Questions	Yes	No
Are either of the resources overbooked during the time period?	<input type="radio"/>	<input checked="" type="radio"/>
Is there a solution where neither resource is overbooked?	<input checked="" type="radio"/>	<input type="radio"/>
Does changing the resource for B-000018 to 2102 resolve the overbooking?	<input type="radio"/>	<input type="radio"/>

NEW QUESTION # 91

You are responsible for product and formula maintenance for a paint manufacturer. You create a formula for white paint and add its lines. When the formula size increases or an ingredient changes, the quantity of the pigment ingredient must be adjusted proportionately. You need to set up the formula line for the pigment.

Which formula feature should you use?

- A. Variable
- **B. Scalable**
- C. Step consumption
- D. Pegged supply

Answer: B

NEW QUESTION # 92

A company uses Dynamics 365 Supply Chain Management.

Several production orders are in the started status.

An issue with equipment causes a rollback in the production status for some of the orders.

Some orders must be reset once the equipment is repaired, based on which products were being manufactured.

You need to reset the production orders based on the requirements

Which status should you use for each requirement? To answer, drag the appropriate statuses to the correct requirements. Each status may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

Statuses	Answer Area	Requirement	Status
<input type="checkbox"/> Created		The report as finished quantities need to be reverted but retain the production jobs that were created.	<input type="checkbox"/>
<input type="checkbox"/> Ended		The production jobs need to be deleted but retain the calculated item consumption calculations.	<input type="checkbox"/>
<input type="checkbox"/> Estimated			
<input type="checkbox"/> Released			

Answer:

Explanation:

Statuses	Answer Area	Requirement	Status
<input checked="" type="checkbox"/> Created		The report as finished quantities need to be reverted but retain the production jobs that were created.	<input type="checkbox"/> Ended
<input checked="" type="checkbox"/> Ended		The production jobs need to be deleted but retain the calculated item consumption calculations.	<input type="checkbox"/> Created
<input type="checkbox"/> Estimated			
<input type="checkbox"/> Released			

Explanation:

Statuses	Answer Area	Requirement	Status

NEW QUESTION # 93

A company uses Discrete manufacturing concepts to produce cables. The company's production scheduler uses internal documents to track issues on in-process production orders.

The production scheduler must group all in-process production orders according to issues. The scheduler must be able to easily determine issues with production orders.

You need to implement a method to easily identify production orders with issues.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
■ Add a note to the BOM and list the issue of the production order.	
■ Create an item group for issues.	
■ Add the item group to the production order.	
■ Create a production pool for issues.	
■ Add the production pool to the production order.	
■ Filter the production orders by production pool.	

Answer:

Explanation:

Actions	Answer Area
■ Add a note to the BOM and list the issue of the production order.	
■ Create an item group for issues.	
■ Add the item group to the production order.	
■ Create a production pool for issues.	
■ Add the production pool to the production order.	
■ Filter the production orders by production pool.	

NEW QUESTION # 94

A bicycle manufacturing company is implementing Dynamics 365 Supply Chain Management.

The warehouse must pick and stage parts other than paint for bicycle assembly. Paint is at the production station.

You need to configure the reservations for production.

What should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement
Define configuration for paint reservation.
Define the reservation principle for paint.

Configuration

- Picking journal
- Picking journal**
- Production order
- Item model group
- Release
- Start
- Manual
- Release**
- Scheduling

Answer:

Explanation:

Answer Area

Requirement
Define configuration for paint reservation.

Define the reservation principle for paint.

Configuration

- Picking journal
- Picking journal**
- Production order
- Item model group
- Release
- Start
- Manual
- Release**
- Scheduling

Explanation:

To configure the reservations for production, you should do the following:

* Define configuration for paint reservation: You should configure the Item model group for paint. The Item model group determines the inventory policies for an item, such as reservation, tracking, and costing¹. You can set the reservation policy for paint to FIFO date-controlled, which means that the inventory reservation is controlled by a sorting date according to the FIFO principle². You can also set the Backward from ship date option, which means that the inventory reservation is controlled by the last update physical date according to the FIFO rule².

* Define the reservation principle for paint: You should set the reservation principle to Start. This means that inventory is reserved when production starts3. This way, you can ensure that paint is available at the production station when needed
