As we all know, practice makes perfect. It's also applied into preparing for the exam. ANVE training materials of us contain both quality and quantity, and you will get enough practice if you choose us. In addition, ANVE exam cram cover most of the knowledge points for the exam, and you can master the major knowledge points for the exam as well as improve your professional ability in the process of learning. We are pass guarantee and money back guarantee if you fail to pass your exam by using ANVE Exam Dumps of us. Online and offline service are available by us, if you have any questions, you can consult us.

To take the Axis ANVE Certification Exam, candidates must have a solid understanding of network video technologies and concepts. They should possess relevant work experience in the field of network video surveillance and have a good grasp of networking and IT principles. ANVE exam is divided into two parts: a written exam and a hands-on lab exam. The written exam consists of multiple-choice questions that test the candidate's theoretical knowledge, while the lab exam assesses the candidate's practical skills in configuring and troubleshooting network video systems.

Pass Guaranteed Quiz High Pass-Rate Axis - ANVE 100% Accuracy

Our ANVE exam preparation materials are the hard-won fruit of our experts with their unswerving efforts in designing products and choosing test questions. Pass rate is what we care for preparing for an examination, which is the final goal of our ANVE certification guide. According to the feedback of our users, we have the pass rate of 99%, which is equal to 100% in some sense. The high quality of our products also embodies in its short-time learning. You are only supposed to practice ANVE Guide Torrent for about 20 to 30 hours before you are fully equipped to take part in the examination.

Axis Network Video Exam Sample Questions (Q194-Q199):

NEW QUESTION # 194

If a camera is pointed down a hallway with no windows and the color seems "washed out" or faded, which of the following settings should first be adjusted to improve the image?

- A. Uncheck backlight compensation
- B. Adjust the exposure settings
- C. Decrease image brightness
- D. Increase image contrast

Answer: A

NEW QUESTION # 195

A P-iris lens is

- A. An iris specially made for zoom lenses.
- B. An iris with higher light sensitivity.
- C. Axis' standard for DC-iris.
- **D. A DC-iris with feedback.**

Answer: D

NEW QUESTION # 196

What is the red tip used for?

□

- A. Meeting fire code requirements
- B. Adapting cable for RJ48 connectors
- **C. Keeping connectors dust-free prior to installation**
- D. Puncturing the cable gasket cleanly

Answer: C

Explanation:

The red tip on the cable is used to keep the connectors dust-free prior to installation. It protects the RJ45 connector from dust and debris, ensuring a clean and reliable connection once installed. Maintaining clean connectors is essential for preventing connectivity issues and ensuring optimal network performance. Axis installation guides specify the importance of keeping connectors covered until installation to protect against contamination and ensure a proper connection.

NEW QUESTION # 197

Working with a retailer on a site survey, they ask if there's any way to get more of the aisle and less of the shelves on the short sides in the shot. An AXIS M3204 camera is being used. Which would be the best suggestion to the retailer?

- A. Switching the camera to a 16:9 view
- B. Adjusting the varifocal lens from 2.8 mm to 4 mm
- C. Adjusting the varifocal lens from 2.8 mm to 10 mm
- **D. Using Axis' Corridor Format**

Answer: D

Explanation:

Axis' Corridor Format is designed to provide a vertically oriented video stream, which is ideal for monitoring narrow areas such as aisles. This format minimizes wasted space in the field of view and focuses on the desired area. For a retailer wanting to capture more of the aisle and less of the shelves, enabling Corridor Format on the AXIS M3204 camera would be the best solution. Detailed setup instructions can be found in Axis Communications' user manuals and configuration guides for Corridor Format.

NEW QUESTION # 198

In which situation should a system designer recommend a customer to install standalone multi-channel video encoders to leverage an existing analog surveillance infrastructure?

- A. When cameras are placed in both indoor and outdoor locations
- **B. When large numbers of cameras are located near the central monitoring room**
- C. When cameras are located in groups far from the central monitoring room
- D. When cameras are spread over a large area far from the central monitoring room

Answer: B

Explanation:

A system designer should recommend the installation of standalone multi-channel video encoders when large numbers of cameras are located near the central monitoring room. This setup allows for efficient centralization of video feeds from multiple analog cameras, converting them to digital signals for easier management and storage. Using multi-channel encoders in this scenario

optimizes space and reduces the complexity of wiring compared to installing separate encoders for each camera. Axis Communications' guidelines on transitioning from analog to IP systems support this recommendation.

NEW QUESTION # 199

.....

As the saying goes, knowledge has no limits. You may be old but the spirit of endless learning won't be old. If you attend the test of ANVE certification you will update your stocks of knowledge and improve your actual abilities, buying our ANVE Study Materials can help you pass the test smoothly. You will acquire a lot of knowledge to make you more learned and enhance your working abilities in some certain area.
