

# Top Features of 2Pass4sure Updated Databricks-Generative-AI-Engineer-Associate Exam Practice Questions

BTW, DOWNLOAD part of 2Pass4sure Databricks-Generative-AI-Engineer-Associate dumps from Cloud Storage:  
<https://drive.google.com/open?id=14CyVZdHBTjtdsCKIwzFEtS5H14Rwg6c>

So rest assured that with the Databricks Certified Generative AI Engineer Associate (Databricks-Generative-AI-Engineer-Associate) practice questions you will not only make the entire Databricks-Generative-AI-Engineer-Associate exam dumps preparation process and enable you to perform well in the final Databricks Certified Generative AI Engineer Associate (Databricks-Generative-AI-Engineer-Associate) certification exam with good scores. To provide you with the updated Databricks Databricks-Generative-AI-Engineer-Associate Exam Questions the Databricks offers three months updated Databricks Certified Generative AI Engineer Associate (Databricks-Generative-AI-Engineer-Associate) exam dumps download facility, Now you can download our updated Databricks-Generative-AI-Engineer-Associate practice questions up to three months from the date of Databricks Certified Generative AI Engineer Associate (Databricks-Generative-AI-Engineer-Associate) exam purchase.

There is no site can compare with 2Pass4sure site's training materials. This is unprecedent true and accurate test materials. To help each candidate to pass the exam, our Databricks elite team explore the real exam constantly. I can say without hesitation that this is definitely a targeted training material. The 2Pass4sure's website is not only true, but the price of materials are very reasonable. When you choose our Databricks-Generative-AI-Engineer-Associate products, we also provide one year of free updates. This allow you to have more ample time to prepare for the exam. So that you can eliminate your psychological tension of exam, and reach a satisfactory way.

## Latest Databricks-Generative-AI-Engineer-Associate Test Blueprint - Exam Databricks-Generative-AI-Engineer-Associate Discount

Databricks-Generative-AI-Engineer-Associate exam prep has an extensive coverage of test subjects, a large volume of test questions, and an online update program. Databricks-Generative-AI-Engineer-Associate test guide is not only the passbooks for students passing all kinds of professional examinations, but also the professional tools for students to review examinations. In the past few years, Databricks-Generative-AI-Engineer-Associate question torrent has received the trust of a large number of students and also helped a large number of students passed the exam smoothly.

## Databricks Certified Generative AI Engineer Associate Sample Questions (Q36-Q41):

### NEW QUESTION # 36

A Generative AI Engineer is developing a patient-facing healthcare-focused chatbot. If the patient's question is not a medical emergency, the chatbot should solicit more information from the patient to pass to the doctor's office and suggest a few relevant pre-approved medical articles for reading. If the patient's question is urgent, direct the patient to calling their local emergency services.

Given the following user input:

"I have been experiencing severe headaches and dizziness for the past two days." Which response is most appropriate for the chatbot to generate?

- A. Please provide your age, recent activities, and any other symptoms you have noticed along with your headaches and dizziness.
- B. Headaches can be tough. Hope you feel better soon!
- C. Here are a few relevant articles for your browsing. Let me know if you have questions after reading them.
- **D. Please call your local emergency services.**

**Answer: D**

Explanation:

\* Problem Context: The task is to design responses for a healthcare-focused chatbot that appropriately addresses the urgency of a patient's symptoms.

\* Explanation of Options:

\* Option A: Suggesting articles might be suitable for less urgent inquiries but is inappropriate for symptoms that could indicate a serious condition.

\* Option B: Given the description of severe symptoms like headaches and dizziness, directing the patient to emergency services is prudent. This aligns with medical guidelines that recommend immediate professional attention for such severe symptoms.

\* Option C: Offering well-wishes does not address the potential seriousness of the symptoms and lacks appropriate action.

\* Option D: While gathering more information is part of a detailed assessment, the immediate need here suggests a more urgent response.

Given the potential severity of the described symptoms, Option B is the most appropriate, ensuring the chatbot directs patients to seek urgent care when needed, potentially saving lives.

### NEW QUESTION # 37

A Generative AI Engineer is tasked with deploying an application that takes advantage of a custom MLflow Pyfunc model to return some interim results.

How should they configure the endpoint to pass the secrets and credentials?

- A. Pass the secrets in plain text
- B. Pass variables using the Databricks Feature Store API
- **C. Add credentials using environment variables**
- D. Use spark.conf.set()

**Answer: C**

Explanation:

Context: Deploying an application that uses an MLflow Pyfunc model involves managing sensitive information such as secrets and credentials securely.

Explanation of Options:

\* Option A: Use spark.conf.set(): While this method can pass configurations within Spark jobs, using it for secrets is not recommended because it may expose them in logs or Spark UI.

\* Option B: Pass variables using the Databricks Feature Store API: The Feature Store API is designed for managing features for machine learning, not for handling secrets or credentials.

\* Option C: Add credentials using environment variables: This is a common practice for managing credentials in a secure manner, as environment variables can be accessed securely by applications without exposing them in the codebase.

\* Option D: Pass the secrets in plain text: This is highly insecure and not recommended, as it exposes sensitive information directly in the code.

Therefore, Option C is the best method for securely passing secrets and credentials to an application, protecting them from exposure.

### NEW QUESTION # 38

A Generative AI Engineer just deployed an LLM application at a digital marketing company that assists with answering customer

service inquiries.

Which metric should they monitor for their customer service LLM application in production?

- A. HuggingFace Leaderboard values for the base LLM
- B. Final perplexity scores for the training of the model
- C. Energy usage per query
- D. Number of customer inquiries processed per unit of time

**Answer: D**

Explanation:

When deploying an LLM application for customer service inquiries, the primary focus is on measuring the operational efficiency and quality of the responses. Here's why A is the correct metric:

\* Number of customer inquiries processed per unit of time: This metric tracks the throughput of the customer service system, reflecting how many customer inquiries the LLM application can handle in a given time period (e.g., per minute or hour). High throughput is crucial in customer service applications where quick response times are essential to user satisfaction and business efficiency.

\* Real-time performance monitoring: Monitoring the number of queries processed is an important part of ensuring that the model is performing well under load, especially during peak traffic times. It also helps ensure the system scales properly to meet demand.

Why other options are not ideal:

\* B. Energy usage per query: While energy efficiency is a consideration, it is not the primary concern for a customer-facing application where user experience (i.e., fast and accurate responses) is critical.

\* C. Final perplexity scores for the training of the model: Perplexity is a metric for model training, but it doesn't reflect the real-time operational performance of an LLM in production.

\* D. HuggingFace Leaderboard values for the base LLM: The HuggingFace Leaderboard is more relevant during model selection and benchmarking. However, it is not a direct measure of the model's performance in a specific customer service application in production.

Focusing on throughput (inquiries processed per unit time) ensures that the LLM application is meeting business needs for fast and efficient customer service responses.

### NEW QUESTION # 39

A Generative AI Engineer wants to build an LLM-based solution to help a restaurant improve its online customer experience with bookings by automatically handling common customer inquiries. The goal of the solution is to minimize escalations to human intervention and phone calls while maintaining a personalized interaction. To design the solution, the Generative AI Engineer needs to define the input data to the LLM and the task it should perform.

Which input/output pair will support their goal?

- A. Input: Online chat logs; Output: Buttons that represent choices for booking details
- B. Input: Customer reviews; Output: Classify review sentiment
- C. Input: Online chat logs; Output: Group the chat logs by users, followed by summarizing each user's interactions
- D. Input: Online chat logs; Output: Cancellation options

**Answer: A**

Explanation:

Context: The goal is to improve the online customer experience in a restaurant by handling common inquiries about bookings, minimizing escalations, and maintaining personalized interactions.

Explanation of Options:

\* Option A: Grouping and summarizing chat logs by user could provide insights into customer interactions but does not directly address the task of handling booking inquiries or minimizing escalations.

\* Option B: Using chat logs to generate interactive buttons for booking details directly supports the goal of facilitating online bookings, minimizing the need for human intervention by providing clear, interactive options for customers to self-serve.

\* Option C: Classifying sentiment of customer reviews does not directly help with booking inquiries, although it might provide valuable feedback insights.

\* Option D: Providing cancellation options is helpful but narrowly focuses on one aspect of the booking process and doesn't support the broader goal of handling common inquiries about bookings.

Option B best supports the goal of improving online interactions by using chat logs to generate actionable items for customers, helping them complete booking tasks efficiently and reducing the need for human intervention.

## NEW QUESTION # 40

A Generative AI Engineer is creating an LLM-based application. The documents for its retriever have been chunked to a maximum of 512 tokens each. The Generative AI Engineer knows that cost and latency are more important than quality for this application. They have several context length levels to choose from.

Which will fulfill their need?

- A. context length 514; smallest model is 0.44GB and embedding dimension 768
- B. context length 32768: smallest model is 14GB and embedding dimension 4096
- **C. context length 512: smallest model is 0.13GB and embedding dimension 384**
- D. context length 2048: smallest model is 11GB and embedding dimension 2560

**Answer: C**

Explanation:

When prioritizing cost and latency over quality in a Large Language Model (LLM)-based application, it is crucial to select a configuration that minimizes both computational resources and latency while still providing reasonable performance. Here's why Dis is the best choice:

\* Context length: The context length of 512 tokens aligns with the chunk size used for the documents (maximum of 512 tokens per chunk). This is sufficient for capturing the needed information and generating responses without unnecessary overhead.

\* Smallest model size: The model with a size of 0.13GB is significantly smaller than the other options.

This small footprint ensures faster inference times and lower memory usage, which directly reduces both latency and cost.

\* Embedding dimension: While the embedding dimension of 384 is smaller than the other options, it is still adequate for tasks where cost and speed are more important than precision and depth of understanding.

This setup achieves the desired balance between cost-efficiency and reasonable performance in a latency-sensitive, cost-conscious application.

## NEW QUESTION # 41

.....

In today's society, there are increasingly thousands of people put a priority to acquire certificates to enhance their abilities. With a total new perspective, Databricks-Generative-AI-Engineer-Associate study materials have been designed to serve most of the office workers who aim at getting an exam certification. With the popularization of wireless network, those who are about to take part in the Databricks-Generative-AI-Engineer-Associate exam guide to use APP on the mobile devices as their learning tool, because as long as entering into an online environment, they can instantly open the learning material from their appliances. Our Databricks-Generative-AI-Engineer-Associate Study Materials provide such version for you. The online test engine is a kind of online learning, you can enjoy the advantages of APP version of our Databricks-Generative-AI-Engineer-Associate exam guide freely. Moreover, you actually only need to download the APP online for the first time and then you can have free access to our Databricks-Generative-AI-Engineer-Associate exam questions in the offline condition if you don't clear cache.

**Latest Databricks-Generative-AI-Engineer-Associate Test Blueprint:** <https://www.2pass4sure.com/Generative-AI-Engineer/Databricks-Generative-AI-Engineer-Associate-actual-exam-braindumps.html>

Contact us quickly, Buy It Now And Start Preparing Yourself For The Databricks Certified Generative AI Engineer Associate (Databricks-Generative-AI-Engineer-Associate) Certification Exam, Databricks Authorized Databricks-Generative-AI-Engineer-Associate Pdf You many attend many certificate exams but you unfortunately always fail in or the certificates you get can't play the rules you wants and help you a lot, As for the safe environment and effective product, why don't you have a try for our Databricks-Generative-AI-Engineer-Associate test question, never let you down, You can enjoy free update for one year, so that you can obtain the latest version timely, and the latest version for Databricks-Generative-AI-Engineer-Associate training materials will be sent to your email automatically.

For example, how can a user prevent someone Databricks-Generative-AI-Engineer-Associate Latest Braindumps Free from uploading random scan to their PC, In all likelihood, this will be mean longer lines, Contact us quickly, Buy It Now And Start Preparing Yourself For The Databricks Certified Generative AI Engineer Associate (Databricks-Generative-AI-Engineer-Associate) Certification Exam!

## 2026 100% Free Databricks-Generative-AI-Engineer-Associate –High-quality 100% Free Authorized Pdf | Latest Databricks-Generative-AI-Engineer-Associate Test Blueprint

You many attend many certificate exams but you unfortunately Databricks-Generative-AI-Engineer-Associate always fail in or the

certificates you get can't play the rules you wants and help you a lot, As for the safe environment and effective product, why don't you have a try for our Databricks-Generative-AI-Engineer-Associate test question, never let you down!

You can enjoy free update for one year, so that you can obtain the latest version timely, and the latest version for Databricks-Generative-AI-Engineer-Associate training materials will be sent to your email automatically.
