SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition, Sourcing and Procurement Sample Questions (Q77-Q82):

NEW QUESTION # 77

Which of the following apps can you use to extend the organizational data of an already existing material /product in SAP S/4HANA Cloud Public Edition? Note: There are 2 correct answers to this question.

- A. Change Material
- B. Manage Source Data Products
- C. Manage Product Master Data
- D. Create Material

Answer: A,C

Explanation:

In SAP S/4HANA Cloud Public Edition, extending the organizational data of an already existing material /product can be achieved through specific apps designed for managing and modifying master data. Here's a detailed explanation of the correct answers:

* Manage Product Master Data (A):This app allows users to manage product master data across different organizational levels, such as plants, sales organizations, and distribution channels. It is particularly useful for extending the organizational data of an existing material by adding or modifying attributes relevant to specific organizational units. This app provides a centralized interface to handle various aspects of product data.

* Change Material (B):The "Change Material" app is used to modify existing material master records. It allows users to update or extend the organizational data for materials in different organizational contexts, such as plant-specific or purchasing-related data. This app is essential when you need to make changes to existing materials without creating new ones.

* Create Material (C):This app is used to create new material master records rather than extending or modifying existing ones. Therefore, it is not suitable for extending the organizational data of an already existing material.

* Manage Source Data Products (D):This app is related to managing source data for products, typically used in procurement processes to define sources of supply. It does not directly deal with extending organizational data for existing materials.

SAP S/4HANA Cloud Public Edition Documentation:Change Material App

SAP Best Practices for Sourcing and Procurement in SAP S/4HANA Cloud Public Edition These references provide comprehensive insights into the functionalities and use cases of the mentioned apps within the context of SAP S/4HANA Cloud Public Edition - Sourcing and Procurement.

NEW QUESTION # 78

When do you specify the data retention period in the SAP S/4HANA Migration Cockpit?

- A. When the project status is "Not Started"
- B. When the project status is "Completed"
- **C. When the project status is "In Progress"**
- D. When the project status is "Finished"

Answer: C

NEW QUESTION # 79

How does an implementation consultant support customer experts during Fit-to-Standard workshops? Note: There are 2 correct answers to this question.

- A. Conduct end-user training on active scope items.
- **B. Highlight areas that require configuration or customization decisions.**
- C. Determine set up instructions for customer-driven integrations.
- D. Demonstrate SAP Best Practice business processes in the starter system

Answer: B,D

Explanation:

During Fit-to-Standard workshops, implementation consultants play a critical role in guiding customer experts through the evaluation of SAP Best Practices and identifying gaps between standard processes and customer-specific requirements. Below are the two correct answers:

- * **Highlight areas that require configuration or customization decisions (Option B):** Consultants help customers identify areas where standard SAP processes may need adjustments to meet specific business needs. This includes highlighting configuration options and discussing potential customizations. The SAP S/4HANA Cloud Fit-to-Standard Workshop Guide emphasizes this responsibility.
- * **Demonstrate SAP Best Practice business processes in the starter system (Option D):** Consultants demonstrate how SAP Best Practices are implemented in the starter system, providing customers with a clear understanding of standard processes. This helps customers evaluate whether these processes align with their requirements. The same SAP S/4HANA Cloud Fit-to-Standard Workshop Guide documents this activity.
- * **A. Conduct end-user training on active scope items:** End-user training is typically conducted during the realization phase, not during Fit-to-Standard workshops. These workshops focus on process alignment rather than training.
- * **C. Determine set up instructions for customer-driven integrations:** While integrations are important, determining setup instructions is not a primary focus of Fit-to-Standard workshops. This activity is usually addressed during the integration design phase.
- * **SAP S/4HANA Cloud Fit-to-Standard Workshop Guide:** Explains the objectives and activities of Fit-to-Standard workshops, including demonstrating SAP Best Practices and identifying configuration needs. <https://help.sap.com>
- * **SAP Activate Methodology for SAP S/4HANA Cloud Public Edition:** Provides an overview of the Fit-to-Standard workshop phase and its deliverables.

Why the Other Options Are Incorrect: Key References:

NEW QUESTION # 80

What is the characteristic of consignment in the Supplier Consignment (2LG) process?

- A. A supplier stores your material in its premises but has no liability on the consignment stock.
- B. A supplier provides you with material with agreed periods that is stored in its premises.
- **C. A supplier provides you with material that is stored on your premises but is still the property of the supplier.**
- D. A supplier provides you with material with agreed periods and you have the liability of the consignment stock.

Answer: C

NEW QUESTION # 81

What provides a foundation for the SAP Cloud ERP where integrations and extensions live?

- A. SAP Discovery Center
- B. SAP ABAP Environment
- C. SAP Business Accelerator Hub
- **D. SAP Business Technology Platform**

Answer: D
