Microsoft Power BI Data Analyst Sample Questions (Q198-Q203):

NEW QUESTION # 198

You have a Power BI model that contains the following data.

□ The Date table relates to the Sales table by using the Date columns.

The model contains the following DAX measure.

Total Sales = SUM(Sales[Sales])

You need to create another measure named Previous Quarter to display the sales one quarter before the selected period.

Which DAX calculation should you use?

- A. TOTALQTD ([Total Sales], Date[Date])

- B. CALCULATE ([Total Sales], DATESQTD (Date[Date]))
- C. CALCULATE < [Total Sales], OATEADD (Date[Date], -1, QUARTER))
- D. CALCULATE < [Total Sales], PARALLELPERIOO (Date[Date], 1, QUARTER))

Answer: C

NEW QUESTION # 199

You have the line chart shown in the exhibit. (Click the Exhibit tab.)

You need to modify the chart to meet the following requirements:

Identify months that have order counts above the mean.

Display the mean monthly order count.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

- 1 - Select the line chart
- 2 - Add the average line
- 3 - Turn on Data Label

NEW QUESTION # 200

Your company has affiliates who help the company acquire customers.

You build a report for the affiliate managers at the company to assist them in understanding affiliate performance.

The managers request a visual showing the total sales value of the latest 50 transactions for each affiliate. You have a data model that contains the following tables.

You need to develop a measure to support the visual.

How should you complete the DAX expression? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:
