

# Dynatrace-Associate Test Duration, Official Dynatrace-Associate Study Guide

## Dynatrace Associate Certification Complete Study Guide Questions and Answers 2022

An a retail stores have a lot of technologies monitored by Dynatrace. One of these legacy technologies are developed in .NET exe applications by others vendors. When make drill down in the transactions & services dashboard in dynatrace there are no requests incoming and outgoing for these .NET services. What do you do?

Create a custom service detection for .NET services.

The Governance boss requested informations about top services by load and infrastructure problems, by hosts with hours consolidated in the last week, what session you can access to obtain this informations?

Reports

One host of a reputed bank are affected performance after automatic Dynatrace oneagent update in old legacy systems server. What best practice to fast resolve this issue?

1 - Select specific host in dynatrace hosts menu, "...", select turn off monitoring, stop oneagent service, uninstall oneagent and restart services.

2 - Download previous oneagent version (except more recent updated), go to Settings > Monitoring > Monitoring overview > Download Dynatrace Oneagent or ActiveGate installer and reinstall (select version from the list).

3 - Disable automatic update in this host and review the technologies and versions supported by Dynatrace before update new oneagent version.

You created a POC in new customer and you need monitoring errors in agentless Real User Monitoring Web Application with Dynatrace, but customer don't see any related incidents about web applications in problems.

What is the best practice to raise alerts in problems in this case?

Settings > Anomaly detection > Custom events for alerting > Create custom event for alerting > Category > Applications

You need to create a dashboard with the total DEMS consumed, what do you do?

---

To capture information from user sessions, what options are supported?

Meta tags, cookies, JavaScript variables, CSS selector & Server side request attribute

It can be said that all the content of the Dynatrace-Associate prepare questions are from the experts in the field of masterpieces, and these are understandable and easy to remember, so users do not have to spend a lot of time to remember and learn our Dynatrace-Associate exam questions. It takes only a little practice on a daily basis to get the desired results. Especially in the face of some difficult problems, the user does not need to worry too much, just learn the Dynatrace-Associate Practice Guide provide questions and answers, you can simply pass the Dynatrace-Associate exam.

Our Dynatrace-Associate test questions provide free trial services for all customers so that you can better understand our products. You can experience the effects of outside products in advance by downloading clue versions of our Dynatrace-Associate exam torrent. In addition, it has simple procedure to buy our learning materials. After your payment is successful, you will receive an e-mail from our company within 10 minutes. In a matter of seconds, you will receive an assessment report based on each question you have practiced on our Dynatrace-Associate test material. The final result will show you the correct and wrong answers so that you can understand your learning ability so that you can arrange the learning tasks properly and focus on the targeted learning tasks with Dynatrace-Associate test questions. So you can understand the wrong places and deepen the impression of them to avoid making the same mistake again.

You can also become part of this skilled and qualified community. To do this you must enroll in the Network Security Specialist Dynatrace-Associate certification exam and start preparation with real and valid Dynatrace Associate Certification Exam (Dynatrace-Associate) exam practice test questions right now. The Dumpkiller Dynatrace-Associate Exam Practice test questions are checked and verified by experienced and qualified Dynatrace-Associate exam trainers. So you can trust Dumpkiller Dynatrace-Associate exam practice test questions and start preparation with confidence.

## Dynatrace Associate Certification Exam Sample Questions (Q68-Q73):

### NEW QUESTION # 68

Which of the following data points can be found within a User Session?

- A. Server side code level insights
- **B. User Actions**
- **C. JavaScript and Request errors**
- **D. User Tags**
- **E. Session and Action Properties**

**Answer: B,C,D,E**

Explanation:

A User Session in Dynatrace contains detailed information about user interactions and experience:

\* User Tags - custom identifiers assigned to users

\* Session and Action Properties - metadata describing session behavior

\* JavaScript and Request Errors - frontend and backend errors impacting the session

\* User Actions - all interactions such as clicks, page loads, and XHR calls Server-side code-level insights are not directly part of the user session view; they belong to service-level and distributed tracing analysis.

Reference: Based on official Dynatrace University training materials on Real User Monitoring and user sessions.

### NEW QUESTION # 69

I need to take my live environment offline while I perform an upgrade. However, the upgrade will overlap with scheduled Synthetic tests. What can I configure in Dynatrace to avoid false alerting?

- A. Credential vault
- **B. Maintenance Window**
- C. Delete the Synthetic monitors
- D. Synthetic On-demand execution

**Answer: B**

Explanation:

A Maintenance Window in Dynatrace allows you to suppress monitoring alerts during planned downtime or maintenance activities. When configured, it prevents problem detection and alerting for the specified entities and timeframe.

This ensures that:

\* Scheduled Synthetic failures during maintenance are not treated as real incidents

\* Alert noise is reduced

\* Teams can perform upgrades without triggering unnecessary alerts

Other options are not suitable:

\* Credential vault manages secrets

\* Synthetic on-demand execution manually triggers tests

\* Deleting monitors is not a practical or recommended solution

Reference: Based on official Dynatrace University training materials on maintenance windows and alert suppression.

### NEW QUESTION # 70

Welcome to the Practical section of your exam!

This portion of the exam requires you to configure and analyze various components within Dynatrace and is open book using Dynatrace documentation ONLY by opening a new tab. The Dynatrace Operator is already deployed for you in a Kubernetes environment (Linux host) in Cloud-Native Full-Stack. The easyTrade and easyTravel applications are also already deployed for you. You will most likely only interact with the Dynatrace Environment (SaaS Platform). For a majority of these questions: paste or attach

your screen captures directly to the question using the image control.

Information for connecting to exam components is provided in Dynatrace University in your event classroom. Open the Associate Exam Event / Classroom and go to the Environments tab, <https://university.dynatrace.com/account/events>

If you deem it necessary: you may use SSH through the built in terminal or through an SSH client of your choice. Use the IP address and credentials provided to log in to the Linux virtual machine running your Kubernetes cluster. When you SSH to the public IP and are presented with the credential prompt, enter the provided username and then the provided password.

Review these and additional instructions for connecting to your environment and creating screenshots by clicking 'View all questions' and then the 'Info' icon.

easyTravel Information

easyTravel is a multi-tier application implemented in .Net and Java. It provides a web portal which allows users to log in, search for journeys to various destinations, select promotional journeys that are offered, and to book a journey using credit card details. Additionally, a Business-to-Business (B2B) web portal for travel agencies is provided where travel agencies can manage the journeys that they offer and can review reports about created bookings.

easyTrade Information

easyTrade is also a multi-tier application that allows you to login as a fake user or even create a new user.

After which point, you are able to buy and sell stocks or deposit money into your balance using fake information. These interactions will create transactions in Dynatrace for you to analyze. However, there is a load generator running which means that interacting with this page should not be necessary to answer the questions.

Tips for completing tasks:

1. Read each task carefully and fully before starting, and then follow the instructions to complete each task.
2. Be sure your screen captures match the requirements stated and are readable.
3. To create your screen captures, you can zoom your screen, or take multiple screenshots to show all the areas requested. You can attach multiple images to the same question. It is recommended to provide more proof than necessary and document your steps. When in doubt, the old saying "show your work", comes in handy.
4. Use a screen capture tool to create and then copy to your clipboard and paste screen captures directly into the file upload control. To upload a file, allowed file types for the upload are: Jpg, jpeg, and .png
5. When saving your images for upload into the test be sure that your image titles do not contain the following characters:!,-,\_.,",',(,).
6. To access the web portal, use the links found in the SSH terminal. They will be listed as soon as you login.

Tasks1:

An application team needs to know how much memory their application, EasyTrade, is taking up in their Kubernetes cluster. They have to see the memory usage for all the pods running in the 'easytrade' namespace, summed up into a single metric. Use a Dashboard in the new Platform interface (not Dashboards Classic) to show this information to the team and set the timeframe for this data to look at the last 30 minutes. Call this dashboard "EasyTrade memory usage".

Screen capture(s) required:

Upload image(s) that show the following:

1. A dashboard "EasyTrade memory usage".
2. The tile used to display memory usage for all pods in the "easytrade" namespace as well as its configuration.

**Answer:**

Explanation:

See the solution below

Explanation:

Objective

Create a dashboard in the new Dynatrace platform (NOT Classic) that shows:

- \* Memory usage
- \* For all pods
- \* In easytrade namespace
- \* Summed into a single metric
- \* Timeframe = Last 30 minutes
- \* Dashboard name = EasyTrade memory usage

# STEP-BY-STEP EXECUTION

# Step 1: Open Dashboards (New Platform)

\* Go to: # Dashboards & Notebooks

\* Click: # Dashboards

\* Click: # Create Dashboard

# Step 2: Name the Dashboard

\* Set name exactly as: # EasyTrade memory usage

## Match spelling exactly (case-sensitive matters sometimes)

# Step 3: Add a Tile

\* Click: # Add Tile  
 \* Select: # Data Explorer  
 # Step 4: Select the Correct Metric  
 In the metric selector:  
 # Choose:  
 \* Kubernetes container memory usage  
 Typical metric:  
 builtin:kubernetes.container.memory.usage  
 # Step 5: Apply Namespace Filter  
 \* Add filter: # Kubernetes Namespace = easytrade  
 ## This is CRITICAL (without this # wrong answer)  
 # Step 6: Aggregate Data (MOST IMPORTANT STEP)  
 \* Set: # Aggregation = SUM  
 # This ensures:  
 All pods memory = ONE combined value  
 # Step 7: Remove Splitting  
 \* Ensure: # No Split by anything (pod/container/etc.)  
 ## If you see multiple lines # YOU DID IT WRONG  
 # Step 8: Choose Visualization  
 Pick one:  
 \* # Single value tile (BEST for exam)  
 \* OR simple graph (no split)  
 # Step 9: Set Timeframe  
 Top right of dashboard:  
 # Set:  
 \* Last 30 minutes  
 # Step 10: Save Dashboard  
 \* Click: # Save  
 □

#### NEW QUESTION # 71

I need to perform data transformation on logs during the ingestion phase, which capability provides this functionality?

- A. Service detection rules
- **B. Log Processing rules**
- C. Anomaly Detection rules
- D. Custom process monitoring rules
- E. Log Events

**Answer: B**

Explanation:

Log Processing rules in Dynatrace allow transformation of log data during the ingestion phase.

They enable:

- \* Parsing and structuring log data
- \* Masking sensitive information
- \* Enriching logs with additional attributes
- \* Filtering and modifying log content before storage

Other options are unrelated:

- \* Anomaly detection rules are for alerting
  - \* Log events are outputs, not transformation tools
  - \* Custom process monitoring rules and service detection rules are unrelated to logs
- Reference: Based on official Dynatrace University training materials on log monitoring and processing.

#### NEW QUESTION # 72

Under what conditions can you mute or unmute a vulnerability?

- **A. For a specific CVE**
- **B. For a specific Process Group**

- C. If a vulnerability is open
- D. If a vulnerability is resolved
- E. For a specific Management Zone

**Answer: A,B,E**

Explanation:

Dynatrace allows muting/unmuting vulnerabilities with granular scope control , including:

- \* Specific Process Group
- \* Specific Management Zone
- \* Specific CVE (vulnerability identifier)

These options allow precise control over how vulnerabilities are handled and displayed.

Options based on state (open/resolved) are not the criteria for muting configuration.

Reference: Based on official Dynatrace University training materials on Application Security.

### NEW QUESTION # 73

.....

Through years of persistent efforts and centering on the innovation and the clients-based concept, our company has grown into the flagship among the industry. Our company struggles hard to improve the quality of our Dynatrace-Associate study materials and invests a lot of efforts and money into the research and innovation of our Dynatrace-Associate Study Materials. Our brand fame in the industry is like the Microsoft in the computer industry, Google in the internet industry and Apple in the cellphone industry. High quality, considerate service, constant innovation and the concept of customer first are the four pillars of our company.
