

Authentic Best resources for VMCE_v12 Online Practice Exam

BTW, DOWNLOAD part of ITCertMagic VMCE_v12 dumps from Cloud Storage: https://drive.google.com/open?id=1CKXb3sUK1p_gJCgpqawnfWUU_Z-lhrdC

With VMCE_v12 study tool, you no longer need to look at a drowsy textbook. You do not need to study day and night. With VMCE_v12 learning dumps, you only need to spend 20-30 hours on studying, and then you can easily pass the exam. At the same time, the language in VMCE_v12 test question is very simple and easy to understand. Even if you are a newcomer who has just entered the industry, you can learn all the knowledge points without any obstacles. We believe that VMCE_v12 Study Tool will make you fall in love with learning. Come and buy it now.

Veeam VMCE_v12 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Moving or copying backups: This section of the exam covers use cases for backup processes using VeeamMover.
Topic 2	<ul style="list-style-type: none">• Enacting a recovery: This section is about getting practice in recovering various recoveries with diverse data.
Topic 3	<ul style="list-style-type: none">• Replication: This section of the exam covers the description of use cases, architectures, and elements of replication jobs.
Topic 4	<ul style="list-style-type: none">• Veeam Backup Enterprise Manager: The section describes the use cases for Veeam Backup Enterprise Manager.
Topic 5	<ul style="list-style-type: none">• Virtual machine backup: This section of the exam covers protecting the VMware and Hyper V to safeguard VMware that follows SLAs.
Topic 6	<ul style="list-style-type: none">• Transport modes: This section aims to analyze different methods to collect and read data from the production environment.
Topic 7	<ul style="list-style-type: none">• Veeam Data Platform: This section deals with the identification and description of the goal of each major product in the Veeam Data Platform.
Topic 8	<ul style="list-style-type: none">• Backup data optimizations: This section covers the need for object storage to be backed up and the supported object storage solutions while utilizing repositories.

Topic 9	<ul style="list-style-type: none"> Core components: This section of the exam covers exploring the functionality of Veeam Backup & Replication and system requirements.
Topic 10	<ul style="list-style-type: none"> Verifying recoverability: This section of the exam covers the creation of automated tests to ensure recoverability from backups and replicas.
Topic 11	<ul style="list-style-type: none"> Scale-out Backup Repository: This section of the exam covers the description of the architecture, placement policies, and data tiers.
Topic 12	<ul style="list-style-type: none"> Agent backup: This section of the exam covers the identification of protection groups for automating the installation of Veeam Agents.

Reliable VMCE_v12 Study Plan - Veeam Certified Engineer v12 Realistic Reliable Braindumps Files

ITCertMagic guarantees that if you use the product, you will pass the exam on your first try. Its primary goal is to save students time and money, not just conduct a business transaction. Candidates can take advantage of the free trials to evaluate the quality and standard of the VMCE_v12 Dumps before making a purchase. With the right Veeam Certified Engineer v12 (VMCE_v12) study material and support team passing the examination at first attempt is an achievable goal.

Veeam Certified Engineer v12 Sample Questions (Q143-Q148):

NEW QUESTION # 143

A domain administrator is working on a PowerShell script. Due to an error, the script drops 40 users out of 100 from the Business Management Organization Unit in Active Directory. Veeam Explorer for Active Directory will be used to restore it back. Choose the option that will restore functionality with the minimum impact on user experience.

- A. Use the "Point in Time" option to specify the point in time you want to restore the Active Directory database to.
- B. Use the "Compare with Production" option to restore only the missing objects back to the Organizational Unit.**
- C. Use the "Fine-tune" restore option to roll back the Organizational Unit to the correct state.
- D. Use the "Quick Rollback" option to perform a restore of the changed blocks of the Active Directory database file.

Answer: B

NEW QUESTION # 144

A company has an RPO set at 4 hours and values data protection and disaster recovery. A disaster occurs on June 12, 2023 at 10:00 AM.

Which restore point gives the company the best RPO?

- A. June 12,2023, 1:00 PM
- B. June 12,2023,8:00 AM
- C. June 12,2023,9:30 AM**
- D. June 12,2023,5:00 AM

Answer: C

Explanation:

Given the company has an RPO set at 4 hours, the restore point that gives the best RPO is the one closest to the time of the disaster without going over the disaster's timestamp. Since the disaster occurred on June 12, 2023, at 10:00 AM, the restore point at June 12, 2023, 9:30 AM would be the most recent one within the RPO threshold. This restore point minimizes data loss and provides the most current data before the disaster.

NEW QUESTION # 145

A backup of a Windows VM running on a VMware cluster has been created. In which scenario can the Quick Rollback option be used during a Full VM Restore of the VM?

- A. Migration of VM to Hyper-V host in the same data center
- B. Issues caused by storage data corruption
- C. Migration of VM to VMware host in a different data center
- **D. Issues caused by VM guest user error**

Answer: D

Explanation:

The Quick Rollback feature can be used during a Full VM Restore to restore only the changed blocks of data since the last backup. This is typically used when the issues are minor and have been caused by VM guest user error, rather than full-scale data corruption or migrations to a different virtualization host. Quick Rollback can efficiently restore the VM to its previous state without the need to transfer the entire VM's data. References:

* Veeam Backup & Replication User Guide: Quick Rollback

* Veeam Help Center: Performing Quick Rollback

NEW QUESTION # 146

A company's infrastructure includes a Fibre Channel SAN where the VMware VMs are located. The administrator wants to create a backup that minimizes the impact on the production environment. What proxy transport mode should be used?

- A. Guest interaction
- B. Virtual appliance
- **C. Direct storage access**
- D. Network

Answer: C

Explanation:

For a VMware environment on a Fibre Channel SAN, the most efficient proxy transport mode to minimize impact on the production environment is Direct Storage Access. This mode allows the backup proxy to directly interact with the SAN, bypassing the production network and reducing load on the ESXi hosts.

NEW QUESTION # 147

A company has separate networks for management traffic and data traffic. All Veeam components are communicating over the management network. How would they define the data network for backup data transfers?

- A. Update routing tables on the components involved in data transfer
- **B. Use the preferred network settings to switch to data network for the backup traffic**
- C. Re-add all Veeam components involved in data transfer through the required interfaces
- D. Create a global network traffic rule, set appropriate source and target IP range

Answer: B

Explanation:
