

New 1Z0-1055-25 Exam Duration, 1Z0-1055-25 Valid Exam Vce

What's more, part of that PassCollection 1Z0-1055-25 dumps now are free: https://drive.google.com/open?id=19UBNw7Y-3vosDFXnGzcJoC2K_wghsL7D

The purchase process of our 1Z0-1055-25 question torrent is very convenient for all people. In order to meet the needs of all customers, our company is willing to provide all customers with the convenient purchase way. The PDF version of our 1Z0-1055-25 study tool is very practical, which is mainly reflected on the special function. As I mentioned above, our company are willing to provide all people with the demo for free. You must want to know how to get the trial demo of our 1Z0-1055-25 question torrent; the answer is the PDF version. You can download the free demo form the PDF version of our 1Z0-1055-25 exam torrent. Maybe you think it does not prove the practicality of the PDF version, do not worry, we are going to tell us another special function about the PDF version of our 1Z0-1055-25 study tool.

We are all ordinary human beings. Something what have learned not completely absorbed, so that wo often forget. When we need to use the knowledge we must learn again. When you see PassCollection's Oracle 1Z0-1055-25 Exam Training materials, you understand that this is you have to be purchased. It allows you to pass the exam effortlessly. You should believe PassCollection will let you see your better future. Bright hard the hard as long as PassCollection still, always find hope. No matter how bitter and more difficult, with PassCollection you will still find the hope of light.

Best Preparations of 1Z0-1055-25 Exam Oracle Unlimited

The Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional exam is one of the most valuable certification exams. The Oracle Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional exam opens a door for beginners or experienced PassCollection professionals to enhance in-demand skills and gain knowledge. 1Z0-1055-25 Exam credential is proof of candidates' expertise and knowledge. After getting success in the Oracle Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional exam, candidates can put their careers on the fast route and achieve their goals in a short period of time.

Oracle 1Z0-1055-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Implementing Accounts Payable Balances: This section of the exam measures skills of Finance Operations Managers and covers Accounts Payable (AP) reporting, analysis, and period closing activities. It explains AP balance configurations, calendar management, and reconciliation with the General Ledger. Candidates must understand the setup of aging periods, payables calendars, and best practices for ensuring accurate financial close processes.
Topic 2	<ul style="list-style-type: none"> • Setting up Common Configurations in the Supplier Invoice to Payments Process This section of the exam measures skills of Accounts Payable Analysts and focuses on understanding the core setup required for supplier invoicing and payment processes. It covers the Enterprise Structure, Financial Reporting Structure, and Data Security model. Candidates must know the purpose of Business Units and Reference Sets and be able to manage Supplier and Bank Account Master Data effectively.
Topic 3	<ul style="list-style-type: none"> • Implementing Supplier Invoices: This section of the exam measures skills of Financial Systems Specialists and covers the setup and processing of supplier invoices. It focuses on understanding supplier invoice processing, AI-assisted automation, and key configurations such as invoice options, distribution sets, tolerances, holds, approvals, and release procedures. Candidates also learn how to manage business rules for invoice validation and processing efficiency.
Topic 4	<ul style="list-style-type: none"> • Implementing Expenses: This section of the exam measures skills of Expense Management Administrators and focuses on managing and configuring employee expense processes. It includes expense report processing, approval rules, and audit policies. Candidates must understand system configurations for templates, corporate card programs, conversion rate policies, travel integration, and AI-driven automation in expense management.
Topic 5	<ul style="list-style-type: none"> • Implementing Payments: This section of the exam measures skills of Payments Configuration Specialists and focuses on the payment lifecycle in the Oracle Fusion Payables module. It includes understanding the supplier payment process, AI role in automation, and the configuration of payment options, methods, disbursement choices, and process profiles. The section also involves managing approval workflows and payment process templates for secure and accurate disbursement management.

Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional Sample Questions (Q27-Q32):

NEW QUESTION # 27

Which two invoice types can have a status of Incomplete?

- A. Prepayment Invoices which are fully paid but not applied against any invoice
- B. Scanned Invoices which are rejected during import
- **C. Supplier Portal Invoices which are saved but not yet submitted**
- **D. Scanned Invoices with invalid or missing data**

Answer: C,D

Explanation:

Comprehensive and Detailed In-Depth

In Oracle Financials Cloud, the "Incomplete" status is assigned to invoices that require additional information or actions before they can be fully processed. This status ensures that incomplete or erroneous invoices are identified and addressed promptly.

A. Supplier Portal Invoices which are saved but not yet submitted

When suppliers create invoices through the Supplier Portal, they have the option to save their progress without submitting the invoice for approval or payment. These saved invoices are assigned an "Incomplete" status, indicating that the supplier has not yet finalized and submitted them. This allows suppliers to review and modify invoice details before formal submission.

support.oracle.com

B. Scanned Invoices with invalid or missing data

Invoices processed through Integrated Imaging or Intelligent Document Recognition (IDR) are scanned and imported into the system. If these scanned invoices contain invalid or missing data-such as incorrect invoice numbers, missing line items, or unreadable fields-they are assigned an "Incomplete" status. This designation prompts accounts payable personnel to review and correct the discrepancies before the invoices can proceed through the payment process.

docs.oracle.com

C . Scanned Invoices which are rejected during import

Invoices that are rejected during the import process due to significant errors or mismatches are typically not assigned an "Incomplete" status. Instead, they are marked as "Rejected" or "Error," indicating that they require substantial correction before reprocessing. Therefore, this option is not associated with the "Incomplete" status.

D . Prepayment Invoices which are fully paid but not applied against any invoice Prepayment invoices represent advance payments made to suppliers and are recorded as such. Once a prepayment is made, the invoice reflects a "Paid" status. The application of this prepayment to subsequent invoices is a separate process and does not revert the original prepayment invoice to an "Incomplete" status. Thus, this option does not correspond to the "Incomplete" status.

Understanding the scenarios that lead to an "Incomplete" status helps organizations efficiently manage and rectify invoice issues, ensuring a smooth accounts payable workflow.

NEW QUESTION # 28

Your cloud customer wants to use AI to automate key processes in Payables. You are tasked with setting up the required roles for AI apps.

When you create the user-defined AIAPPS_BIP_ROLE, which two role hierarchies should you add?

- A. BIP_DataModelDeveloper
- B. BI_Author
- C. AIAPPS_Data_Model_Developer
- D. BI_Integration
- E. AIAPPS_Author

Answer: C,E

Explanation:

Comprehensive and Detailed In-Depth

Oracle Adaptive Intelligence (AI) for Payables integrates with Oracle Payables Cloud to enhance automation and streamline invoice processing. To enable AI functionalities, certain roles must be assigned to users to allow them to access and configure AI-based reporting and automation tools.

AIAPPS_Author (Option A):

This role allows users to create and modify AI-based reports, dashboards, and analytics in Oracle Transactional Business Intelligence (OTBI) and BI Publisher.

Reference:

AIAPPS_Data_Model_Developer (Option D):

This role is essential for developing AI-driven data models that power analytics and automation within AI for Payables.

Options B, C, and E Analysis:

BI_Integration (Option B):

While BI Integration supports data extraction and reporting in BI Publisher, it is not specifically required for AI-based automation in Payables.

Verdict: Not required for AIAPPS_BIP_ROLE.

BI_Author (Option C):

This role provides general BI report development access but does not grant access to AI-based configurations or data models.

Verdict: Not required for AIAPPS_BIP_ROLE.

BIP_DataModelDeveloper (Option E):

This role is related to BI Publisher Data Model Development but does not include AI model configuration.

Verdict: Not required for AIAPPS_BIP_ROLE.

Thus, the correct answers are A. AIAPPS_Author and D. AIAPPS_Data_Model_Developer.

NEW QUESTION # 29

You are trying to use the Match in Full option for a purchase order, but your search for the PO is returning no results.

Which two are the reasons for this?

- A. The Supplier or Purchase Order is set up for self-billing
- B. The Purchase Order is already partially matched to an invoice
- C. The match approval level is set to 3-way matching
- D. The match approval level is set to 4-way matching

Answer: A,B

NEW QUESTION # 30

You have enabled Payment Approval for your Payment Process Requests (PPR). At what stage of the PPR is the payment approval process automatically triggered?

- A. Review Proposed Payments
- B. Build Payments
- C. Create Payment Files
- D. Review Installments

Answer: A

Explanation:

Comprehensive and Detailed In-Depth

In Oracle Financials Cloud, the Payment Process Request (PPR) undergoes several stages, each with specific functions and potential user interventions. When Payment Approval is enabled, the system incorporates an approval workflow to ensure that payments are reviewed and authorized before disbursement.

Stages of Payment Process Request:

Installation Selection:

Description: The system selects invoice installments based on predefined criteria such as due dates, payment methods, and supplier information.

User Action: Optional review if the "Review Installments" option is selected.

Document Validation:

Description: Validates the selected installments for completeness and correctness, ensuring all necessary information is present.

User Action: Required if there are validation errors or missing information.

Build Payments:

Description: Groups validated installments into payments based on attributes like payment date, disbursement bank account, and payment method.

User Action: None, this is an automated process.

Review Proposed Payments:

Description: Allows users to review and, if necessary, modify the proposed payments before finalizing them.

User Action: Required if the "Review Proposed Payments" option is selected.

Payment Approval:

Description: If enabled, this stage involves routing the proposed payments to designated approvers for authorization before disbursement.

User Action: Approvers must review and approve or reject the payments.

Create Payment Files:

Description: Generates the necessary payment files for disbursement, such as electronic funds transfer (EFT) files or check print files.

User Action: None, unless issues arise during file creation.

Trigger Point for Payment Approval:

The Payment Approval process is automatically triggered at the Review Proposed Payments stage. At this point, the system pauses to allow approvers to review the proposed payments and make decisions regarding their authorization. This control mechanism ensures that all payments are vetted before funds are disbursed, aligning with organizational policies and financial controls.

According to Oracle's documentation:

"If enabled, the payment process stops at the Review Proposed Payments stage. Approvers can then optionally remove payments directly from a payment process request and approve it." docs.oracle.com Analysis of Options:

A . Review Proposed Payments: Correct. This is the stage where the payment approval process is triggered, allowing approvers to review and authorize payments.

B . Create Payment Files: Incorrect. This stage occurs after payment approval and involves generating the actual payment files for disbursement.

C . Review Installments: Incorrect. This is an earlier stage where selected installments are reviewed before payments are built, but it does not involve the payment approval workflow.

D . Build Payments: Incorrect. This stage involves grouping validated installments into payments and occurs before the Review Proposed Payments stage.

Conclusion:

Enabling Payment Approval in Oracle Financials Cloud introduces a critical control point at the Review Proposed Payments stage of the Payment Process Request. This setup ensures that all proposed payments undergo managerial review and authorization before the creation of payment files and the actual disbursement of funds. Implementing this approval process helps maintain robust financial oversight and compliance within the organization's payment workflows.
