## QUESTION 1

A customer wants to ensure that VMware Cloud on AWS maintenance operations are performed during their maintenance window. Which option would allow the customer to achieve this outcome?

- A. Schedule a maintenance preference in the software-defined data center (SDDC) console.
- B. Schedule a call with VMware Cloud on AWS Support and schedule a maintenance window.
- C. Schedule a call with AWS Support and schedule a maintenance window.
- D. Schedule a maintenance window through an online support request.

Correct Answer: A

## QUESTION 2

Which VMware solution provides customers with the ability to query and graphically display activities for audits, events and custom real-time alerts for the VMware NSX-T firewall running in VMware Cloud on AWS?

- A. VMware vRealize Network Insight Cloud
- B. VMware vRealize Log Insight Cloud
- C. VMware vRealize Operations Cloud
- D. CloudHealth by VMware

Correct Answer: C

## QUESTION 3

A virtual machine in VMware Cloud on AWS sends a packet to an Amazon Elastic Compute Cloud (EC2) Linux instance in the associated AWS account. Which device is the next hop for the packet?

- A. Edge Virtual Machine
- B. AWS Elastic Network Adapter (ENA) on the VMware ESXi host
- C. Tier-0 (T0) Router
- D. Tier-1 (T1) Router

Correct Answer: B

## QUESTION 4

To assist with seasonal workload demands over the next two months, a group of interns are hired to assist with day 2 virtual machine operations in VMware Cloud on AWS. Which method should be used for creating these temporary user

Are you aware of the importance of the CCSFP certification? If your answer is not, you may place yourself at the risk of being eliminated by the labor market. As we know, the CCSFP certification is the main reflection of your ability. If you want to maintain your job or get a better job for making a living for your family, it is urgent for you to try your best to get the CCSFP Certification. We are glad to help you get the certification with our best CCSFP study materials successfully.

We are a group of IT experts and certified trainers who write HITRUST vce dumps based on the real questions. Besides, our CCSFP exam dumps are always checked to update to ensure the process of preparation smoothly. You can try our CCSFP Free Download study materials before you purchase. Please feel free to contact us if you have any questions about the CCSFP pass guide.

## New CCSFP Braindumps Questions & CCSFP Exam Vce Free

each CCSFP practice torrent in our online store before the listing, are subject to stringent quality checks within the company. Just focus on spending the most practice to use our CCSFP test materials. After careful preparation, I believe you will be able to pass

the exam. This is a wise choice, after using our CCSFP Exam Question, you will realize your dream of a promotion. Therefore, when you are ready to review the exam, you can fully trust our CCSFP practice torrent, choose our learning materials. If you don't want to miss out on such a good opportunity, buy it quickly!

## **HITRUST Certified CSF Practitioner 2025 Exam Sample Questions (Q104-Q109):**

### **NEW QUESTION # 104**

The scoring of Requirement Statements is used to calculate the overall Domain score.

- A. False
- B. True

**Answer: B**

Explanation:

In HITRUST, scoring follows a hierarchical roll-up process. At the lowest level, Requirement Statements are scored across the five maturity levels: Policy, Procedure, Implemented, Measured, and Managed. These individual requirement scores are then aggregated to produce the Control Reference score. Control Reference scores are averaged to determine the Domain score, and finally, domain scores are used to determine whether certification thresholds are met. Each level of scoring influences the next, meaning deficiencies at the Requirement Statement level impact the higher-level domain performance. This structure ensures that assessments provide a balanced and transparent picture of organizational control effectiveness. No single requirement is hidden; its performance is reflected in the domain-level scoring. Since r2 certifications require each of the 19 domains to score at least 71, accuracy in Requirement Statement scoring is critical.

References: HITRUST Scoring Rubric - "Roll-Up of Scores"; CCSFP Study Guide - "From Requirement Statements to Domains."

### **NEW QUESTION # 105**

Which of the following is NOT one of the Technical risk factors?

- A. Number of Users
- B. Number of Facilities
- C. Number of Transactions
- D. Accessible from the Internet

**Answer: B**

Explanation:

Technical risk factors in HITRUST scoping include elements that influence the size and complexity of the IT environment. Examples are Number of Users (reflecting identity management challenges), Number of Transactions (indicating workload and exposure volume), and Accessible from the Internet (highlighting attack surface considerations). These factors affect how many requirement statements are assigned and the level of implementation required. However, Number of Facilities is not considered a technical factor. Instead, facilities are categorized under Organizational or Operational risk factors, since they represent physical locations and operational complexity rather than technical characteristics. This distinction ensures risk tailoring addresses both IT-centric and business-environment dimensions separately.

HITRUST CSF Methodology - "Risk Factor Categories and Examples"; CCSFP Study Guide - "Scoping with Technical vs. Organizational Factors."

### **NEW QUESTION # 106**

In an il assessment a Control Reference score of 62 would yield which result?

- A. An optional CAP for all gaps within the associated Requirement Statements
- B. A HITRUST certification
- C. A Control Reference gap
- D. A required CAP for all gaps within the associated Requirement Statements

**Answer: D**

Explanation:

In an il assessment, scoring follows a pass/fail logic tied to CAP requirements. If a Control Reference scores below the defined

threshold (typically 83 for i1 assessments), any gaps within its requirement statements must be addressed with a required Corrective Action Plan (CAP). A score of 62 is below the threshold, meaning it cannot be accepted without remediation. This ensures organizations remediate key cybersecurity hygiene gaps, even in a moderate assurance assessment. Optional CAPs are not used in i1 assessments, as the assurance program emphasizes mandatory remediation for below-threshold controls. Certification cannot be granted with unresolved required CAPs. Therefore, the correct outcome for a score of 62 in an i1 Control Reference is a required CAP.

References: HITRUST CSF Assurance Program - "i1 Assessment Scoring Rules"; CCSFP Practitioner Guide - "CAP Requirements in i1 Assessments."

### NEW QUESTION # 107

Gaps with required CAPs must have documented remediation plans within the assessment object before submission to HITRUST QA.

- A. False
- B. True

#### Answer: B

Explanation:

When a requirement statement or control reference fails to meet the HITRUST scoring threshold, a Corrective Action Plan (CAP) may be required. CAPs represent formal remediation commitments that must be documented in the assessment object before submission to QA. Each CAP must include details such as the control deficiency, planned remediation steps, responsible parties, milestones, and expected completion dates.

HITRUST QA will verify that all required CAPs are present before accepting the assessment for review.

Without CAP documentation, the assessment submission is considered incomplete. This process ensures transparency and accountability and demonstrates to relying parties that the organization has a structured plan to close gaps. Therefore, the statement is True.

References: HITRUST Assurance Program Requirements - "CAP Documentation"; CCSFP Practitioner Guide - "CAPs and Submission Readiness."

### NEW QUESTION # 108

When performing r2 assessments, any added compliance factors should be considered before marking a requirement statement "N/A".

- A. False
- B. True

#### Answer: B

Explanation:

Marking a requirement statement "Not Applicable (N/A)" requires careful justification. In r2 assessments, compliance factors such as HIPAA, PCI-DSS, GDPR, or state-specific laws may trigger requirements that would not otherwise apply. Therefore, an assessor must verify that all compliance factors have been considered before permitting an N/A designation. For example, a requirement related to cardholder data might seem irrelevant unless PCI-DSS was selected as a compliance factor; in that case, it becomes mandatory.

HITRUST QA scrutinizes N/A markings to ensure they are not misused to exclude applicable requirements.

Incorrect use of N/A may result in CAPs or QA rejection. Thus, compliance factors must always be reviewed first to confirm whether the requirement is truly outside scope.
