## Realistic Valid C-BRIM-2020 Learning Materials to Obtain SAP Certification

If you want to constantly improve yourself and realize your value, if you are not satisfied with your current state of work, if you still spend a lot of time studying and waiting for C-BRIM-2020 qualification examination, then you need our C-BRIM-2020 material, which can help solve all of the above problems. I can guarantee that our study materials will be your best choice. Our [C-BRIM-2020 Study Materials](#) have three different versions, including the PDF version, the software version and the online version, to meet the different needs, our products have many advantages, I will introduce you to the main characteristics of our C-BRIM-2020 research materials.

Valid C-BRIM-2020 Learning Materials - Valid C-BRIM-2020 Exam Test

Our Mule-Dev-202 exam torrent is available in different versions. Whether you like to study on a computer or enjoy reading paper materials, our test prep can meet your needs. Our PDF version of the Mule-Dev-202 quiz guide is available for customers to print. You can print it out, so you can practice it repeatedly conveniently. And our Mule-Dev-202 exam torrent make it easy for you to take notes on it so that your free time can be well utilized and you can often consolidate your knowledge. Everything you do will help you successfully pass the exam and get the card. The version of APP and PC of our Mule-Dev-202 Exam Torrent is also popular. They can simulate real operation of test environment and users can test Mule-Dev-202 test prep in mock exam in limited time. They are very practical and they have online error correction and other functions. The characteristic that three versions of Mule-Dev-202 exam torrent all have is that they have no limit of the number of users, so you don't encounter failures anytime you want to learn our Mule-Dev-202 quiz guide. The three different versions can help customers solve any questions and meet their all needs.

Salesforce Mule-Dev-202 practice exam support team cooperates with users to tie up any issues with the correct equipment. If Salesforce Certified MuleSoft Hyperautomation Developer material changes, CertsFire also issues updates free of charge for three months following the purchase of our Salesforce Mule-Dev-202 Exam Questions.

**Salesforce Mule-Dev-202 Questions: Turn Your Exam Fear into Confidence [2026]**

If you are still headache about how to choose Mule-Dev-202 real questions, now stop! Do not be entangled with this thing. We should be the best wise select for every aspiring candidate who is ready for Mule-Dev-202 exams. We design three formats of our high-quality Mule-Dev-202 exam questions which satisfy different kinds of candidates' demands: PDF version, Soft Test Engine, Online Test Engine. These 3 formats of our Mule-Dev-202 training guide contain same questions and answers. Candidates can choose any version of our Mule-Dev-202 learning prep based on their study habits.

## Salesforce Certified MuleSoft Hyperautomation Developer Sample Questions (Q44-Q49):

### NEW QUESTION # 44

Northern Trail Outfitters evaluates multiple standards for the exit criteria of a stage in their Flow Orchestration. Based on their criteria, they want the flow to go down one of three paths.

How should this be built in Flow Orchestration to meet this requirement?

- A. Evaluate the criteria for the first two paths in an evaluation flow. Then, use the default path functionality of the decision element for the third path.
- B. Use the evaluation flow to determine the exit criteria for the current stage. Then, use a separate evaluation flow to determine the entry criteria for each of the three paths.
- C. Create two evaluation flows, and execute the second evaluation flow if the first evaluation flow returns false.
- **D. Have the evaluation flow return a number variable, and use a decision element to determine which path to execute.**

**Answer: D**

Explanation:

To implement branching logic based on multiple criteria in Flow Orchestration, you can use the following approach:

Evaluation Flow Returns a Number Variable:

Create an evaluation flow that assesses the exit criteria for the current stage and returns a number variable indicating which path to take (e.g., 1, 2, or 3).

Decision Element:

Use a decision element in Flow Orchestration to evaluate the number variable returned by the evaluation flow.

Based on the value of the variable, the decision element will determine which path to execute next.

This approach allows for clear and maintainable branching logic, ensuring that the flow can proceed down one of three paths based on the defined criteria.

Salesforce Flow Orchestration Documentation

### NEW QUESTION # 45

A Salesforce admin for AnyAirlines constructs a MuleSoft Composer flow that retrieves a record based on a unique ID using the Get Records action from a Salesforce connector. They will use the result to send a Slack message.

How can they achieve this task?

- **A. 1. Add a Slack action step after the Salesforce action step.2. Use the record to construct the message.**
- B. 1. Add a Slack action step after the Salesforce action step.2. Use the first record from the collection of Salesforce records to construct the message.
- C. 1. Add an If/Else Block after the Salesforce action step, which contains a branch checking if the Salesforce action step returned exactly one record.2. In the branch, add a Slack action step and use the record to construct the message.
- D. 1. Add a For Each loop after the Salesforce action step iterating over the collection of Salesforce records.2. Use a Slack action step to construct the messages from the record being processed.

**Answer: A**

Explanation:

Salesforce Action Step:Start by adding a Salesforce action step that uses the Get Records action to retrieve the record based on a unique ID. This action retrieves the specific record needed.

Reference:MuleSoft Composer Salesforce Connector

Add Slack Action Step:After retrieving the record, add a Slack action step. This step will be used to send the message to Slack.

Reference:MuleSoft Composer Slack Connector

Use the Record:Use the retrieved record directly to construct the message in the Slack action step. This ensures the message contains the relevant information from the Salesforce record.

Reference:Building Messages in Composer

No Need for Collection Handling: Since the Get Records action retrieves a single record based on a unique ID, there is no need to handle collections or iterate through records.

Reference: Get Records Action

#### NEW QUESTION # 46

AnyAirlines is attempting to automate a process that triggers when a case is created in Salesforce but requires data to be extracted from a website without an API. It plans to automate the process using MuleSoft Composer and MuleSoft RPA.

During the design phase, it uses RPA Recorder to gather the steps required to interact with the website.

What will automatically be gathered by RPA Recorder when recording a manual activity?

- A. Conditional decisions made by the user during the process
- B. Variable information used by the user during the process
- C. Documentation on the elements used by the user during the process
- D. Comments on the purpose of the different steps carried out by the user

**Answer: C**

Explanation:

When using MuleSoft RPA Recorder to gather steps required for interacting with a website, it automatically collects documentation on the elements used by the user during the process.

MuleSoft RPA Recorder:

Automatic Element Documentation: The RPA Recorder captures all the elements (e.g., buttons, fields, and other UI components) that the user interacts with during the manual process recording.

Metadata Collection: It collects metadata such as element IDs, types, and positions, which are essential for accurately replicating the manual actions during automation.

Why Not Other Options:

Variable Information: While variable information is important, it is not the primary focus of the RPA Recorder. Variables can be defined post-recording.

Conditional Decisions: Conditional logic is typically added during the design phase of the RPA script, not during the initial recording.

Comments: User comments on the purpose of steps are not automatically recorded; this information needs to be added manually.

References:

For more detailed information on how MuleSoft RPA Recorder works, refer to MuleSoft's official RPA documentation

#### NEW QUESTION # 47

AnyAirlines is developing an RPA process and is implementing testing best practices. They want to take the RPA process through rigorous testing.

During these tests, where do RPA process test plans execute?

- A. In RPA Manager
- B. In an RPA process runtime
- C. On a configured RPA Bot
- D. In RPA Builder

**Answer: C**

Explanation:

During testing of an RPA process, test plans are executed on a configured RPA Bot. This allows you to simulate real-world scenarios and ensure the RPA process works correctly under various conditions:

On a Configured RPA Bot:

RPA Bots are configured to execute the automated tasks defined in the RPA process. By running test plans on these bots, you can verify the functionality and performance of the RPA process.

This approach ensures that the RPA process is thoroughly tested in an environment that closely mirrors production conditions.

MuleSoft RPA Documentation

#### NEW QUESTION # 48

Northern Trail Outfitters publishes REST APIs to Anypoint Exchange. They write the REST APIs using RAML and share these

APIs with internal and external users.

In which language or languages can a user download these APIs?

- A. RAML and Apiary only
- B. RAML only
- C. RAML, OAS, and Apiary
- **D. RAML and OAS only**

**Answer: D**

Explanation:

Users can download REST APIs published to Anypoint Exchange in the following languages:

RAML (RESTful API Modeling Language):

RAML is a modeling language for defining APIs, used by MuleSoft for creating REST APIs.

OAS (OpenAPI Specification):

OAS, also known as Swagger, is another widely-used standard for defining APIs.

MuleSoft supports both RAML and OAS formats, allowing users to choose between these two standards when downloading API definitions.
