

# CInP Actual Test Answers - CInP Valid Exam Guide

DOWNLOAD the newest TroytecDumps CInP PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1GuQ9yVCzgjktjUH-sOi9d3MbgbaoLGTI>

We can proudly say that our CInP exam questions are global. So no matter what kinds of CInP test torrent you may ask, our after sale service staffs will help you to solve your problems of CInP practice braindump in the most professional way. Since our customers aiming to CInP study tool is from different countries in the world, and there is definitely time difference among us, we will provide considerate online after-sale service on our CInP training guide twenty four hours a day, seven days a week, please just feel free to contact with us anywhere at any time.

It is very convenient for you to use the online version of our CInP real test. If you realize convenience of the online version, it will help you solve many problems. On the one hand, the online version is not limited to any equipment. You are going to find the online version of our CInP Test Prep applies to all electronic equipment, including telephone, computer and so on. On the other hand, if you decide to use the online version of our CInP study materials, you don't need to worry about no WLAN network.

## CInP Valid Exam Guide, Clear CInP Exam

As one of the hot exam of our website, GIInI dumps pdf has a high pass rate which reach to 85%. According to our customer's feedback, our CInP vce braindumps covers mostly the same topics as included in the real exam. So if you practice our CInP Test Questions seriously and review test answers, pass exam will be absolute.

## GIInI Certified Innovation Professional (CInP) Sample Questions (Q77-Q82):

### NEW QUESTION # 77

A well-developed Opportunity Analysis will uncover for a business both \_\_\_\_\_.

- A. currently untapped opportunities and future potential opportunities.
- B. tangible and intangible opportunities.
- C. unmet and unarticulated opportunities.
- D. good opportunities and bad opportunities.

**Answer: C**

**Explanation:**

The correct answer is D. unmet and unarticulated opportunities. In innovation management, Opportunity Analysis is used to identify areas where value can be created through a better understanding of customer needs, market gaps, and emerging conditions. A strong analysis does not only reveal needs that customers already recognize and can clearly express. It also helps uncover needs that customers feel or experience but may not yet be able to articulate clearly.

Unmet opportunities refer to needs or problems that are known but insufficiently addressed by current offerings in the market. These are visible gaps where existing solutions do not fully satisfy customer expectations or requirements. Unarticulated opportunities, by contrast, are deeper and often more powerful.

These involve hidden frustrations, latent needs, or emerging desires that customers may not consciously describe, yet which create strong potential for innovation when discovered.

This distinction is important in GInI related topics such as needfinding, design thinking, research, and insights mining. The most valuable innovations often come not only from responding to stated needs, but from discovering unarticulated opportunities that lead to more meaningful and differentiated solutions.

#### NEW QUESTION # 78

An Innovation Team's story must convey a true sense of purpose in resolving their challenge, and must relate that to something that truly matters at a fundamentally human level, not just at a business level.

Select one correct answer from the list:

- A. A sense of ownership
- B. A true sense of pride
- C. A sense of wonder
- **D. A true sense of purpose**

**Answer: D**

Explanation:

GInI's CInP Handbook stresses that an Innovation Team's narrative must go beyond business metrics (e.g., profit, efficiency) to connect with stakeholders on a human level-addressing needs, emotions, or societal impact. This requires "a true sense of purpose," which ties the team's challenge to a meaningful "why" that resonates deeply, such as improving lives or solving pressing problems. Option B, "a sense of ownership," is team-centric and lacks the broader human connection GInI seeks. Option C, "a true sense of pride," reflects an outcome, not the driving force. Option D, "a sense of wonder," is inspirational but too vague for GInI's focus on purpose-driven innovation. Option A aligns with GInI's storytelling framework, where purpose links the challenge to human significance, enhancing stakeholder buy-in. The original answer (A) is correct, reflecting GInI's holistic approach that elevates innovation beyond mere business objectives to create lasting impact, a principle rooted in Design Thinking influences within GInI's methodology.

#### NEW QUESTION # 79

In the fourth step of the GInI Breakthrough Innovation Method-Synthesis & Capture-teams will generate as many new value models as makes sense for the situation. They can then use preliminary filtering to select the most promising models to move forward with.

Select one correct answer from the list:

- A. Select new models to move forward with that will ensure they are as good as their competitors
- B. Select the most technologically-exciting models to move forward with
- C. Eliminate all but the most certain-to-be-approved models
- **D. Select the most promising models to move forward with**

**Answer: D**

Explanation:

The CInP Handbook clarifies that in "Synthesis & Capture," teams generate multiple concepts (not necessarily "value models" as the question states-likely a typo for "solution concepts") and apply "preliminary filtering" to identify the "most promising" ones for further development. GInI defines "promising" as having high potential for value creation, feasibility, and alignment with the context, not just technological appeal (A), competitive parity (B), or certainty (D). Option A prioritizes excitement over viability, which GInI avoids. Option B focuses on benchmarking, not innovation's goal of differentiation.

Option D, "most certain-to-be-approved," is overly conservative, clashing with GInI's risk-tolerant Front End ethos. Option C reflects GInI's balanced approach-filtering for promise, not perfection-consistent with the original answer. Despite the question's "value models" error, the intent aligns with solution filtering, a critical step to refine ideas without prematurely narrowing scope, embodying GInI's iterative refinement process.

#### NEW QUESTION # 80

Throughout Stage 5 of the GInI InMS, the organization will have many opportunities for feedback loops (just as in Stage 4), where their learnings help them to either reinforce, redirect, or kill each project.

Select one correct answer from the list:

- A. Reimagine, renew, or accelerate
- B. Reinstate, refocus, or ignore
- C. Remove, restore, or monitor
- **D. Reinforce, redirect, or kill**

**Answer: D**

Explanation:

GInI's CInI Handbook mirrors Stage 4's feedback loops in Stage 5, where pilots and early launches provide data to "reinforce" (bolster strengths), "redirect" (adjust course), or "kill" (halt unviable efforts). This iterative refinement ensures the Back End delivers value, consistent with GInI's adaptive execution model.

"Reimagine, renew, accelerate" (B) is forward-looking, not evaluative. "Remove, restore, monitor" (C) is passive. "Reinstate, refocus, ignore" (D) lacks termination clarity. Option A aligns with GInI's terminology, matching the original answer, reflecting a disciplined, responsive approach to scaling innovation—a GInI strength in managing late-stage risks.

### NEW QUESTION # 81

Whenever an Innovation Team must eventually hand off its project to another team somewhere down the road, if they do not first get upfront alignment from this downstream team and its leadership, that downstream team is likely to refuse to own the project, and thus drop it and let it die.

Select one correct answer from the list:

- **A. Refuse to own the project, and thus drop it and let it die**
- B. Complain to the business' senior leadership
- C. Decide that innovation just doesn't work
- D. Charge the Innovation Group for its time

**Answer: A**

Explanation:

GInI's CInP Handbook stresses the importance of cross-team alignment in the innovation process, particularly at phase transitions (e.g., Mid Zone to Back End). Without "upfront alignment" from a downstream team (e.g., Operations for execution), the receiving team may lack ownership, leading them to "refuse to own the project" and "drop it and let it die"—a common failure mode where projects stall due to miscommunication or disinterest. "Complain to senior leadership" (B) is possible but not GInI's focus. "Decide innovation doesn't work" (C) is an overreaction, not a direct outcome. "Charge the Innovation Group" (D) is impractical. Option A matches GInI's warning, aligning with the original answer, highlighting a critical GInI principle—collaboration and buy-in are essential for project survival across phases.
