

HPE7-A03인증시험자료덤프구매후1년까지업데이트버전은무료로제공

BONUS!!! ITDumpsKR HPE7-A03 시험 문제집 전체 버전을 무료로 다운로드하세요: https://drive.google.com/open?id=1RJNf6DRu4iD6Lt8a0xlcabF_qWavw-_J

ITDumpsKR는 전문적인 IT인증시험덤프를 제공하는 사이트입니다.HPE7-A03인증시험을 패스하려면 아주 현명한 선택입니다. ITDumpsKR에서는HPE7-A03관련 자료도 제공함으로 여러분처럼 IT 인증시험에 관심이 많은 분들한테 아주 유용한 자료이자 학습가이드입니다. ITDumpsKR는 또 여러분이 원하도 필요로 하는 최신 최고버전의HPE7-A03문제와 답을 제공합니다.

ITDumpsKR는 여러분이 빠른 시일 내에HP HPE7-A03인증시험을 효과적으로 터득할 수 있는 사이트입니다.HP HPE7-A03인증 자격증은 일상생활에 많은 개편을 가져올 수 있는 시험입니다.HP HPE7-A03인증 자격증을 소지한 자들은 당연히 없는 자들보다 연봉이 더 높을 거고 승진기회도 많아지며 IT업계에서의 발전도 무궁무진합니다.

>> HPE7-A03인증시험자료 <<

퍼펙트한 HPE7-A03인증시험자료 최신 덤프공부

HP 인증HPE7-A03시험에 도전해보려고 하는데 공부할 내용이 너무 많아 스트레스를 받는 분들은 지금 보고계시는 공부자료는 책장에 다시 넣으시고ITDumpsKR의HP 인증HPE7-A03덤프자료에 주목하세요. ITDumpsKR의 HP 인증HPE7-A03덤프는 오로지 HP 인증HPE7-A03시험에 대비하여 제작된 시험공부가이드로서 시험패스율이 100%입니다. 시험에서 떨어지면 덤프비용전액환불해드립니다.

최신 Aruba Certified Professional HPE7-A03 무료샘플문제 (Q87-Q92):

질문 # 87

What is the simple difference between a main distribution framework (MOF) closet and an intermediate distribution framework (IDF) closet?

- A. MOF is the point where traffic egresses the campus network, and IDFs distribute that connectivity throughout the building.
- B. MDF Is a term used in Europe whereas the Americas refer to all network closets as IDFs in their documentation.
- C. MDFs always have larger rooms than IDFs.
- D. MDFs only connect to other MDFs. and IDFs only connect to other IDFs.

정답: A

설명:

In network design, the Main Distribution Frame (MDF) and Intermediate Distribution Frame (IDF) are critical components of the network infrastructure. The MDF is the primary hub of the network, often where services from outside the campus or building enter and get distributed. It acts as a central point for network distribution. On the other hand, IDFs are secondary hubs situated throughout the building or campus, extending connectivity provided by the MDF to various endpoints or areas within the building. The simple difference between them lies in their roles within the network infrastructure: the MDF serves as the main point of network

ingress and egress, while IDF's are used to further distribute the network to specific locations or floors within the building.

질문 # 88

'Don't Buy at Us' is a US-based retail company that is expanding into Europe. They are expanding into EMEA with a regional headquarters called HQ2 inside The Netherlands.

Their US-based headquarters HQ1 was refreshed last year based on the HPE Aruba Networking ESP architecture. You have created the design for HQ2 based on the same design as HQ1, a two-tier architecture. The high level is shown below.

Switch BOM for this project based on Two Tier:

Collapsed Core: 2 x 8360-16Y2C in VSX (ISL 2x100GbE DAC)

Access Stack: 10 x Stack of 6200F 48G Class4 PoE 4SFP+ 740W (each stack has 4 members, VSF with 10GbE VSF links) (2 x 10GbE uplink per stack) Based on the scenario, which switch would be a good access layer switch to recommend?

- A. CX 6100
- B. 0
- C. 1950S
- D. CX 6400
- E. CX 6300F

정답: E

설명:

For a modern ESP-based two-tier design, the access layer should use an Aruba CX switch that supports VSF stacking, 10 GbE uplinks, and full Layer 3/PoE features. Among the options, the CX 6300F best matches these requirements and is the appropriate access switch to recommend.

질문 # 89

Which is true when it comes to Aruba Central licensing for gateways? (Select two.)

- A. Aruba WLAN Gateway licenses allow normal SD-Branch features within a campus.
- B. SD-WAN Gateway functionality requires security licensing.
- C. Aruba Gateway normal licensing is subdivided into three categories: Foundation, Advanced, and Foundation Base.
- D. Aruba SD-Branch Gateway licenses allow normal WLAN Gateway features within a campus.

정답: C,D

설명:

Comprehensive and Detailed Explanation From Exact Extract:

* Aruba Central Licensing for Gateways Aruba has moved to a tiered subscription licensing model for gateways managed by Aruba Central. Licensing is divided into:

* Foundation Base - provides basic gateway management and monitoring.

* Foundation - enables standard gateway functionality such as WLAN gateway roles, routing, and tunneling.

* Advanced - adds enhanced capabilities such as SD-WAN features, security services, and advanced routing.

* Why Option A is Correct Aruba Central licensing for gateways is indeed subdivided into three categories: Foundation Base, Foundation, and Advanced. This aligns directly with Aruba's documented Central licensing structure.

* Why Option B is Incorrect SD-WAN functionality is not tied to "security licensing." Instead, SD-WAN features are unlocked with the Advanced license tier. Security services may also be enabled at that tier, but they are not a separate license requirement.

- * Why Option C is Correct Aruba SD-Branch Gateways (with appropriate Central licensing) can also provide WLAN Gateway features in a campus deployment. This is explicitly supported in Aruba's ESP and Central design guides, where branch gateways can terminate WLAN tunnels and provide role-based policy enforcement in addition to SD-WAN.
- * Why Option D is Incorrect The reverse is not true - Aruba WLAN Gateway licenses do not allow SD-Branch features. A WLAN gateway license is designed for campus WLAN tunnel termination and policy enforcement, but does not include SD-WAN branch functions.
- * Aruba Official Design Guide Reference:
- * Aruba Central Licensing Overview: Gateway licensing is split into Foundation Base, Foundation, and Advanced.
- * Aruba ESP Campus Design Guide: SD-Branch gateways can run both SD-WAN and WLAN Gateway roles when properly licensed.
- * Aruba Central Feature Matrix: SD-WAN functionality requires the Advanced license tier, not a separate "security license."

질문 # 90

Which platform can be used to demo your solution to a customer? (Select three.)

- A. Aruba CX Switch Simulator
- B. your own lab
- C. Aruba Support Portal
- D. Aruba Demo Experience Platform
- E. Aruba Innovation Zone
- F. Aruba Solution Exchange

정답: A,D,E

설명:

To demonstrate a solution to a customer, three platforms that can be effectively used are the Aruba CX Switch Simulator (Option B), Aruba Innovation Zone (Option C), and Aruba Demo Experience Platform (Option F).

The Aruba CX Switch Simulator provides a virtual environment where customers can interact with the Aruba OS-CX interface, allowing them to explore features and configurations without the need for physical hardware. The Aruba Innovation Zone offers a space for experiencing the latest Aruba technologies and solutions in action, showcasing their capabilities in real-world scenarios. The Aruba Demo Experience Platform is designed to give customers a comprehensive look at Aruba's solutions, enabling interactive demos and simulations that highlight the benefits and functionalities of the products. These platforms provide valuable resources for customers to understand and evaluate Aruba solutions in a controlled and informative environment.

질문 # 91

You are designing a solution with Aruba OS10-based access points and redundant gateways and these are the requirements:

- * W1-F16E based access points
- * support for tunneled traffic
- * application visibility
- * rogue APs
- * live upgrades
- * Air Slice
- * Cloud Guest Authentication
- * AI insights

Which licenses are needed? (Select two.)

- A. AP Foundation
- B. WIAN Gateway
- C. Gateway Foundation
- D. AP Advanced

정답: A,D

설명:

For a solution design incorporating Aruba OS10-based access points with the specified requirements, including Wi-Fi 6E support, tunneled traffic, application visibility, rogue AP detection, live upgrades, Air Slice, Cloud Guest Authentication, and AI insights, the necessary licenses are AP Foundation (Option A) and AP Advanced (Option C). The AP Foundation license provides basic connectivity and network access control features essential for establishing a Wi-Fi network. The AP Advanced license adds advanced capabilities such as application visibility and control, enhanced security features like rogue AP detection, and performance

optimization features like Air Slice. These licenses together ensure the access points can deliver the full range of required functionalities, from reliable basic connectivity to sophisticated network management and security, making them suitable for a comprehensive and high-performing wireless network solution.
