## Salesforce Certified Platform App Builder Sample Questions (Q210-Q215):

### NEW QUESTION # 210

Service agents at Ursa Major Solar want a more condensed case view. Service agents also want to be able to modify the associated contact and account records from the case page layout on the Lightning record page.

Which two components should an app builder use to meet these requirements?

Choose 2 answers

- A. Path
- B. Related record
- C. Tabs
- D. Rich text

**Answer: B,C**

### NEW QUESTION # 211

DreamHouse Realty wants to import its property records from an external system into Salesforce. The app builder will use an external ID field to house the property ID from the external system.

Which two field types are allowed as an external ID?

- A. Number field
- B. URL field
- C. Phone field
- D. Text field

**Answer: A,D**

Explanation:

\* A: Number fields and C: Text fields can be set as External IDs. These field types are suitable for housing unique identifiers from external systems. References:

### NEW QUESTION # 212

Ursa Major Solar (UMS) has a custom object where they track Galactic Vendors. The object has four custom fields for the Galactic Vendors's location:

The UMS's leadership wants these fields to be concatenated into a single formula field on two lines.

Which formula fulfills this requirement?

- A. 
- B. 
- C. 
- D. 

**Answer: D**

Explanation:

This formula concatenates the four custom fields for the Galactic Vendor's location into a single text value, separated by commas and spaces. The formula also uses the BR function to insert a line break after the second field, creating two lines of text. Option A, B, and D are not formulas that fulfill the requirement.

#### NEW QUESTION # 213

Universal Containers (UC) has several large customers that sell their products through dealers. UC identifies and works with a single individual at each customer and at each dealer. Separate bills are sent to each customer and each dealer. These details need to be stored in a format that clearly displays the business entities and their appropriate representatives.

How should an app builder implement these requirements?

- A. Create a single account record, add each rep as a contact and create a custom dealer object.
- B. Create both customer and dealer as accounts, create account teams on each account and associate the dealer records with the parent account.
- C. Create a single parent record, add each rep as a contact to the parent account and add each dealer as a child record.
- D. Create both customer and dealer as accounts, add each rep as a contact on the corresponding account and create an account hierarchy.

**Answer: D**

Explanation:

Creating both customer and dealer as accounts, adding each rep as a contact on the corresponding account, and creating an account hierarchy provides a clear organizational structure and relationship between the entities.

Salesforce Help - Account Hierarchies

#### NEW QUESTION # 214

At Ursa Major Solar there is a requirement for a new field called Planet Details on the Planet object where users can write detailed descriptions that can include pictures and links.

What field type should the app builder utilize to fulfill this requirement?

- A. Multi-Select Picklist
- B. URL
- C. Long Text Area
- D. Rich Text Area

**Answer: D**

Explanation:

Ursa Major Solar requires a new field called Planet Details on the Planet object, where users can write detailed descriptions that can include pictures and links. The Rich Text Area field type is the best fit for this requirement.
