

CPIM-8.0 Testking - CPIM-8.0 Online Prüfungen

CPIM

CERTIFIED IN PLANNING AND INVENTORY MANAGEMENT

MODULE CONTENT OUTLINE

The APICS CPIM Learning System delivers comprehensive, personalized, and streamlined CPIM exam preparation. Designed using a proven approach for teaching adult learners, this program helps you understand, apply and engage with CPIM-focused content.

CPIM 8.0 Learning System follows the APICS Exam Content Manual (ECM) version 8.0.

The CPIM Learning System and preparation courses are broken down into 8 modules.

Module 1: Supply Chains and Strategy

Section A: Supply Chains, the Environment, and Strategy

Section B: Strategic Scope and Objectives

Section C: Developing and Managing Organizational Strategy

Section D: Functional and Operational Strategies

Section E: Environments, Types, and Layouts

Section F: Performance Monitoring and KPIs

Section G: Risk Management

Section H: Capital Equipment and Facilities

Section I: Sustainability Strategies

Module 2: Sales and Operations Planning

Section A: S&OP Purpose and Process

Section B: Aggregate Demand and Supply Plans

Section C: Reconciling S&OP Plans

Module 3: Demand

Section A: Demand Management

Section B: Sources of Demand/Forecasting

Section C: Forecast Performance

Wie kann man Erfolge erlangen. Es gibt nur eine Ankürzung, nämlich: die Lernhilfe zur APICS CPIM-8.0Zertifizierungsprüfung von DeutschPrüfung zu benutzen. Das ist unser Vorschlag für jeden Kandidaten. Wir hoffen, dass Sie Ihren Traum erfüllen können.

APICS Certified in Planning and Inventory Management (CPIM 8.0) CPIM-8.0 Prüfungsfragen mit Lösungen (Q195-Q200):

195. Frage

The time spent In queue by a specific manufacturing job is determined by which of the following factors related to the order?

- A. Lot size
- B. Run time
- C. Setup time
- D. Priority

Antwort: D

Begründung:

The time spent in queue by a specific manufacturing job is determined by the priority of the order. Priority is the relative importance or urgency of an order compared to other orders in the system. Priority can be assigned based on various criteria, such as due date,

customer preference, profitability, or first-come-first-served.

Priority determines the order in which jobs are processed at each workstation and affects the waiting time and flow time of each job. Higher priority jobs have shorter waiting times and lower priority jobs have longer waiting times. Priority can be used as a tool to manage the trade-offs between customer service, capacity utilization, and inventory levels. References:

Managing Supply Chain Operations, Chapter 7: Scheduling and Sequencing, Section 7.2: Priority Rules CPIM Exam Content Manual, Module 6: Detailed Schedules, Section 6.2: Scheduling and Sequencing, Subsection 6.2.2: Priority Rules

196. Frage

In conducting a new corporate payroll system security review, which of the following individuals should answer questions regarding the data classification?

- A. Head of compliance
- **B. Head of human capital**
- C. Chief Information Security Officer (CISO)
- D. Chief Information Officer (CIO)

Antwort: B

197. Frage

A company has a demand for 30 units of A, 40 units of B, and 50 units of C. These products are scheduled to run daily in batches of 10 as follows: ABC, ABC, ABC, CBC. What is this scheduling technique called?

- A. Matrix
- **B. Mixed-model**
- C. Synchronized
- D. Line balancing

Antwort: B

Begründung:

Mixed-model scheduling is a technique that allows multiple products to be produced on the same assembly line without changeovers, and then sequences those products in a way that smoothes the demand for upstream components¹². In this case, the company is using mixed-model scheduling to produce three different products (A, B, and C) on the same line, and then alternating them in a pattern that minimizes the variation in the workload and the inventory levels. The other options are not correct because:

*Matrix scheduling is a technique that assigns tasks to workers based on their skills and availability³.

*Synchronized scheduling is a technique that coordinates the production and delivery of materials and components to match the demand of the final assembly⁴.

*Line balancing is a technique that distributes the workload evenly among the workers or machines on a production line⁵.

198. Frage

A security practitioner has been asked to investigate the presence of customer Personally Identifiable Information (PII) on a social media website. Where does the practitioner begin?

- **A. Initiate the organization's Incident Response Plan (IRP).**
- B. Review logs of all user's social media activity.
- C. Review the organizational social media policy.
- D. Determine a list of information assets that contain PII.

Antwort: A

199. Frage

Which of the following factors is considered a carrying cost?

- A. Transportation
- B. Scrap rate
- **C. Obsolescence**
- D. Setup

Antwort: C

Begründung:

Carrying cost is the total cost of holding and storing inventory. It includes various expenses such as storage, insurance, taxes, depreciation, and obsolescence. Obsolescence is the loss of value or usefulness of inventory due to changes in technology, customer preferences, or market conditions. Obsolescence is considered a carrying cost because it reduces the potential revenue that can be generated from selling the inventory. Setup, transportation, and scrap rate are not carrying costs, but rather order costs, logistics costs, and quality costs respectively. Warum sind die Fragenkataloge zur APICS CPIM-8.0 Zertifizierungsprüfung von DeutschPrüfung beliebter als die anderen?

Erstens: Resonanz. Wir müssen die Bedürfnisse der Kandidaten kennen, und umfassender als andere Websites. Zweitens: Spezialität. Um unsere Angelegenheiten zu erledigen, müssen wir alle unwichtigen Chancen aufgeben. Drittens: Man wird vielleicht eine Sache nach ihrem Aussehen beurteilen. Vielleicht haben wir die besten Produkte von guter Qualität. Aber wenn wir sie in einer kitschig Weise repräsentieren, werden Sie sicher zu den kitschigen Produkten gehören. Hingegen repräsentieren wir sie in einer fachlichen und kreativen Weise werden wir die besten Effekte erzielen. Die Fragenkataloge zur APICS CPIM-8.0 Zertifizierungsprüfung von DeutschPrüfung sind solche erfolgreichen Fragenkataloge.
