

Valid Exam C-THR92-2505 Braindumps - C-THR92-2505 Valid Test Duration

P.S. Free 2026 SAP C-THR92-2505 dumps are available on Google Drive shared by ActualPDF: <https://drive.google.com/open?id=1UyPz67g2YEeljbNZwInEoNQAHBlaAZmJ>

In fact, on one side, our C-THR92-2505 training braidumps can help you pass the exam and win the certification. On the othe side, i think it is even more important, that you can apply what you have learned on our C-THR92-2505 Practice Guide into practices. Your speed of finishing the task will be greatly elevated. Everting will take positive changes because of our C-THR92-2505 exam materials. Please cheer up for yourself.

SAP C-THR92-2505 Exam Syllabus Topics:

Topic	Details
Topic 1	Report Consumers: This domain evaluates the understanding of a Business User and focuses on how report consumers interact with and utilize generated reports. It highlights user roles, permissions, and effective report sharing practices to ensure reports serve decision-making needs.
Topic 2	Provisioning Settings for Reporting: This area focuses on the abilities of a System Administrator and involves configuring and enabling the necessary settings in Provisioning to support reporting tools within SAP SuccessFactors. It includes setup tasks that ensure reporting solutions function properly within the system environment.
Topic 3	Canvas Reports and Page Designer: This part measures the capabilities of a Report Administrator and involves creating and customizing reports using Canvas Reports and Page Designer. It covers advanced query construction, formatting, pivot creation, and report distribution to enhance data presentation and usability.
Topic 4	Table Reports: This part measures the skills of a Data Analyst and involves creating, managing, and running Table Reports. It focuses on designing tabular data presentations that facilitate straightforward access to detailed workforce analytics information.

They have rich experience in the SAP actual test and are good at making learning strategy for people who want to pass the C-THR92-2505 Practice Exam.

SAP Certified Associate - SAP SuccessFactors People Analytics: Reporting Sample Questions (Q70-Q75):

NEW QUESTION # 70

Why is it important to consider the People step of the report definition when you share a table report with another user?

- A. The user may NOT have the same line of sight.
- B. The user may NOT have access to the fields in the report.
- C. The user may NOT have access to the relevant report domain.
- D. The user may NOT have access to run reports.

Answer: A

Explanation:

* People Step in Report Definition:

* The People step in a report determines the population (target group) of employees included in the report.

* When you share the report, the recipient's line of sight (determined by their Role-Based Permissions) will affect their ability to view the data.

* Example Scenario:

* If the report is configured to include data for a specific department, but the user does not have permission to view data for that department, they may see limited or no data.

NEW QUESTION # 71

You have created a custom MDF object to track company car information. You need to be able to create story reports on the data of the custom MDF object. What must you do to enable a custom MDF object to be listed in the Available Data section of Query Designer?

- A. Update the Report Object Configuration Entity record for the object and set it as a root report object.
- B. Create a custom schema join using the Report Schema Join Manager tool.
- C. Create a Report Schema Configuration Entity Record.
- D. Update the Report Object Configuration Entity record for the object and associate the object with a schema.

Answer: D

Explanation:

* Scenario Analysis

* Custom MDF (Metadata Framework) objects, such as company car information, must be configured properly to appear in the Available Data section of the Query Designer.

* Solution

* Updating the Report Object Configuration Entity (ROCE) record to associate the custom MDF object with a schema ensures it is recognized in the reporting layer.

* Why Other Options are Incorrect

* A: Creating a custom schema join is not necessary to make the object available.

* C: Report Schema Configuration Entity is not applicable in this context.

* D: Setting it as a root report object is not required for inclusion in Query Designer.

NEW QUESTION # 72

You are using a pivot table in your canvas report but the report does NOT display the most recent data. What could be the reason?

- A. You are using a wrong People Scope.
- B. You are NOT using a template.
- C. You are using the percent of total option.
- **D. You are using a query with a static date filter.**

Answer: D

Explanation:

* Issue with Static Date Filters:

* If the query uses a static date filter (e.g., a specific range like "January 1, 2023, to March 31, 2023"), the report will not reflect the most recent data as the filter restricts results to the defined date range.

* Resolution:

* Update the query to use dynamic date filters (e.g., "Last 30 Days" or "Current Year") to ensure the pivot table includes the latest data.

NEW QUESTION # 73

When you share a tile, how can the user view that tile? Note: There are 3 correct answers to this question.

- **A. Dashboard**
- **B. Homepage**
- C. Custom table report
- **D. iOS SF app**
- E. Canvas Report

Answer: A,B,D

Explanation:

When you share a tile in SAP SuccessFactors, the recipient can view the tile in the following ways:

* Homepage (C):

* Shared tiles can appear on the recipient's homepage if configured appropriately.

* iOS SF App (D):

* Tiles are accessible through the SAP SuccessFactors mobile application, enabling on-the-go access to reports and visualizations.

* Dashboard (E):

* Tiles can be added to dashboards, where users can view multiple tiles and reports in one interface.

NEW QUESTION # 74

You create a report page and want to change the grid column width and grid row height of the Page Designer.

Where can you do this?

- A. Edit Query
- B. Validate page
- C. Edit page properties
- **D. Edit designer properties**

Answer: D

Explanation:

* Page Designer Configuration

* In SAP SuccessFactors, grid column widths and row heights are part of the designer's layout properties. These settings are configured in the designer properties of the page.

* Why Other Options are Incorrect

* A (Edit Page Properties): This is used for general page settings, not specific grid layout adjustments.

* B (Edit Query): Query settings pertain to data retrieval, not layout.

* D (Validate Page): Validation checks for errors but does not allow layout adjustments.
