Oracle 1z0-809 Web-Based Practice Test Software Works without Installation

Additionally, all operating systems also support this format. The third format is the desktop 1z0-809 Practice Exam software. It is ideal for users who prefer offline 1z0-809 exam practice. This format is supported by Windows computers and laptops. You can easily install this software in your system to use it anytime to prepare for the examination.

Oracle 1z1-809 certification exam also covers security topics such as encryption and decryption, secure socket layer (SSL) communication, and digital signatures. Candidates must understand how to use the Java Security API to create secure applications and be familiar with principles such as authentication, authorization, and confidentiality. Passing the Oracle 1z1-809 certification exam demonstrates a high level of proficiency in Java programming and can open up a range of career opportunities for developers.

Oracle Java SE 8 Programmer II Sample Questions (Q135-Q140):

NEW QUESTION # 135

Given the for loop construct:

```
for ( expr1 ; expr2 ; expr3 ) {
```

```
statement;  
}
```

Which two statements are true?

- A. The expression `expr3` must be present. It is evaluated after each iteration through the loop.
- **B. When `expr2` evaluates to false, the loop terminates. It is evaluated only after each iteration through the loop.**
- C. This is not the only valid for loop construct; there exists another form of for loop constructor.
- **D. The expression `expr1` is optional. it initializes the loop and is evaluated once, as the loop begin.**

Answer: B,D

Explanation:

The for statement have this forms:

```
for (init-stmt; condition; next-stmt) {  
body  
}
```

There are three clauses in the for statement.

The `init-stmt` statement is done before the loop is started, usually to initialize an iteration variable.

The condition expression is tested before each time the loop is done. The loop isn't executed if the boolean expression is false (the same as the while loop). The `next-stmt` statement is done after the body is executed. It typically increments an iteration variable.

NEW QUESTION # 136

Given:

□ And given the commands:

□ What is the result?

- A. true true
- **B. true false**
- C. false false
- D. A `ClassCastException` is thrown at runtime.
- E. TRUE null

Answer: B

NEW QUESTION # 137

Given that `data.txt` and `alldata.txt` are accessible, and the code fragment:

□ What is required at line `n1` to enable the code to overwrite `alldata.txt` with `data.txt`?

- A. `br.flush();`
- B. `bw.writeln();`
- **C. `bw.flush();`**
- D. `br.close();`

Answer: C

NEW QUESTION # 138

Given:

□ What is the result?

- A. 0
- **B. 1**
- C. Compilation fails.
- D. 2
- E. 3

Answer: B
