Salesforce Platform-App-Builder (Salesforce Certified Platform App Builder) Certification Exam is a globally recognized certification that validates an individual's skills and knowledge in designing, building, and implementing custom applications using the Salesforce platform. Salesforce Certified Platform App Builder certification is designed for individuals who have experience with the Salesforce platform and want to enhance their skills in building custom applications.

Salesforce Platform-App-Builder Certification Exam covers a wide range of skills such as designing custom user interfaces, creating custom applications, managing data, and automating business processes. Platform-App-Builder exam is designed to test the

candidate's ability to design, build and deploy custom applications using Salesforce's declarative tools, including the Lightning App Builder, Process Builder, and Visual Workflow.

## **Get Help from Real TopExamCollection Salesforce Platform-App-Builder Exam Questions**

The Platform-App-Builder Mock Exams not just give you a chance to self-access before you actually sit for the certification exam, but also help you get an idea of the Salesforce exam structure. It is well known that students who do a mock version of an exam benefit from it immensely. Some Salesforce certified experts even say that it can be a more beneficial way to prepare for the Salesforce Certified Platform App Builder exam than spending the same amount of time studying.

### **Salesforce Certified Platform App Builder Sample Questions (Q45-Q50):**

#### **NEW QUESTION # 45**

DreamHouse Realty (DR) is expanding into subsidized housing by partnering with local government entities. DR uses Sales Cloud and has enabled field history tracking on the Opportunity object. Due to increased Information requirements, the App Dev team is changing Text Area (Long) fields to Rich Text fields to allow for up to 1,000 characters and better descriptions. Which two considerations should be made by the team?

- **A. Data loss may occur when changing custom field types.**
- B. Rich text field values of all lengths are displayed fully in reports.
- C. Audit Trail is available through REST API extracts.
- **D. Field History Tracking records value changes of 255 characters or less.**

**Answer: A,D**

#### **NEW QUESTION # 46**

Universal Containers manages internal projects by department using a custom object called projects. Only employees in the project's respective departments should have view access to all of the department's project records. If an employee changes job roles and moves to another department, the employee should no longer have access to the projects within their former department. How can these requirements be met assuming the organization wide default for projects is set to private? (Choose 2)

- **A. Create a criteria-based sharing rule using the project's department that grants access to users by roles.**
- B. Create a criteria-based sharing rule using the project's department that grants access to users by profiles.
- **C. Create a criteria-based sharing rule using the project's department that grants access to users by public groups.**
- D. Create a criteria-based sharing rule using the project's department that grants access to users by permission sets.

**Answer: A,C**

#### **NEW QUESTION # 47**

Ursa Major Solar (UMS) is planning to hire some new employees. UMS wants to allow a job candidate (Job\_Candidate\_\_c) to apply for multiple open positions (Open\_Position\_\_c) and then be able to view the applications (Application\_\_c) on the job candidate record. UMS also wants to view all the applications for a specific open position.

- **A. Create a master-detail relationship field on Application\_\_c to Open\_Position\_\_c.**
- B. Create a master-detail relationship field on Job\_Candidate\_\_c to Application\_\_c.
- C. Create a master-detail relationship on Open\_Position\_\_c to Application\_\_c.
- **D. Create a master-detail relationship field on Application\_\_c to Job\_Candidate\_\_c.**

**Answer: A,D**

Explanation:

UMS wants each Application to connect both to a Job Candidate and an Open Position, where:

\* One Job Candidate can apply for multiple Open Positions.

\* One Open Position can receive multiple Applications. This is a many-to-many relationship, which in Salesforce is implemented by

using a junction object.

In this case, Application\_\_c serves as the junction object between Job\_Candidate\_\_c and Open\_Position\_\_c.

Exact Extract:

"To create a many-to-many relationship, create two master-detail relationships on the junction object. Each master-detail relationship links the junction object to one of the objects you want to relate." - Salesforce Help | Create a Many-to-Many Relationship

\* Step 1: On Application\_\_c, create a Master-Detail relationship to Job\_Candidate\_\_c (Answer C).

\* Step 2: On Application\_\_c, create a Master-Detail relationship to Open\_Position\_\_c (Answer D).

This setup allows:

\* Viewing all Applications related to a given Job Candidate.

\* Viewing all Applications related to a given Open Position.

Exact Extract:

"A junction object is a custom object with two master-detail relationships, and it is the key to building many- to-many relationships between two objects." - Salesforce Help | Junction Object Concepts References (Salesforce Platform App Builder documentation / Study Guide topics):

\* Salesforce Help | Create a Many-to-Many Relationship

\* Salesforce Help | Junction Object Concepts

\* Salesforce Platform App Builder Exam Guide | Data Modeling and Management

### NEW QUESTION # 48

The app builder at Universal Containers has been asked to ensure that the Country field on the Account object is captured as the two letter abbreviation How can the app builder satisfy this requirement?

- A. Create a workflow rule to set values using an external data source.
- B. Create a validation rule to set values using an external data source
- C. Create a workflow rule that only allows the expected format.
- D. Create a validation rule that only allows the expected format

**Answer: A**

### NEW QUESTION # 49

For an external object relationship, you can create a lookup relationship.

What type of object(s) can be the parent?

- A. Custom
- B. Standard or External
- C. Standard or Custom
- D. External

**Answer: C**

Explanation:

Explanation: For a lookup you can only have standard or custom objects as the parent, but can have all 3 as the child.

### NEW QUESTION # 50

.....

This format of Salesforce Platform-App-Builder exam preparation material is compatible with smartphones and tablets, providing you with the convenience and flexibility to study on the go, wherever you are.
