The HPE6-A88 Study Materials have many professionals, and they monitor the use of the user environment and the safety of the learning platform timely, for there are some problems with those still in the incubation period of strict control, thus to maintain the HPE6-A88 study materials timely, let the user comfortable working in a better environment. Believe it or not, we face the more intense society, and we should prompt our competitiveness to make our dreams come true.

## HPE Aruba Networking ClearPass Exam Sample Questions (Q30-Q35):

### NEW QUESTION # 30

A company uses ClearPass to manage network access and has integrated it with an external server that supports HTTP API access. A new policy requires that any device managed by the EMM server must receive a specific configuration update upon network authentication. How can ClearPass facilitate this requirement?

- A. ClearPass can directly update the device configuration without involving the EMM server.
- B. ClearPass can only notify the network administrator to manually update the device configuration.
- C. ClearPass can send an HTTP message to the EMM server, triggering the server to push the required configuration update to the device.

**Answer: C**

Explanation:

ClearPass can integrate with external systems through HTTP-based APIs. During authentication, ClearPass can trigger an HTTP request to the EMM server, which then initiates the required configuration update on the managed device based on the defined policy.

### NEW QUESTION # 31

When configuring a new custom Operator Profile in ClearPass, an administrator needs to ensure that the system properly assigns this profile to users based on their roles. What critical step must be taken to meet this need?

- A. Modify the Local User Repository to directly assign the custom profile to each user.
- B. Include the operator account's role evaluation in the enforcement policy to select the new custom Operator Profile.
- C. Edit the built-in Guest Operator Login policy to include the new custom profile.

**Answer: C**

Explanation:

Custom Operator Profiles (which define what a Guest administrator can see and do) are mapped to users during their login to the ClearPass Guest/Workflows interface. For a new profile to be active, the administrator must navigate to the Guest Operator Login policy and add a rule that assigns that specific profile based on the user's ClearPass Role. Without this mapping in the login policy, the system will fall back to a default profile or deny access.

#### NEW QUESTION # 32

An IT administrator is setting up guest access on a corporate network using ClearPass. They have configured the RADIUS service correctly and enabled the Allow All MAC AUTH method. However, they notice that clients are not redirected to the captive portal for authentication. What is the likely reason for this issue?

- A. The guest repository is not properly tagging the endpoints with the necessary information.
- B. The MAC caching feature is not enabled for the guest access service.
- C. The 'captive portal access' value does not match the user role on the gateway associated with the captive portal.

**Answer: C**

Explanation:

Redirection to a captive portal is triggered by the Network Access Device (NAD) based on the RADIUS response from ClearPass. If ClearPass returns a role or attribute (like a redirect-URL or a specific "logon" role) that the gateway does not recognize or support, the gateway will not intercept the user's web traffic. The 'captive portal access' value (often a VSA or a filter-ID) must exactly match a pre-configured role on the Aruba gateway that has the "Captive Portal" profile attached.

#### NEW QUESTION # 33

A security analyst needs to ensure that ClearPass sends a notification whenever a report is ready. They want to receive these notifications via SMS. What is the correct procedure to set this up?

- A. Configure the SMS Gateway under ClearPass Guest and ensure report notifications are enabled in Insight.
- B. Set up an email relay and configure it to forward the emails as SMS messages.
- C. Enable SMS notifications in the Administration > External Servers > Messaging Setup menu.

**Answer: A**

Explanation:

ClearPass uses the SMS Gateway configuration within ClearPass Guest to send SMS messages.

By configuring the SMS Gateway and enabling SMS notifications for reports in Insight, ClearPass can automatically notify the analyst via SMS when a report is ready.

#### NEW QUESTION # 34

Which two conditions can influence the role assigned by ClearPass during a user session?

(Choose two)

Response:

- A. SSID used for connection
- B. Device OS type
- C. Time spent in the captive portal
- D. Static IP assignment

**Answer: A,B**

#### NEW QUESTION # 35

.....

There are more and more people to try their best to pass the HPE6-A88 exam, including many college students, a lot of workers, and even many housewives and so on. These people who want to pass the HPE6-A88 exam have regard the exam as the only one chance to improve themselves and make enormous progress.
