1/4

What's more, part of that Getcertkey D-PWF-OE-00 dumps now are free: https://drive.google.com/open?id=1ROuZsqNZDiS31icAziCPDr_z4p8xUOol

Additionally, Getcertkey offers 12 months of free EMC D-PWF-OE-00 exam questions so that our customers prepare with the latest EMC D-PWF-OE-00 material. Perhaps the most significant concern for EMC D-PWF-OE-00 Certification Exam candidates is the cost. EMC D-PWF-OE-00 certification exam requires expensive materials, classes, and even flights to reach the exam centers.

EMC D-PWF-OE-00 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Protecting PowerFlex Storage: This section covers data protection through snapshot technology for point-in-time copies and volume replication between clusters for disaster recovery.
Topic 2	<ul style="list-style-type: none">PowerFlex Components and Resource Discovery: This domain covers identifying PowerFlex hardware models and software components, using management interfaces to interact with the system, and completing essential post-installation configuration tasks.

Topic 3	<ul style="list-style-type: none"> • PowerFlex Storage: This domain addresses daily storage operations including creating and managing volumes, configuring shared file systems, and working with storage data targets.
Topic 4	<ul style="list-style-type: none"> • PowerFlex Security: This section addresses security administration through managing user accounts and access privileges, integrating CloudLink for encryption, and configuring system alerting.
Topic 5	<ul style="list-style-type: none"> • PowerFlex Logical Entities: This section focuses on configuring the logical structures within PowerFlex including templates, resource groups, protection domains, fault sets, and storage pools that organize and manage storage resources.
Topic 6	<ul style="list-style-type: none"> • Expanding a PowerFlex Cluster: This domain focuses on cluster expansion and maintenance including using maintenance modes, adding nodes, configuring Storage Data Servers and Meta Data Managers, and understanding PowerFlex integration with APEX.

D-PWF-OE-00 Exam Syllabus | Test D-PWF-OE-00 Price

If you are going to prepare for the D-PWF-OE-00 exam in order to get the related certification and improve yourself, you are bound to be very luck. Because you meet us, we are willing to bring a piece of good news for you. With the joint efforts of all parties, our company has designed the very convenient and useful D-PWF-OE-00 Study Materials. More importantly, the practices have proven that the study materials from our company have helped a lot of people achieve their goal and get the related certification.

EMC Dell PowerFlex Operate Exam Sample Questions (Q28-Q33):

NEW QUESTION # 28

Which feature of PowerFlex is leveraged to expand storage capacity in a cluster?

- A. Dynamic Node Addition
- B. Fault Sets
- C. Snapshots
- D. Shared File Systems

Answer: A

Explanation:

PowerFlex is a scale-out architecture.

* Dynamic Node Addition (Option B): This refers to the ability to add new x86 servers (nodes) to the cluster on the fly. When you add a node with local drives, the PowerFlex software automatically recognizes the new capacity. It then initiates a Rebalance operation, moving data chunks from existing full nodes to the new empty node until usage is uniform across the cluster. This process increases both Storage Capacity and Performance (IOPS/Bandwidth) linearly.

Incorrect Options:

* Fault Sets (A) organize nodes for availability, they do not add capacity.

* Snapshots (C) consume capacity.

* Shared File Systems (D) manage how capacity is accessed (NAS), not the expansion of the raw block layer.

NEW QUESTION # 29

What actions can administrators perform to manage PowerFlex shared file systems? (Choose two).

- A. Enable data access for multiple nodes
- B. Configure snapshots for shared file systems
- C. Deduplicate shared file system data
- D. Assign file systems to fault sets

Answer: A,B

Explanation:

PowerFlex File (NAS) extends the block capabilities to support file-level access.

* Enable data access for multiple nodes (Option B): The fundamental purpose of a shared file system (NAS) is to allow multiple clients (Linux via NFS, Windows via SMB) to access the same dataset simultaneously over the network. PowerFlex File manages the exports and shares that facilitate this concurrency.

* Configure snapshots for shared file systems (Option C): Just like block volumes, PowerFlex File systems support snapshots.

These file-system level snapshots allow users to recover deleted files or administrators to roll back the entire file system to a previous point in time.

Incorrect Options:

* Assign file systems to fault sets (A): Fault Sets are a block-layer construct for physical SDS nodes. File systems are logical entities that reside on the storage provided by the block layer; they are not directly assigned to Fault Sets.

* Deduplicate shared file system data (D): Deduplication occurs at the underlying Storage Pool level (inline), not as a management action performed on a specific file system.

NEW QUESTION # 30

Which tasks can be performed using Dynamic Node Addition in PowerFlex? (Choose two).

- A. Expand storage capacity
- B. Configure Protection Domains
- C. Enable automatic snapshot creation
- D. Increase compute resources

Answer: A,D

Explanation:

Dynamic Node Addition is the process of scaling out the cluster by adding more physical servers.

* Expand storage capacity (Option A): When a new node running the SDS (Storage Data Server) service is added, its local drives are added to the Storage Pool. PowerFlex automatically rebalances data to these new drives, increasing the total usable capacity of the cluster.

* Increase compute resources (Option C): In an HCI (Hyper-Converged Infrastructure) deployment, adding a node adds not just storage, but also CPU and RAM available for running applications or VMs (Compute). Even in a two-layer configuration, adding a compute-only node (SDC) increases compute resources.

NEW QUESTION # 31

Which conditions must be met to begin a PowerFlex upgrade? (Choose two).

- A. Metadata Managers must be active
- B. All fault sets must be reconfigured
- C. Cluster health status must be green
- D. All nodes must be online

Answer: C,D

Explanation:

To ensure a successful and non-disruptive upgrade (NDU), the PowerFlex cluster must be in a stable and healthy state before the process begins.

* Cluster health status must be green (Option B): This is the primary indicator. A "Green" health state implies that there are no critical errors, no rebuilds or rebalances in progress, and sufficient capacity is available. If the cluster is in a "Red" (Critical) or "Orange" (Degraded) state, the upgrade wizard in PowerFlex Manager (or the CLI pre-check) will block the operation to prevent data loss.

* All nodes must be online (Option A): All configured Storage Data Servers (SDS) and Metadata Managers (MDM) must be reachable. If a node is offline or disconnected, the orchestration engine cannot verify redundancy or place that node into maintenance mode safely.

Incorrect Options:

* Reconfiguring Fault Sets (C) is a structural change, not a prerequisite for an upgrade.

* Metadata Managers must be active (D) is technically true, but this is inherently covered by the "Green" health status; you cannot have a green cluster if MDMs are down.

NEW QUESTION # 32

What is the primary purpose of snapshots in PowerFlex?

- A. Automate data replication between clusters
- B. Improve storage performance metrics
- C. Reduce storage redundancy
- **D. Enable point-in-time data recovery**

Answer: D

Explanation:

* Enable point-in-time data recovery (Option B): A snapshot freezes the state of a volume at a specific second. If data is subsequently corrupted, deleted, or encrypted by ransomware, the administrator can use the snapshot to restore the data exactly as it was at that "point in time," minimizing data loss.

NEW QUESTION # 33

.....

With limited time for your preparation, many exam candidates can speed up your pace of making progress. Our D-PWF-OE-00 practice materials will remedy your faults of knowledge understanding for our D-PWF-OE-00 exam questions contain everything you need in the real D-PWF-OE-00 exam. You won't regret your decision of choosing our D-PWF-OE-00 training guide. In contrast, they will inspire your potential without obscure content to feel. After getting our D-PWF-OE-00 exam prep, you will not live under great stress during the exam period.
