And our PSE-Cortex-Pro-24 study materials always contain the latest exam Q&A.

Palo Alto Networks Systems Engineer Professional - Cortex Sample Questions (Q44-Q49):

NEW QUESTION # 44

When preparing for a Cortex XSOAR proof of value (POV), which task should be performed before the evaluation is requested?

- A. Planning for every different use case the customer has for the solution
- B. Building out an executive-level proposal detailing the product capabilities
- C. Ensuring that the customer has single sign-on (SSO) configured in their environment

- D. Gathering a list of the different integrations that will need to be configured

Answer: D

Explanation:

Before requesting a Cortex XSOAR proof of value (POV) evaluation, it's important to gather a list of the different integrations that will need to be configured. This ensures that the POV can be tailored to the customer's environment and use cases, and allows the evaluation to be based on real-world data and workflows.

NEW QUESTION # 45

If an anomalous process is discovered while investigating the cause of a security event, you can take immediate action to terminate the process or the whole process tree, and block processes from running by initiating which Cortex XDR capability?

- A. Live Terminal
- B. Log Stitching
- C. File Explorer
- D. Live Sensors

Answer: A

NEW QUESTION # 46

Which integration allows data to be pushed from Cortex XSOAR into Splunk?

- A. SplunkUpdate integration
- B. Demisto App for Splunk integration
- C. SplunkPY integration
- D. ArcSight ESM integration

Answer: C

Explanation:

Reference: <https://xsoar.pan.dev/docs/reference/integrations/splunk-py>

NEW QUESTION # 47

In the DBotScore context field, which context key would differentiate between multiple entries for the same indicator in a multi-TIP environment?

- A. Type
- B. Brand
- C. Vendor
- D. Using

Answer: C

NEW QUESTION # 48

An Administrator is alerted to a Suspicious Process Creation security event from multiple users.

The users believe that these events are false positives Which two steps should the administrator take to confirm the false positives and create an exception? (Choose two)

- A. Contact support and ask for a security exception.
- B. With the Malware Security profile, disable the "Prevent Malicious Child Process Execution" module
- C. Within the Malware Security profile add the specific parent process, child process, and command line argument to the child process whitelist
- D. In the Cortex XDR security event, review the specific parent process, child process, and command line arguments

Answer: C,D
