We check the updating of CPC-CDE-RECERT Dumps PDF everyday to make sure you pass CPC-CDE-RECERT valid test easily. The pass rate will be 100%.

## CyberArk CDE-CPC Recertification Sample Questions (Q66-Q71):

NEW QUESTION # 66

Which components can be installed when running the Privilege Cloud Connector installation package?  
(Choose two.)

- A. Privileged Session Manager (PSM)
- B. Central Policy Manager (CPM)
- C. Central Credential Provider (CCP)
- D. Privileged Session Manager for SSH (PSM for SSH)
- E. Secure Tunnel

**Answer: A,B**

Explanation:

In the Privilege Cloud Installer (Standard) procedure, the Connector installer explicitly prompts you to select which components you want to install: "CPM/PSM/Both." That means the installation package supports installing:

\* PSM (Windows connector)

\* CPM

Why the other options are not correct for this installer package:

\* C (Secure Tunnel) is treated as a separate component (downloaded as a Secure Tunnel Client Installer package), not one of the "CPM/PSM/Both" choices in the Connector installer step.

\* D (CCP) is not listed as an installable component in the Privilege Cloud Connector installer flow shown in the official procedure.

\* E (PSM for SSH) is selected/downloaded as a separate component to support UNIX/Linux, not installed via the Connector installer's "CPM/PSM/Both" selection.

#### NEW QUESTION # 67

The System Health page shows the status of all components related to Privilege Cloud. Which components can administrators monitor on this page? (Choose two.)

- A. CPM
- B. Vault
- C. PVWA
- D. PTA
- E. PSM

**Answer: A,E**

Explanation:

In Privilege Cloud Shared Services, the System Health dashboard lists component categories that include CPM (and Accounts Discovery) and PSM (and PSM for SSH), along with Web Portal and Secrets Manager Credential Providers. Vault/PVWA/PTA are not listed as monitorable components on this page in the Privilege Cloud Shared Services System Health topic.

#### NEW QUESTION # 68

In addition to the Vault Admins and Auditors, what are the default map roles in the Privilege Cloud LDAP Directory mapping function for the Privilege Cloud Standard Services Model? (Choose two.)

- A. Privileged Cloud Users
- B. Safe Owners
- C. Safe Managers
- D. Users

**Answer: C,D**

Explanation:

In the Privilege Cloud LDAP integration workflow, CyberArk lists the default maps (built-in directory maps) as:

\* Vault Admins

\* Safe managers

\* Auditors

\* Users

Since the question asks for the default roles in addition to Vault Admins and Auditors, the remaining two default map roles are Safe managers and Users, which correspond to A and D.

### NEW QUESTION # 69

'What is a default authentication profile to access CyberArk Identity?

- A. **Default New Device Login Profile**
- B. Default New Password Profile
- C. Default New User Login Profile
- D. Default New Authenticator Profile

**Answer: A**

Explanation:

The default authentication profile to access CyberArk Identity is typically the Default New Device Login Profile. This profile is used to manage the authentication settings and security measures for devices accessing CyberArk services for the first time. It includes configurations such as authentication methods, security checks, and compliance requirements, ensuring that new devices meet the organization's security standards before gaining access.

### NEW QUESTION # 70

Which deployment criteria influences the CyberArk-provided hardening methods that need to be applied to CPM and PSM components?

- A. "On Premises" and "On Cloud"
- B. **"In Domain" and "Out of Domain"**
- C. "Primary Privilege Cloud Connector" and "additional Privilege Cloud Connector"
- D. "Windows" and "Linux"

**Answer: B**

Explanation:

CyberArk's hardening guidance is explicitly organized by whether the servers are In Domain or Out of Domain (for example, PSM hardening guidelines and tasks reference both deployment types, and CPM has separate "hardening in domain" guidance). Therefore, the deployment criterion that drives the hardening method/package is In Domain vs Out of Domain.

### NEW QUESTION # 71

.....

The CPC-CDE-RECERT exam questions are being offered in three formats. These formats are CyberArk CPC-CDE-RECERT web-based practice test software, desktop practice test software, and PDF dumps files. All these three CPC-CDE-RECERT exam Dumps formats are ready for download.
