CA	San Carlos	CA-SC	Jul011990	Dec311990

Color Yellow - represents the rows that are shared across versions.

The developer needs to delete the row that contains the Code CA-SF.
If the developer deletes that row in Version 3, what is the result?

- A. The row is deleted in all versions
- **B. The row is deleted only in Version 3.**
- C. The row is deleted In Versions 2 and 3 but will remain in Version 1.
- D. The row is deleted in Version 3 and Version 1.

Answer: B

Explanation:

Deleting a row in Version 3 will only affect that version, not any previous or future versions. The row that contains the Code CA-SF will remain in Versions 1 and 2, as well as any versions created after Version 3. The other options are incorrect because they imply that deleting a row in one version will affect other versions as well.

Choose 2 answers

The developer on the project decides to use an MiniScript.
How should the developer configure the OmniScript to provide this functionality?

- **B. Use an Edit Block element configured with Remote Actions.**
- C. Use an Input Block element and a DataRaptor Post Action element.
- D. Use a Text Block element and a Remote Action element.

The Repeat Records feature on the FlexCard Setup tab is used to display multiple FlexCards for each record in a data source. The Record Looping feature on the data table elements is used to iterate over a list of records and perform actions on each record. The Overwrite Target for all Null input checkbox on the Account id field is used to overwrite the existing value in the target object with null if the input value is null.
