## AD0-E124 Reliable Study Questions, Positive AD0-E124 Feedback

Our three versions of AD0-E124 study materials are the PDF, Software and APP online. They have their own advantages differently and their prolific AD0-E124 practice materials can cater for the different needs of our customers, and all these AD0-E124 simulating practice includes the new information that you need to know to pass the test for we always update it in the first time. So you can choose them according to your personal preference.

## Adobe Experience Manager DevOps Engineer Expert Sample Questions (Q169-Q174):

### NEW QUESTION # 169

A Cloud Manager pipeline deployment fails due to a missing dependency. What is the best approach to resolve this issue?

- A. Disable the dependency check and force the deployment
- B. Remove all dependencies and rebuild the project
- C. Manually add the missing JAR file to the AEM instance
- D. Check and update the pom.xml to ensure the dependency is correctly referenced

Answer: D

### NEW QUESTION # 170

Which actions should be taken to ensure OSGi configurations persist after AEM restarts? (Choose three)

- A. Deploy configurations via a package
- B. Use AEM Cloud Manager pipelines to deploy settings
- C. Store .config or .cfg.json files under /apps/<project>/config
- D. Manually update configurations in the Web Console before every restart

**Answer: A,B,C**

#### NEW QUESTION # 171

A DevOps engineer is managing an AEM as a Cloud Service Sites environment for a customer. They are in the final stages of going live and only have a couple of release candidates to go. During regular testing using an on-premise code quality check, all requirements were passed. Running the pipeline and a deployment to the AEM as a Cloud Service instances shows that the code quality check did not pass.

The code flagged, which produces the following issue:

```
@Property(label="Service Password", value = "mysecretpassword")
private static final String PROP_SERVICE_PASSWORD = "password";
```

What should the DevOps engineer do?

- A. Suppress the warning in Cloud Manager using @SuppressWarnings("squid:S2068")
- B. Contact support to bypass the pipeline step in Cloud Manager
- C. Inform the development team and ask them to remove the password
- D. Modify the pipeline configuration to allow static passwords

**Answer: C**

#### NEW QUESTION # 172

Which actions can be performed using the Cloud Manager API? (Choose two)

- A. Retrieve pipeline execution logs
- B. Manually trigger a code deployment
- C. Enable real-time dispatcher rule updates
- D. Manually trigger a code deployment

**Answer: A,D**

#### NEW QUESTION # 173

A DevOps engineer needs to analyze an end user performance issue for an AEM as a Cloud Service Sites setup. Certain assets that are delivered with a no-cache header to the browser are being delivered very slowly. Network performance looks fine, and other assets that have a TTL defined in the caching header are delivered normally.

Which log file should the DevOps engineer analyze further?

- A. AEM request log
- B. AEM error log
- C. HAR file
- D. Dispatcher log

**Answer: D**

#### NEW QUESTION # 174
