriate access are creating a criteria based sharing rule to all opportunities with the sales operations public group and adding a permission set with 'View All' and 'Modify All' opportunity permissions enabled. A criteria based sharing rule can grant read and write access to all opportunities that meet certain criteria to a specified group of users. A permission set can grant additional object-level permissions to users without changing their profiles. Option B is incorrect because adding a manual share for all opportunities with each user on the sales operations team is not scalable or maintainable. Option D is incorrect because creating a criteria-based sharing rule to share all opportunities with the sales operations private group is redundant, as private groups are used to manually share records with individual users or other groups.

NEW QUESTION # 202

Universal Containers (UC) has large data volumes and is nearing data storage limits. The planned solution is to archive historical data to reduce data storage in Salesforce; however, UC would still like to use reports, queries, and lookups on the archived information. Which two options could meet this requirement?

Choose 2 answers

- A. Custom objects
- B. Big objects
- C. External objects
- D. Related objects

Answer: B,C

Explanation:

Big objects and external objects can be used to archive historical data and reduce data storage in Salesforce, while still allowing users to access the archived data using reports, queries, and lookups. Big objects store data within Salesforce, while external objects store data outside Salesforce and integrate it with Salesforce using an external data source

NEW QUESTION # 203

The marketing director is concerned that too many car parts were given away for free last year.

Which functionality should be used to ensure all free parts receive the marketing directors' sign-off?

- A. Automated email message
- B. Chatter approval
- C. Stack post
- D. Approval process

Answer: D

Explanation:

An Approval Process is the appropriate functionality to ensure all free parts receive the marketing director's sign-off. It allows for setting up a process for record approval. Reference:

Salesforce Help - Approval Processes

NEW QUESTION # 204

You need to provide a way to invoke a custom report from the account detail page. The report should render values that are specific to the account in context.

What are the best options? (Choose two.)

- A. Detail Page Button
- B. List Button
- C. Detail Page Links
- D. Visualforce

Answer: A,C

NEW QUESTION # 205

What type of field can be used to filter a report chart that has been added to page Layout?

- A. Matching ID field
- B. Formula field
- C. Standard field
- D. Name field

Answer: A

NEW QUESTION # 206
