Microsoft SC-400 Exam: Everything You Need to Know

Resourceful Tips to Pass the Microsoft SC-400 Exam

Getting Into The Microsoft SC-400 Certification: Study Guide on how to prepare for the exam and what you should expect

Microsoft Information Protection Administrator Certification is given to individuals who have demonstrated their knowledge in the field. In order to acquire this certification, candidates must pass a test and satisfy other requirements. The certification is not mandatory but can serve as proof that the individual has adequate skills in information protection implementation and administration. The Microsoft SC-400 test is composed of multiple choice questions that are related to the concepts that the candidate should know. These concepts include cryptographic fundamentals; security principles and concepts; security architecture design considerations, such as storage systems, network systems and services; access control; auditing and monitoring; data labeling; data recovery; security policy, planning and management fundamentals; identity management principles; rights management services (RMS); and key technologies for securing business data. The candidate may be required to take an exam from one or all of the above categories. You can check its importance by knowing that most of the MS certified candidates have passed their exams by attempting **Microsoft SC-400 Exam Dumps**. Individuals may opt to take the Microsoft SC-400 exam at any of the Pearson VUE test centers across the world for a fee. The Microsoft certification exams are conducted at various times during the year. A candidate can schedule an exam according to his or her convenience by selecting from the available dates and locations.
